equation which was the first instance of a chaotic solution obtained from a deterministic equation in a dissipative system This first occurrence occurred after a significant amount of research had been conducted Period Three Implies Chaos 1975 written by Tienyien Li and James A Yorke is noteworthy for being the first publication to use the term chaos to characterize this phenomenon In 1976 Robert M May made the first suggestion for the Logistic map in an article Five years later in 1978 M J Feigenbaum conducted significant research on the topic and proposed that it be applied to all situations equally Ever since then there has been a significant advancement in the chaotic systems Chaos systems are characterized by a number of characteristics including aperiodicity nonlinearity sensitivity to initial conditions and so on These systems are both complex and dynamic The unexpected and difficult to control intricate behavior of chaotic systems has made them a popular topic in the field of nonlinear dynamics research that is now being conducted

**Integrated Terrestrial and Non-Terrestrial Networks** Muhammad Ali Jamshed, Ali Nauman, 2024-09-27 This book aims to address a wide range of topics in wireless satellite communications to tackle the issues related to the integration of terrestrial networks TN with non terrestrial networks NTN In Release 17 the third generation partnership project 3GPP proposed the standardization of NTN to allow 5G based TN to support NTN According

to Release 17 the NTN will consist of satellites with unmanned aerial vehicles UAVs and high altitude platforms HAPs regarded as specific use cases of NTN Similar to the Global Positioning System GPS signals based on NTN are unable to provide indoor coverage as these signals are attenuated and scattered by roofs walls etc Moreover power and delay are critical factors that restrict a cellular enabled mobile handset from achieving reliability seamless coverage and low latency while relying on NTN This book has brought together multidisciplinary contributors in the field of wireless satellite communications to identify and present technical challenges and recent results related to the design of energy efficient delay tolerant and enhanced coverage based integrated TN and NTN Given that challenges and future aspects are also considered the book covers a wide variety of subject categories and would therefore benefit a larger readership in the scientific community
