and depictions of sculptures chosen by the architect and the author because they are particularly well suited to showing how Calatrava's creative ideas ripen and develop from the initial drawings to the sculptures finally attaining completion in the realised buildings. Santiago Calatrava : works in progress Luca Molinari, Santiago Calatrava, 1999. Santiago Calatrava. With more than ten years having passed since the case of Calatrava was introduced into the international debate it remains as relevant as ever to ask the same questions posed back then regarding an artistic personality and oeuvre still capable of provoking such heated and contradictory reactions from critics, the general public and contemporary architectural culture alike. The extremism of the positions assumed by those faced with Calatrava's work compels us inevitably to investigate a phenomenon that intersects with the redefinition of the relationship between art and technology or more specifically between architecture and engineering, not to mention the crisis of the professions and their social credibility. Santiago Calatrava Santiago Calatrava, Mirko Zardini, Paolo Rosselli, 1996. The works of the Catalan Santiago Calatrava defy classification. Sculpture, architecture, engineering, all are combined in his unique structures. In fact Calatrava is known worldwide for his synthesis of the disciplines. This volume reproduces his secret sketchbook written and illustrated in January and February 1995 which provides insights into his work and into the nature of the relationships between art, architecture and engineering. The sketchbook is a retrospective exploration of the analogies within and connections between Calatrava's buildings and projects. A wealth of material on the elements of human anatomy, on natural and physical forces, on works of art traces Calatrava's oeuvre unencumbered by time, place or function. Explanatory notes link the images on each page to particular projects among the more than twenty-five included are Calatrava's spectacular bridges, those for the Barcelona Olympics and Seville World Expo, movable structures like the 1993 sculpture for New York's Museum of Modern Art, railway stations, roof coverings and telecommunications towers. Santiago Calatrava, 2006 *Creatures from the Mind of the Engineer* Robert Harbison, Santiago Calatrava, 1992
