Savages And Naturals

Georges Louis Le Clerc (comte de Buffon.)

Savages And Naturals:

Savages, Romans, and Despots Robert Launay, 2018-10-12 From the sixteenth to the eighteenth centuries Europeans struggled to understand their identity in the same way we do as individuals by comparing themselves to others In *Savages Romans and Despots* Robert Launay takes us on a fascinating tour of early modern and modern history in an attempt to untangle how various depictions of foreign cultures and civilizations saturated debates about religion morality politics and art Beginning with Mandeville and Montaigne and working through Montesquieu Diderot Gibbon Herder and others Launay traces how Europeans both admired and disdained unfamiliar societies in their attempts to work through the inner conflicts of their own social worlds Some of these writers drew caricatures of savages Oriental despots and ancient Greeks and Romans Others earnestly attempted to understand them But throughout this history comparative thinking opened a space for critical reflection At its worst such space could give rise to a sense of European superiority At its best however it could prompt awareness of the value of other ways of being in the world Launay s masterful survey of some of the Western tradition s finest minds offers a keen exploration of the genesis of the notion of civilization as well as an engaging portrait of the promises and perils of cross cultural comparison

archipelago that mammals in Southeast Asia are more advanced than their Australian cousins His suggestion was that the
two continents had split before the better adapted mammals had evolved in Asia The isolated Australian marsupials were
able to thrive whilst those in Asia were driven to extinction by competition from more advanced mammals This led to his

outlines some of his ideas relating to evolutionary theory Alfred Russel Wallace was born on 8th January 1823 in the village
of Llanbadoc in Monmouthshire Wales Wallace was inspired by the travelling naturalists of the day and decided to begin his
exploration career collecting specimens in the Amazon rainforest He explored the Rio Negra for four years making notes on
the peoples and languages he encountered as well as the geography flora and fauna While travelling Wallace refined his
thoughts about evolution and in 1858 he outlined his theory of natural selection in an article he sent to Charles Darwin
