a number of implications for future operations Although new technology such as mini and micro unmanned aerial vehicles may make it easier to teams to reconnoiter wide areas using SOF in this fashion is unlikely to achieve U S objectives Concerns about casualties and prisoners of war are likely to limit the use of SOF to the most vital national interests However unattended ground sensors could play an enhanced role in future operations Although most will be delivered by air some will require hand emplacement in difficult enemy terrain a mission well suited to SOF SOF in a battle damage assessment role could help ensure that critical targets have been destroyed Finally SOF might disable destroy or recover nuclear biological or chemical weapons
