Portraits of Discovery George Greenstein, 1998 What fuels the creative fire of genius Is it fierce determination some special quirk of personality or fortuitous coincidence In Portraits of Discovery astronomer and science writer George Greenstein profiles the lives of often brilliant scientists to reveal the sources of their genius He skillfully intertwines the stories of their personal lives and their work showing how devotion to discovery is what gives their lives meaning what animates their days and consoles their nights This is a book full of wonders Greenstein puts us on the scene as Margaret Geller and John Huchra unfold a map of the universe revealing astoundingly large and beautiful images of arcs of galaxies that go off the charts of our imagination He probes the mystery behind Luis Alvarez's discovery that the extinction of the dinosaurs was almost surely caused by Earth's collision with an asteroid the size of Manhattan All along Greenstein offers artfully drawn portraits of the colorful personalities of his subjects the genius and buffoonery of Richard Feynman who developed a new more elegant way to solve physics problems the wit and imagination of the hard drinking Nobel Prize winning George Gamow known for his magic tricks as well as for profound insights into radioactivity and the Big Bang and the exuberance of Ludwig Boltzmann who developed a new vision of the atom despite a mental illness that eventually led to his tragic suicide Powerful social and political forces also enter the picture we learn how women astronomers like Cecilia Payne Gaposchkin and Annie Jump Cannon despite their enormous contributions were deprived of fair pay recognition and even the use of telescopes We see George Gamow and his wife attempting to paddle their way across 170 miles of open sea in a small canoe to escape political oppression in Russia Conversely we hear the story of Luis Alvarez's Cold War inspired testimony against J Robert Oppenheimer which earned Alvarez the everlasting enmity of many of his fellow scientists In the two very different worlds of Martin Perl and Homi Bhabha one in modern industrial
