**IT'S ALL OUT WAR     The Evolution of Special Forces in Counter-Terrorism** J. Paul D. Taillon, 2001 The threat of terrorism knows no borders and given the complexities of today's global system no nation can afford to stand alone This study considers the role that international cooperation plays in assisting elite military forces engaged in low intensity and counter terrorist operations particularly hostage rescue efforts Using historical examples from the experiences of Great Britain and the United States the author concludes that cooperation ranging from shared intelligence to forward base access to the provision of observers can provide significant advantages in dealing with low intensity operations However the most fruitful joint efforts involve shared activities by countries that possess a similar threat perception usually in part a result of a common sociology in their view of historical developments Before turning to modern counter terrorism Taillon addresses the respective military experiences of Britain and America within the wider realm of conventional and low intensity operations The main Anglo American focus of the book gives primary importance to the developments and doctrine for the employment of special forces as well as an analysis of more recent low intensity and counter terrorism operations such as the 1980 Iranian embassy siege in London and the failure that same year of the American hostage rescue attempt in Teheran Taillon hopes to identify and highlight those key aspects of cooperation at an international level which have at least in part been absolutely essential to successful counter terrorist operations in the past and which seem destined to remain so in the future

Secrecy and the Media Nicholas John Wilkinson, 2009-05-28 Secrecy and the Media is the first book to examine the development of the D Notice system which regulates the UK media's publication of British national security secrets It is based on official documents many of which have not previously been available to a general audience as well as on media sources From Victorian times British governments have consistently seen the need in the public interest to prevent the media publishing secret information which would endanger national security The UK media have meanwhile continuously resisted official attempts to impose any form of censorship arguing that a free press is in the public interest Both sides have normally seen the pitfalls of attempting to resolve this sometimes acrimonious conflict of interests by litigation and have together evolved a system of editorial self regulation assisted by day to day independent expert advice known colloquially as the D Notice System The book traces the development of this system from nineteenth century colonial campaigns through two world wars to modern operations and counter terrorism in the post Cold War era up to the beginning of the Labour government in 1997 Examples are drawn from media political and official sources some not yet open and cover not only defence issues including Special Forces but also the activities of the secret intelligence services MI5 MI6 and GCHQ These cases relate principally to the UK but also to American and other allies interests The story of how this sometimes controversial institution now operates in the modern world will be essential reading for those in the media and government departments and for academics and students in the fields of security defence and intelligence as well as being an accessible exposé for the general reader Nicholas Wilkinson served in the Royal Navy 1959-98 and from 1999 to 2004 he ran the independent Defence Press and Broadcasting Advisory Committee He was a Press Complaints Commissioner from 2005 to 2008 and is a Cabinet Office
