to glean A Passion for Birds Mark V. Barrow, Jr.,2021-08-10 In the decades following the Civil War as industrialization urbanization and economic expansion increasingly reshaped the landscape many Americans began seeking adventure and aesthetic gratification through avian pursuits By the turn of the century hundreds of thousands of middle and upper class devotees were rushing to join Audubon societies purchase field guides and keep records of the species they encountered in the wild Mark Barrow vividly reconstructs this story not only through the experiences of birdwatchers collectors conservationists and taxidermists but also through those of a relatively new breed of bird enthusiast the technically oriented ornithologist In exploring how ornithologists struggled to forge a discipline and profession amidst an explosion of popular interest in natural history A Passion for Birds provides the first book length history of American ornithology from the death of John James Audubon to the Second World War Barrow shows how efforts to form a scientific community distinct from popular birders met with only partial success The founding of the American Ornithologists Union in 1883 and the subsequent expansion of formal educational and employment opportunities in ornithology marked important milestones in this campaign Yet by the middle of the twentieth century when ornithology had finally achieved the status of a modern profession its practitioners remained dependent on the services of birdwatchers and other amateur enthusiasts Environmental issues also loom large in Barrow s account as he traces areas of both cooperation and conflict between ornithologists and wildlife conservationists Recounting a colorful story based on the interactions among a wide variety of bird lovers this book will interest historians of science environmental historians ornithologists birdwatchers and anyone curious about the historical roots of today s birding boom **Birds of empire, birds of nation : a history of science, economy, and conservation in United States-Colombia relations**

The Nature Study Movement Kevin C. Armitage, 2009 The first comprehensive history of the nature study movement and its significance to American environmental thought and politics Argues that nature study advocates through their systematic program or educating children about nature formed a critical foundation for the launching of the conservation movement *Rosalie Edge, Hawk of Mercy* Dyana Z.

Furmansky, 2010-09-28 Rosalie Edge 1877 1962 was the first American woman to achieve national renown as a conservationist Dyana Z Furmansky draws on Edge s personal papers and on interviews with family members and associates to portray an implacable indomitable personality whose activism earned her the names Joan of Arc and hellcat A progressive

New York socialite and veteran suffragist Edge did not join the conservation movement until her early fifties. Nonetheless, her legacy of achievements called widespread and monumental by the New Yorker forms a crucial link between the eras defined by John Muir and Rachel Carson. An early voice against the indiscriminate use of toxins and pesticides, Edge reported evidence about the dangers of DDT fourteen years before Carson's *Silent Spring* was published. Today, Edge is most widely remembered for establishing Hawk Mountain Sanctuary, the world's first refuge for birds of prey. Founded in 1934 and located in eastern Pennsylvania, Hawk Mountain was cited in *Silent Spring* as an especially significant source of data. In 1930, Edge formed the militant Emergency Conservation Committee, which not only railed against the complacency of the Bureau of Biological Survey, Audubon Society, U.S. Forest Service, and other stewardship organizations but also exposed the complicity of some in the squandering of our natural heritage. Edge played key roles in the establishment of Olympic and Kings Canyon National Parks and the expansion of Yosemite and Sequoia National Parks. Filled with new insights into a tumultuous period in American conservation, this is the life story of an unforgettable individual whose work influenced the first generation of environmentalists, including the founders of the Wilderness Society, Nature Conservancy, and Environmental Defense Fund.

Poetry After Cultural Studies Heidi R. Bean, Mike Chasar, 2011-10-26. Poetry after Cultural Studies elucidates the potential of poetry scholarship when joined with cultural studies. In eight searching essays covering an astonishing range of poetic practices, geographical regions, and methodological approaches, this volume reflects on what poetry can accomplish in the broadest social and cultural contexts. From Depression-era Iowa to the postcolonial landscape of French-speaking Martinique, whether appearing in newspapers, correspondences, birders' field guides, cross-stitches, or television, and the internet, the poetry under consideration here is rarely a private lyrical endeavor. For a great number of people writing, reading, publishing, and using poetry over the past 150 years, verse has not been a retreat from modern life but a way of engaging with and even changing it. Whether the subject is postcards, talk shows, or verse from places as different as academia and MySpace, as cultural production and as literary trickery, the material examined in this volume demonstrates the central role of poetry as an active cultural presence. By bringing together cultural studies, poetics, and formalist reading without antagonism, Poetry after Cultural Studies looks toward a poetry criticism that does not merely do cultural studies but rather employs the resources of that discipline to examine an increasingly legible and audible record of poetic practice. Exploring a wide range of poetry from the nineteenth century to the present, Poetry after Cultural Studies showcases the unexpectedly rich intersection of cultural studies theory and current poetry scholarship.

These essays show forcefully that cultural studies and poetics once thought incommensurable in fact are mutually informative and richer for the effort
