Savage Money The Anthropology And Politics Of Commodity Exchange:

Savage Money Chris A. Gregory, 1997 The deeper philosophical meaning of value is examined in this thought provoking study of the household values that are associated with agricultural land rural marketing village money lending and the use of diverse forms of money in Central India Gregory anthropology Australian National U uses a comparative approach based on extensive field work in Central India to analyze the values that spring from reciprocally recognized relations of affinity consanguinity and contiguity and to contemplate how these relate to western notions of money and value the savage money of free market capitalism This is a second printing of a 1997 book c Book News Inc **Economics, Anthropology and the Origin of Money as a Bargaining Counter** Patrick Spread, 2022-12-29 For many decades economists have disputed with economic anthropologists over the origins of money Economists claim that money emerged from barter exchange anthropologists claim that it originated as a unit of account in the temples and palaces of ancient Mesopotamia This book argues that money originated as a bargaining counter in a system of money bargaining emerging almost seamlessly from barter bargaining This is not the money of mainstream economic conception a veil cast over a system of resource allocation defined in mathematical terms Confidence in the bargaining counter is sustained through support bargaining a process in which individuals seek the support of their associates but seek at the same time to advance their own interests A comprehensive Introduction to Support Bargaining and Money Bargaining is provided by the work The arrival of coin money is recognised by many as a crucial event in the history of mankind and it is argued here that the distinctive character of support bargaining in ancient Greek city states made possible the introduction of coin money The dependence of coin money on a particular form of support bargaining also suggests the reason why coin money was not introduced much earlier given that the technology for producing coins was available long before their adoption This book will be of great interest to researchers in the history and origins of money banking and economic theory more broadly **Ethnographies of Moral Reasoning** K. Sykes, 2008-12-22 Rather than measure the actions of their subjects by reference to either universal rationality or cultural relativism contributors in this volume describe ordinary people as they value human relationships and reason through the commonplace contradictions of their local way of life in a global age **Wealth Management and Investment in Islamic Settings** Toseef Azid, Murniati Mukhlisin, Othman Altwijry, 2022-09-29 This book addresses the theory practices challenges key issues and potential future policies concerning investment and wealth management in connection with Islamic finance There is a noted scarcity of literature on Islamic approaches towards wealth management from a jurisprudential perspective and so this book aims to address this lacuna in available literature It demonstrates strategies for wealth management in keeping with the Qur'an and Sunnah posing questions relating to interest and investment and proposing financial models for benefiting the poorer segments of society while simultaneously satisfying economic necessities in keeping with Islamic law Given its breadth of scope combining perspectives from scholars and practitioners with extensive

experience in the banking and finance sector from different Islamic settings including Malaysia Saudi Arabia Sri Lanka Brunei and Indonesia this edited volume will benefit practitioners researchers and graduate students studying finance economics and business management in an Islamic context *Androgynous Objects* Maureen A. MacKenzie,2019-01-25

Androgynous Objects explores the way meaning is encoded in material culture by focusing on the androgynous symbolism of the looped string bag or bilum of the Telefol people of Central New Guinea The web of meanings woven into the bag is shown to extend beyond women s lives and bodies It is open to manipulation and reformation in a variety of contexts and is used by both Telefol women and men to explore and so explain the complexities and ambiguities inherent in their social life The Magical Body Richard Eves,2014-01-09

An intriguing exploration of the role and significance of the body in the world of a Pacific Islands People the Lelet of New Ireland Papua New Guinea In vivid ethnographic detail the monograph captures the fluidity and complexity of Lelet conceptions of corporeality and their significance to identity as they encounter the influences of modernity in the form of colonialism Christianity and cash cropping The author examines the importance of the body to constructions of identity and difference and its role in the constitution of place and space The book provides a richly detailed ethnographic study of magical belief and the body whilst paying particular attention to the polyvalent meanings of bodily images and metaphors as they are used in numerous contexts of magic *FairEconomy* Wolfgang Fikentscher,Philipp Hacker,Rupprecht Podszun,2013-03-14

FairEconomy is a concept for a free and fair market economy In response to the financial and economic crises of the past years the authors develop fundamental ideas of how a market economy works what rules markets need and who safeguards fairness and equal opportunity in such an economy The book sets out the design of a sustainable market order Going back to the very roots of doing business it offers a fascinating insight into the cultural and anthropological premises of the market economy Fairness and free competition can be identified as key elements of successful markets sometimes neglected in politics and business Legal rules need to ensure that fairness and economic freedom work The same holds true for the relationship of risk and liability that has been overlooked in the banking sector The ideas of a *FairEconomy* sketched in this book are fit to become a reality The authors point to institutions and mechanisms that could integrate the concept into global law They place their trust less upon ever larger institutions and more on private entitlement and enforcement at the global regional and local levels Traders in Motion Kirsten W. Endres,Ann Marie Leshkovich,2018-06-15

Markets and traders in Vietnam are on the move literally and figuratively The chapters in this volume offer rich ethnographic exploration of daily interactions among small scale traders suppliers customers family members neighbors and officials within contemporary Vietnam and across its borders Subaltern Sovereigns Peter Berger,2023-05-08

The vast and ancient topic of kingship in India has mostly been studied from the perspectives of rulers and other elites But what constitutes sovereignty viewed from below This book ethnographic and comparative in its essence deals with indigenous conceptualizations of sovereignty taking as its starting point a local proverb that connects the ritual

Dasara of the king with festivals performed by his tribal subjects The first part of the book initially introduces some pan Indian ideas of kingship and proceeds to discuss indigenous notions of sovereignty as represented in rituals and myths in the region concerned highland Odisha The second part is devoted to the investigation of the proverbial performances Mainly based on historical sources first the Dasara festival of the king is discussed subsequently the indigenous rituals are described and analyzed which the author ethnographically documented around the turn of the millennium Ultimately the proverb and the rituals constitute the idea of a sacrificial polity in which rulers and ruled share sovereignty in the sense that they are co responsible for the flow of life *Faith and the Pursuit of Health* Jessica Hardin,2018-10-26 Salvation and metabolism

Amazonian Ecuador Michael Uzendoski,2010-10-01 Michael Uzendoski s theoretically informed work analyzes value from the perspective of the Napo Runa people of the Amazonian Ecuador Based upon historical and archival research as well as the author s years of fieldwork in indigenous communities The Napo Runa of Amazonian Ecuador presents theoretical issues of value poetics and kinship as linked to the author s intersubjective experiences in Napo Runa culture Drawing on insights from the theory of gift and value Uzendoski argues that Napo Runa culture personifies value by transforming things into people through a process of subordinating them to human relationships While many traditional exchange models treat the production of things as inconsequential the Napo Runa understand production to involve a relationship with natural beings plants animals and spirits of the forest that they believe share spiritual substance or samai Value is the outcome of a complicated poetics of transformation by which things and persons are woven into kinship forms that define daily social and ritual life **The Hard People** Patrick Heady,2013-12-19 Heady draws on both participant observation and interviews with older informants to trace the effects of recent exogenous technological and institutional changes and the way local people have responded to them His findings relate to such themes of recent history as nationalism regionalism and anti clericalism and contribute to the theoretical debate on the relevance of structuralist anthropology to European societies

Unstructuring Chinese Society Allen Chun,2004-08-02 Unstructuring Chinese Society is a culmination of long term field work and archival research that challenges existing theories of social organisation and cultural change The book makes new sense of historical contradictions political conflicts and deep seated social transformations that have underlined the experience of colonial rule and the practices of local institutions in Hong Kong over the past century By focusing on the ongoing interactions of discourse practices and global local relations in cultural terms Unstructuring Chinese Society puts forth a fresh perspective in the field of historical anthropology while addressing ongoing critical concerns in postcolonial theory and our understanding of tradition and modernity *Fear and Fortune* Mette M. High,2017-05-09 Mongolia over the last decade has seen a substantial and ongoing gold rush The widespread mining of gold looks at first glance to be a blessing

for a desperately poor and largely pastoralist country where people's lives were disrupted by the end of the USSR and tens of millions of livestock were killed in devastating droughts in the early 2000s. Volatility and uncertainty as well as political and economic turmoil led many people to join the hopeful search for gold. This activity born out of uncertain times poses an intense moral problem in the land of dust: disturbing the ground and extracting the precious metal is widely believed to have calamitous consequences. With gold retaining strong ties to the landscape and its many spirit beings, the fortune of the precious metal is inseparable from the fears that surround mining. Tracing the continuities and discontinuities between human and nonhuman worlds, Mette M. High follows the paths of gold as it is excavated and converted into polluted money entering local shops and Buddhist monasteries, joining the illegal gold trade and returning as renewed money for the big bosses of the gold mines. High has done several years of fieldwork in Mongolia, spending time with the ninjas as the miners are known locally, as well as the people who disapprove of their illegal activities and warn of the retribution that the land and its inhabitants may suffer as a result. This book is about radical change or, as many Mongolians put it, when life becomes strange and chaotic. High has gained a deep understanding of the processes by which Mongolians square a morally questionable activity with the lure of profit. How do they involve themselves with tainted sources of money and can it ever be cleansed and made usable? Addressing how our lives and those of others are intimately intertwined, *Fear and Fortune* offers an expansive and capacious approach to understanding the high stakes involved in human economic life.

Arabian Seas 1700 - 1763 Rene Barendse, 2009-10-26 The Western Indian Ocean in the Eighteenth Century is the first of four volumes offering a sweeping panorama of the Arabian Seas during the early modern period. Focusing on the period 1700-1763, the first volume concentrates on daily life in littoral societies, examining long-term issues including climatic change, famine, and the structures of fishing communities. The volume examines littoral societies in each of the major coastal areas of the Western Indian Ocean: East Africa, the Red Sea, the Persian Gulf, and its traditional ties to surrounding hinterlands, as well as to the west coast of India. While having particular interest to readers concerned with Indian Ocean history as an absorbing and innovative account of a much neglected, albeit critical, area and period, *Arabian Seas 1700-1763* will be of great interest to anyone interested in early modern maritime social or economic history.

Kings, Gangsters, and Companies volume two of *Arabian Seas 1700-1763* focuses on European relations with the major states and societies of the Western Indian Ocean during the eighteenth century. As such, it traces the major structural changes in African, South Asian, and Middle Eastern societies during this period. Chapters examine European communities and their relations with the societies of the Indian Ocean basin, the daily life of European soldiers and merchants, relations with Indian women, European views on the Indian caste system, as well as the governmental systems they encountered. The volume also details the importance of Indian and Persian merchant communities in the Indian Ocean trading system and the impact of war on the economic development of this system during the eighteenth century.

Men and Merchandise the third volume of *Arabian Seas 1700-1763* provides a

detailed examination of the economic and social structures in the Western Indian Ocean focusing on key commodities like bullion textiles and the slave trade Readers will also encounter interesting vignettes of daily life an Indian nautch girl worried about her inheritance a Portuguese gangster friar and pariah workers the infamous buccaneers of Madagascar coffee traders from Yemen Cairo and the Crimea and Iraqi and Iranian bankers who all had relevance to this vast economic system Men and Merchandise provides insights into other traditionally ignored aspects in the traditional historiography including uprisings aboard slave ships and details of maroon societies involving refugee slaves in India and Mauritius as well as Dutch slave soldiers in the Persian Gulf As such it will prove of great interest to any reader concerned with the social and economic history of the Indian Ocean basin Europe in Asia the fourth volume and final volume in Arabian Seas 1700 1763 details the early phase of European territorial empire building in the western Indian Ocean basin Particular attention is given to the much neglected history of the Portuguese Estado da India and the attempts of the Portuguese Crown to reform its administration and dwindling possessions in the eighteenth century The volume examines the direct legacies of the longstanding Portuguese imperial presence in the Arabian Seas including the experiences of Indian Catholic communities as well as the establishment of Indian settlements and communities in East Africa Finally the volume provides an exhaustive treatment of the structures and history of the Dutch East India Company VOC and English East India Company EIC the establishment of the vast private co

Marginal Gains Jane I. Guyer,2004-03 In America almost all the money in circulation passes through financial institutions every day But in Nigeria s cash and carry system 90 percent of the currency never comes back to a bank after it s issued What happens when two such radically different economies meet and mingle as they have for centuries in Atlantic Africa The answer is a rich diversity of economic practices responsive to both local and global circumstances In *Marginal Gains* Jane I

Guyer explores and explains these often bewildering practices including trade with coastal capitalism and across indigenous currency zones and within the modern popular economy Drawing on a wide range of evidence Guyer demonstrates that the region shares a coherent if loosely knit commercial culture She shows how that culture actually works in daily practice addressing both its differing scales of value and the many settings in which it operates from crisis conditions to ordinary household budgets The result is a landmark study that reveals not just how popular economic systems work in Africa but possibly elsewhere in the Third World

Money and Power in Anglo-Saxon England Rory Naismith,2011-10-06 This groundbreaking study of coinage in early medieval England is the first to take account of the very significant additions to the corpus of southern English coins discovered in recent years and to situate this evidence within the wider historical context of Anglo Saxon England and its continental neighbours Its nine chapters integrate historical and numismatic research to explore who made early medieval coinage who used it and why The currency emerges as a significant resource accessible across society and through analysis of its production circulation and use the author shows that control over coinage could be a major asset This control was guided as much by ideology as by economics and embraced several levels of power from kings down to individual craftsmen Thematic in approach this innovative book offers an engaging wide ranging account of Anglo Saxon coinage as a unique and revealing gauge for the interaction of society economy and government

Globalism, Nationalism, Tribalism Paul James,2006-04-20 Paul James has written a magnificent account of the world s current condition one that highlights the complexities and contradictions with which people communities and nations must contend and that does so in a compelling and creative style Stressing the interaction between global and local forces his writing style is lively and compelling as well as peppered with a wide range of citations from Woman s Day to the Cambodian Daily on the same page James N Rosenau University Professor of International Affairs The George Washington University Globalism Nationalism Tribalism establishes a new basis for understanding the changing nature of polity and community and offers unprecedented attention to these dominant trends Paul James charts the contradictions and tensions we all encounter in an era of increasing globalization from genocide and terrorism to television and finance capital Globalism is treated as an uneven and layered process of spatial expansion not simply one of disorder fragmentation or rupture Nor is it simply a force of homogenization Nationalism is taken seriously as a continuing and important formation of contemporary identity and politics James rewrites the modernism theories of the nation state without devolving into the postmodernist assertion that all is invention or surface gloss Tribalism is given the attention it has long warranted and is analyzed as a continuing and changing formation of social life from the villages of Rwanda to the cities of the West Theoretically adept and powerfully argued this is the first comprehensive analysis that brings these crucial themes of contemporary life together
