**Only Connect** John K.G. Shearman, 2023-10-17 A leading art historian's plea for a more engaged reading of Italian Renaissance art Only Connect constructs a history of Renaissance paintings and sculptures that are by design completed outside themselves by the spectator that draw the spectator into their narrative plot or aesthetic functioning and that reposition the spectator imaginatively or in time and space John Shearman's concern is mostly with anterior relationships with the viewer that is relationships conceived and constructed as part of a work's design making and positioning He proposes unconventional ways in which works of art may be distinguished from one another and in which spectators may be distinguished as well and enlarges the accepted field of artistic invention Only Connect challenges us to recognize the presuppositions of Renaissance artists about their viewers shining a light on the process of discovery by some of the most inventive and intellectual artists of the period

**River of Blood** J. M. Schoffeleers, 1992 The culmination of years of fieldwork in southern Malawi River of Blood reconstructs the beginnings of the Mbona martyr cult follows its history to the present day and reveals the fascinating intersections of an indigenous belief system with European Christianity In the cult of Mbona the central African mythology of the snake that is beheaded to make the rains come has been combined with a more spiritual interpretation the snake has been transformed into a human martyr and redeemer According to the cult the rainmaker Mbona was tracked down by his enemies they cut off his head and his blood formed the River of Blood Mbona returned as a storm wind and asked that a shrine be dedicated in his name J Matthew Schoffeleers recounts how the Portuguese presence in Zambezia in the period 1590-1622 led to more than three decades of internecine warfare and caused the people of southern Malawi tremendous suffering In response to this political oppression and social upheaval Schoffeleers shows the people looked to Mbona their black Jesus for redemption Beyond reconstructing the cult's genesis Schoffeleers traces its recent history particularly in political context He provides texts of seven cult myths from different historical periods in both Chimanga and English His analysis presents the Mbona myth as a continuous social construction and deconstruction Emphasizing the impact of political and spiritual oppression on the cult he distinguishes between the differing versions of the myth preserved by the aristocracy and by the commonalty and demonstrates how these disparate views unite to preserve historical information In so doing he shows that cults serve as valuable repositories for historical information

Practices of Projection Gabriel Menotti, Virginia Crisp, 2020 To many the technological aspects of projection often go unnoticed only brought to attention during moments of crisis or malfunction For example when a movie theater projector falters the audience suddenly looks toward the back of the theater to see a sign of mechanical failure The history of cinema similarly shows that the attention to projection has been most focused when the whole medium is hanging in suspension During Hollywood's economic consolidation in the 30s projection defined the ways that sync sound technologies could be deployed within the medium Most recently the digitization of cinema repeated this process as technology was reworked to facilitate mobility These examples show how projection continually speaks to the rearrangement of media technology Projection therefore needs to be examined as a pivotal element in the future of visual media's technological transition In Practices of Projection Histories and Technologies volume editors Gabriel Menotti and Virginia Crisp address the cultural and technological significance of projection Throughout the volume chapters reiterate that projection cannot and must not be reduced to its cinematic functions alone Borrowing media theorist Siegfried Zielinski's definition Menotti and Crisp refer to projection as the heterogeneous array of artefacts technical systems and particularly visual praxes of experimentation and of culture From this readers can understand the performative character of the moving image and the labor of the different actors involved in the utterance of the film text Projection is not the same everywhere nor equal all the time Its systems are in permanent interaction with environmental circumstances neighboring structures local cultures and social economies Thus the idea of projection as a universal fully autonomous operation cannot hold Each occurrence of projection adds nuance to a wider understanding of film screening technologies
