Walker, 2012-12-06 Where do you begin to look for a recent authoritative article on the diagnosis of management of a particular malignancy The few general oncology textbooks are generally out of date Single papers in specialized journals are informative but seldom comprehensive these are more often preliminary reports on a very limited number of patients Certain general journals frequently publish good in depth reviews of cancer topics and published symposium lectures are often the best overviews available Unfortunately these reviews and supplements appear sporadically and the reader can never be sure when a topic of special interest will be covered Cancer Treatment and Research is a series of authoritative volumes which aim to meet this need It is an attempt to establish a critical mass of oncology literature covering virtually all oncology topics revised frequently to keep the coverage up to date easily available on a single library shelf or by a single personal subscription We have approached the problem in the following fashion First by dividing the oncology literature into specific subdivisions such as lung cancer genitourinary cancer pediatric oncology etc Second by asking eminent authorities in each of these areas to edit a volume on the specific topic on an annual or biannual basis Each topic and tumor type is covered in a volume appearing frequently and predictably discussing current diagnosis staging markers all forms of treatment modalities basic biology and more      Physical Activity and Cancer Kerry S. Courneya, Christine M. Friedenreich, 2010-11-26 This book explores in depth the relation between physical activity and cancer control including primary prevention coping with treatments recovery after treatments long term survivorship secondary prevention and survival The first part of the book presents the most recent research on the impact of physical activity in preventing a range of cancers In the second part the association between physical activity and cancer survivorship is addressed The effects of physical activity on supportive care endpoints e.g quality of life fatigue physical functioning and disease endpoints e.g biomarkers recurrence survival are carefully analyzed In addition the determinants of physical activity in cancer survivors are discussed and behavior change strategies for increasing physical activity in cancer survivors are appraised The final part of the book is devoted to special topics including the relation of physical activity to pediatric cancer survivorship and to palliative cancer care      *Neuro-Oncology of CNS Tumors* Jörg-Christian Tonn, Manfred Westphal, J. T. Rutka, S.A. Grossman, 2005-11-29 Diagnosis and treatment modalities for neuro oncologic diseases have made considerable advances in recent years There is hardly a segment of the field of solid tumours that is experiencing such dynamic development with regard to basic scientific findings and clinical results In the present book the world's leading

experts have compiled the current practice relevant knowledge of neuro oncologic diseases The book s clear structure and the uniform presentation of all chapters make this volume a valuable reference especially for practice oriented activities allowing swift access to information about current treatment standards Hence it will be of great value to both clinicians and researchers *Neuropsychology of Cancer and Oncology* Chad A. Noggle,Raymond S. Dean,2013 Print CourseSmart
