Chinese National Security Decisionmaking Under Stress Andrew Scobell, 2005 If there is one constant in expert analyses of the history of modern China it is the characterization of a country perpetually in the throes of crises While China at the mid point of the Twenty first Century s

first decade is arguably the most secure and stable it has been in more than a century crises continue to emerge with apparent frequency Consequently the study of China's behavior in conditions of tension and stress is of considerable importance to policy makers and analysts around the world China's Longest Campaign Tyrene White, 2018-09-05 In the late 1970s just as China was embarking on a sweeping program of post Mao reforms it also launched a one child campaign This campaign which cut against the grain of rural reforms and childbearing preferences was the culmination of a decade long effort to subject reproduction to state planning Tyrene White here analyzes this great social engineering experiment drawing on more than twenty years of research including fieldwork and interviews with a wide range of family planning officials and rural cadres White explores the origins of China's birth planning approach to population control the implementation of the campaign in rural China strategies of resistance employed by villagers and policy consequences among them infanticide infant abandonment and sex ratio imbalances She also provides the first extensive political analysis of China's massive 1983 sterilization drive The birth planning project was the last and longest of the great mobilization campaigns surviving long after the Deng regime had officially abandoned mass campaigns as instruments of political control Arguing that the campaign had become an indispensable institution of rural governance White shows how the one child campaign mimicked the organizational style and rhythms both of political campaigns and economic production campaigns Against the backdrop of unfolding rural reforms only the campaign method could override obstacles to rural enforcement As reform gradually eroded and transformed patterns of power and authority however even campaigns grew increasingly ineffective paving the way for long overdue reform of the birth planning program *Economic Effects of COVID-19 Related Uncertainty Shocks* Giray Gozgor, Chi Lau, 2021-11-24 *Virus Outbreaks and Tourism Mobility* Sharad Kumar Kulshreshtha, 2021-09-06 Virus Outbreaks and Tourism Mobility Strategies to Counter Global Health Hazards uses innovative and cutting edge research to map out the background and impacts of national regional and international viral outbreaks focusing on new viewpoints to help build effective strategic responses to global health hazards *Consequences of the COVID-19 Pandemic on Care for Neurological Conditions* Cheng-Yang Hsieh, Jordi A. Matias-Guiu, Jesús Porta-Etessam, Sheng-Feng Sung, Tomohisa Nezu, Ricardo F. Allegri, Shen-Yang Lim, Giovanni Assenza, 2022-01-07 **AIDS in Asia** Yichen Lu, Max Essex, 2004-06-01 Asia has become the new battle ground for the war against HIV/AIDS The magnitude of the potential public health problems caused by AIDS in this populous continent may become a catastrophic disaster A 10% rate of prevalence of HIV 1 in India and China alone would mean more than 200 million people are infected with HIV/AIDS in Asia is useful as a comprehensive up to date AIDS reference book for public health and medical professionals This volume provides concrete information on the diagnosis treatment care prevention and impact of AIDS Part I contains Snapshots of HIV/AIDS in Asia Countries and regions included in this section are Thailand India China Japan Vietnam Laos Cambodia Myanmar Malaysia Indonesia the Philippines Pakistan Nepal Sri Lanka Hawaii and the Pacific Islands Hong Kong and Taiwan Part II addresses the molecular

epidemiology of HIV AIDS Part III deals with the diagnosis surveillance and projected scenarios of the AIDS epidemic Part IV outlines prevention efforts and treatment options Part V provides an overview of the ongoing collaborative efforts involved in several different nations in the worldwide war against AIDS This volume will be invaluable to all the public health professionals and researchers working in this field the book is a useful addition to the HIV AIDS literature AIDS in Asia offers a comprehensive interesting overview of the epidemic there and of general issues that will influence its progression Roger Detels MD MS University of California Los Angeles The Journal of the American Medical Association Book Review 293 15

China's Total War Strategy Ryan Clarke,LJ Eads,Robert McCreight,Xiaoxu Sean Lin,2025-07-29 Our human instinct along with the chronicle of human history advises us to take heed to seriously consider what a dilemma really is and what it truly means especially if we embrace the inherent risks and drawbacks involved Dilemmas in geopolitics and global security matters are no less pivotal with several downstream implications that are poorly understood from the standpoint of today looking forward ten years Our ability to pinpoint what tomorrow brings in geostrategic terms is severely limited despite ongoing leadership hubris and pervasive expert assurances that few crises embedded in the future might surprise us To readily admit there are uncertainties that estimates are best guesses and that firm predictions cannot rule out unexpected anomalies is critical Few professional or armchair pundits would argue with the notion that often we just do not know what we do not know So it is with the decade after 2025 and the central challenge for nations such as the United States and China What is likely to happen when and why We must note that dilemmas are generally defined as a situation in which a difficult choice has to be made between two or more alternatives featuring most often equally undesirable ones with uncertain outcomes This insightful definition equips us to conditionally set the stage for examining the presumptive geopolitical trajectory of China after 2025 Why conditionally Most assuredly because we cannot fathom or estimate in 2024 all the unforeseen crises wildcards and variables which could influence or trigger China s leadership to act or refrain from doing so during the decade beginning in 2025 This is also cloaked in the parallel assumption that the future geostrategic trajectory of the United States is both well known and predictable The decade after 2025 will be of primary significance for China and its Chinese Communist Party CCP leadership team Numerous theories and assessments by experts and seasoned observers will be offered to explain this landmark decade for the CCP and filter into the analysis China s fragmented and covertly conflicted population How many of its leaders want to retain an ironclad CCP control over all aspects of life in China for decades to come and can they do so Instead consider how many millions of Chinese citizens yearn instead during this new decade for a unique form of democratic revolt with Chinese characteristics starting right now So a paramount dilemma for China its leaders and its people is what dilemmas will unfold and manifest during the decade starting in 2025 Dilemmas abound for the CCP and China itself One such dilemma is rooted in the military dimension of the CCP and the global security paradigm which China favors for itself

Sutter,2005-04-14 China s rapid military and economic growth has fuelled a steady stream of analysis and debate about the PRC s motivations and objectives regarding the United States Yet until now there has not been a sustained single authored assessment in English of China s expanding influence in Asia in the post Cold War period Respected analyst Robert G Sutter draws on his extensive experience in the region to explore the current debate on China s rise and its meaning for U S interests by examining in detail China s current and historical relations with the key countries of Asia He finds a range of motivations underlying China s recent initiatives Some incline Chinese policy to be cooperative with the United States others to be competitive and confrontational Sutter s nuanced study shows that U S power and influence continue to dominate Asia and play a critical role in determining China s cooperative or confrontational approach He argues that the Bush administration s policies of firmness and cooperation have encouraged China to stay on a generally constructive track in the region *Creativity and Innovation in Times of Crisis (COVID-19)* Roni Reiter-Palmon,Min Tang,Zorana Ivcevic,2022-04-06 *Research Advances of Tuberculosis Vaccine and its Implication on COVID-19* Wenping Gong,Ashok Aspatwar,Jianping Xie ,Hao Li,2024-07-22 Tuberculosis TB is a global infectious disease caused by the Mycobacterium tuberculosis complex The number of deaths caused by TB is second only to COVID 19 Therefore vaccination plays an essential role in the prevention and control of TB However the efficacy of currently licensed TB vaccine bacilli Calmette Gu rin BCG varies from 0% 80% in adults and the protection only lasts for 10 15 years Thus there is an urgent need to develop advanced TB vaccines against TB infections
