Knowledge Economy, Development and the Future of Higher Education Michael A. Peters,2007-01-01 Prophetically

almost thirty years ago Jean Fran ois Lyotard forecast the end of the modern research university based on Enlightenment principles He envisaged the emergence of technical institutes in the service of the information rich global multinationals This book reflects on the post war Western university and its discourses charting the crisis of the concept of the modern university First it examines the university within a global networked economy second it adopts poststructuralist perspectives in epistemology politics and ethics to appraise the role of the contemporary university third it introduces the notion of development in a critical fashion as a way of explaining its potentially new regional and international learning roles fourth it analyzes the rise of global science and the disciplines in the context of the global economy and finally it raises Lyotard s logic of performativity and the assessment of research quality within a neoliberal economy linking it firmly to the question of freedom and the republic of science

The New Economy and Economic Growth in Europe and the US David B. Audretsch,Paul J.J. Welfens,2013-06-29 The strong productivity growth of the US and Scandinavian countries in Europe in the 1990s has raised the question whether the ICT sector information and com munication technology that is computers plus telecommunications plus digital services is the new driving engine of high growth in leading OECD countries Judging by the empirical evidence for the US including a new study by McKinsey which gives mixed evidence it is still too early to clearly dismiss Robert G Gordon s hypothesis that the acceleration of US output growth is dis regarding quality problems of price measurement exclusively due to cyclical factors and increased productivity growth in the computer sector The counter hypothesis is associated with research by Stiroh and others who argue that there are positive productivity spillover effects from ICT to other sectors Indeed it is not clear ex ante whether mainly the Old Economy or the so called New Economy stands to benefit most from high innovation rates and strong productivity shifts associated with the spreading of digital services Interestingly the increased eco nomic role of the internet also contributes to the internationalization of the econ omy since more services have become tradable and growing import competition itself could stimulate productivity growth and thus contribute to higher growth If ICT plays a key role in the new economy there are important implications in the differential degree to which Germany and the US have implemented ICT
