Portraits From Memory Recollections Of A Zoologist:

Portraits from Memory Richard Goldschmidt, 1956 **Portraits from Memory** Richard Benedict Goldschmidt, 2003-01-01 **Portraits from Memory: Recollections of a Zoologist. The Golden Age of Zoology. Portraits from Memory. With Plates.** Richard Benedict GOLDSCHMIDT, 1966 **Portraits from Memory** Richard Goldschmidt, 1956 *Foundations of Systematics and Biogeography* David M. Williams, Malte C. Ebach, 2007-11-19 Anyone interested in comparative biology or the history of science will find this myth busting work genuinely fascinating It draws attention to the seminal studies and important advances that have shaped systematic and biogeographic thinking It traces concepts in homology and classification from the 19th century to the present through the provision of a unique anthology of scientific writings from Goethe Agassiz Owen Naef Zangerl and Nelson among others **Oceanography: The Past M.** Sears, D. Merriman, 2012-12-06 This volume Oceanography The Past is the Proceedings of the Third International Congress on the History of Oceanography organized under the auspices of the Woods Hole Oceanographic Institution at Woods Hole Massachusetts USA September 22-26 1980 The Congress is a part of the year long celebration of the Fiftieth Anniversary of the founding of the Woods Hole Oceanographic Institution It will be followed by an Assembly September 29 October 2 in which invited speakers will address the question Will we use the oceans wisely the next 50 years in oceanography The papers from the Assembly will also be published by Springer Verlag as Oceanography The Present and Future a companion volume to this book The First International Congress on the History of Oceanography was held at the Musee Oceanographique in Monaco December 12-17 1966 It coincided with the centennial of the beginning of the distinguished career of Prince Albert I as a student and patron of oceanography for it was in 1866 that he first went to sea on the armored frigate Tetuan of the Royal Spanish Navy The results of this Congress were published as 57 papers in the Bulletin de l'Institut Oceanographique special no 2 vols 1-3 pp XLII 807 1968 **The Central Nervous System of Vertebrates, Vol. 1** H. Kuhlenbeck, 1966-11-02 In 1927 Hartwig Kuhlenbeck published a series of lectures on the central nervous system of vertebrates and gave neurobiology its standard reference for decades The present work now complete in 5 volumes represents a monumental expansion of the early lectures **The Human Brain and Its Universe, Vol. 1** H. Kuhlenbeck, 1982-03-08 These three volumes are the revised and enlarged edition of a classic work hailed as bringing a new perspective to knowledge of the mind brain relationship In the tradition of highest scholarship the author uses both neurological and epistemological approaches to provide a unique interpretation of the relationship of brain and consciousness A Karger Publishing Highlights 1890 2015 title **Biologists Under Hitler** Ute Deichmann, 1996 Her book also provides overwhelming evidence of German scientists conscious misrepresentation after the war of their wartime activities In this regard Deichmann's capsule biography of Konrad Lorenz is particularly telling *The Search for the Gene* Bruce Wallace, 2018-05-31 From Gregor Mendel's experiments on garden peas to the mammoth Human Genome Project of

today how did we get where we are in the science of genetics In this intriguing book Bruce Wallace examines the concept of the gene and recounts the history of genetic research providing a concise transition from genetics to modern molecular biology

Biogeography in a Changing World Malte C. Ebach, Raymond S. Tangney, 2006-11-01 Hampered by a confusing plethora of approaches and methods biogeography is often treated as an adjunct to other areas of study The first book to fully define this rapidly emerging subdiscipline Biogeography in a Changing World elucidates the principles of biogeography and paves the way for its evolution into a stand alone field Drawin

The Tragic Sense of Life Robert J. Richards, 2024-05-31 Prior to the First World War more people learned of evolutionary theory from the voluminous writings of Charles Darwin s foremost champion in Germany Ernst Haeckel 1834 1919 than from any other source including the writings of Darwin himself But with detractors ranging from paleontologist Stephen Jay Gould to modern day creationists and advocates of intelligent design Haeckel is better known as a divisive figure than as a pioneering biologist Robert J Richards s intellectual biography rehabilitates Haeckel providing the most accurate measure of his science and art yet written as well as a moving account of Haeckel s eventful life

Biology, Medicine and Society 1840-1940 Charles Webster, Lyndal Roper, 2003-02-13 This volume originates from a Past and Present conference on The Roots of Sociobiology held in 1978 and incorporates the results of recent research on problems in the social relations of the biological sciences The authors describe different historical aspects of the interrelationship of technical experience and social policy in the fields of health education and social welfare

The Seeds of Life Edward Dolnick, 2017-06-06 Why cracking the code of human conception took centuries of wild theories misogynist blunders and ludicrous mistakes Throughout most of human history babies were surprises People knew the basics men and women had sex and sometimes babies followed But beyond that the origins of life were a colossal mystery The Seeds of Life is the remarkable and rollicking story of how a series of blundering geniuses and brilliant amateurs struggled for two centuries to discover where exactly babies come from Taking a page from investigative thrillers acclaimed science writer Edward Dolnick looks to these early scientists as if they were detectives hot on the trail of a bedeviling and urgent mystery These strange searchers included an Italian surgeon using shark teeth to prove that female reproductive organs were not failed male genitalia and a Catholic priest who designed ingenious miniature pants to prove that frogs required semen to fertilize their eggs A witty and rousing history of science The Seeds of Life presents our greatest scientists struggling against their perceptions their religious beliefs and their deep seated prejudices to uncover how and where we come from

Jakob von Uexküll Carlo Brentari, 2015-02-18 The book is a comprehensive introduction to the work of the Estonian German biologist Jakob von Uexk ll After a first introductory chapter by Morten T nnessen and a second chapter on Uexk ll s life and philosophical background it contains four chapters devoted to the analysis of his main works They are followed by a vast eighth chapter which deals with the influence Uexk ll had on other philosophers and scientists Finally the author discloses his conclusions focused on the possibility of updating Uexk ll s work As far as the key issue is

concerned the Uexküllian Umwelt is the perceptive and operative world which surrounds animal species it is a subjective species specific construction which provides living organisms with great security and behaviour stability The relationship that the animal carries out with its environment is a complex system of semiotic interactions its behaviour is not a set of mechanical reactions but a spontaneous attribution of meaning to the outside world

Ladies in the Laboratory II Mary R.S. Creese, 2004-05-17 A survey of nineteenth century women whose journal publications are listed in the 19 volume London Royal Society's Catalogue of scientific papers 1800-1900 comprising an author index to scientific papers contained in the transactions of societies journals and other periodical works being the major index of scientific journal literature for the period

Reenchanted Science Anne Harrington, 2020-09-01 By the 1920s in Central Europe it had become a truism among intellectuals that natural science had disenchanted the world and in particular had reduced humans to mere mechanisms devoid of higher purpose But could a new science of wholeness heal what the old science of the machine had wrought Some contemporary scientists thought it could These years saw the spread of a new holistic science designed to nourish the heart as well as the head to reenchanted even as it explained Critics since have linked this holism to a German irrationalism that is supposed to have paved the way to Nazism In a penetrating analysis of this science Anne Harrington shows that in fact the story of holism in Germany is a politically heterogeneous story with multiple endings Its alliances with Nazism were not inevitable but resulted from reorganizational processes that ultimately brought commitments to wholeness and race healing and death into a common framework Before 1933 holistic science was a uniquely authoritative voice in cultural debates on the costs of modernization It attracted not only scientists with Nazi sympathies but also moderates and leftists some of whom left enduring humanistic legacies Neither a reduction of science to its politics nor a vision in which the sociocultural environment is a backdrop to the internal work of science this story instead emphasizes how metaphor and imagery allow science to engage real phenomena of the laboratory in ways that are richly generative of human meanings and porous to the social and political imperatives of the hour

A Conceptual History of Modern Embryology Scott F. Gilbert, 2013-11-11 Glory to the science of embryology So Johannes Holtfreter closed his letter to this editor when he granted permission to publish his article in this volume And glory there is glory in the phenomenon of animals developing their complex morphologies from fertilized eggs and glory in the efforts of a relatively small group of scientists to understand these wonderful events Embryology is unique among the biological disciplines for it denies the hegemony of the adult and sees value indeed more value in the stages that lead up to the fully developed organism It seeks the origin and not merely the maintenance of the body And if embryology is the study of the embryo as seen over time the history of embryology is a second order derivative seeing how the study of embryos changes over time As Jane Oppenheimer pointed out Science like life itself indeed like history itself is a historical phenomenon It can build itself only out of its past Thus there are several ways in which embryology and the history of embryology are similar Each takes a current stage of a developing entity and

seeks to explain the paths that brought it to its present condition Indeed embryology used to be called *Entwicklungsgeschichte* the developmental history of the organism Both embryology and its history interpret the interplay between internal factors and external agents in the causation of new processes and events *Nuclear Forces* Silvan S. Schweber, 2012-06-18 A highly readable account tracing the future Nobel laureate through his formative years and up to the eve of World War II The Wall Street Journal On the fiftieth anniversary of Hiroshima Nobel winning physicist Hans Bethe called on his fellow scientists to stop working on weapons of mass destruction What drove Bethe the head of Theoretical Physics at Los Alamos during the Manhattan Project to renounce the weaponry he had once worked so tirelessly to create That is one of the questions answered by *Nuclear Forces* a riveting biography of Bethe's early life and development as both a scientist and a man of principle As Silvan Schweber follows Bethe from his childhood in Germany to laboratories in Italy and England and on to Cornell University he shows how these differing environments were reflected in the kind of physics Bethe produced Many of the young quantum physicists in the 1930s including Bethe had Jewish roots and Schweber considers how Liberal Judaism in Germany helps explain their remarkable contributions A portrait emerges of a man whose strategy for staying on top of a deeply hierarchical field was to tackle only those problems he knew he could solve Bethe's emotional maturation was shaped by his father and by two women of Jewish background his overly possessive mother and his wife who would later serve as an ethical touchstone during the turbulent years he spent designing nuclear bombs Situating Bethe in the context of the various communities where he worked Schweber provides a full picture of prewar developments in physics that changed the modern world and of a scientist shaped by the unprecedented moral dilemmas those developments in turn created Praise for *Nuclear Forces* Schweber's account of Hans Bethe's life reveals the origins of a charismatic scientist grounded in the importance of his parents and his Jewish roots Schweber recreates the social world that shaped the character of the last of the memorable young scientists who established the field of quantum mechanics Publishers Weekly *Nuclear Forces* is a carefully researched historically and biographically insightful account of the development of a profession and of one of its leading representatives during a century in which physics and physicists played key roles in scientific cultural political and military developments David C Cassidy author of *A Short History of Physics in the American Century*

The Path to the Double Helix Robert Olby, 2013-05-13 Written by a noted historian of science this in depth account traces how Watson and Crick achieved one of science's most dramatic feats their 1953 discovery of the molecular structure of DNA
