Water and fire Daniel Anlezark, 2021-06-15 Noah's Flood is one of the Bible's most popular stories and flood myths survive in many cultures today This book presents the first comprehensive examination of the incorporation of the Flood myth into the Anglo Saxon imagination Focusing on literary representations it contributes to our understanding of how Christian Anglo Saxons perceived their place in the cosmos For them history unfolded between the primeval Deluge and a future perhaps imminent flood of fire which would destroy the world This study reveals both an imaginative diversity and shared interpretations of the Flood myth Anglo Saxons saw the Flood as a climactic event in God's ongoing war with his more rebellious creatures but they also perceived the mystery of redemption through baptism Anlezark studies a range of texts against their historical background and discusses shifting emphases in the way the Flood was interpreted for diverse audiences The book concludes with a discussion of *Beowulf* relating the epic poem's presentation of the Flood myth to that of other Anglo Saxon texts

Communities in Vergil's Aeneid Cultural Memory Identity and Ideology presents a new examination of memory ethnic identity and politics within the fictional world of this Roman epic drawing previously unexplored connections between Vergil's characters settings and narrative and the political context of the early Roman Empire This book investigates how the Aeneid's fictive ethnic communities the Trojans Carthaginians Latins and Arcadians who populate its poetic world are shown to have identities myths and cultural memories of their own And much like their real-life Roman counterparts they engage in the politics of the past in such contexts as royal iconography diplomacy public displays and incitements to war Where previous studies of identity and memory in the Aeneid have focused on the poem's constructions of Roman identity Constructing Communities turns the spotlight onto the characters themselves to show how the world inside the poem is replicating as if in miniature real forms of contemporary political and cultural discourse reflecting an historical milieu where appeals to Roman identity were vigorously asserted in political rhetoric The book applies this evidence to a broad literary analysis of the Aeneid as well as a reevaluation of its engagement with Roman imperial ideology in the Age of Augustus
