Michael Kittross, 2001-11-01 Since its initial publication in 1978 *Stay Tuned* has been recognized as the most comprehensive and useful single volume history of American broadcasting and electronic media available. This third edition has been thoroughly revised and updated to bring the story of American broadcasting forward to the 21st century, affording readers not only the history of the most important and pervasive institution affecting our society but also providing a contextual transition to the Internet and other modern media. The enthusiasm of authors Christopher H. Sterling and John Michael Kittross is apparent as they lead readers through the development of American electronic mass media from the first electrical communication telegraph and telephone through radio and television to the present convergence of media business entities, programming, and delivery systems including the Internet. Their presentation is engaging as well as informative, promoting an interest in history and making the connections between the developments of yesterday and the industry of today. Features of this third edition include chronological and topical tables of contents, new material reflecting modern research in the field, a new chapter describing historical developments from 1988 through to the current day, an expanded bibliography including Web site and museum listings, an updated and expanded glossary and chronology, and extensive statistical data of the development of television and radio stations, networks, advertising, programming, audiences, and other aspects of broadcasting. Designed for use in undergraduate and graduate courses on the history of American mass media broadcasting and electronic media, *Stay Tuned* also fits well into mass communication survey courses as an introduction to electronic media topics. As a chronicle of American broadcasting, this volume is also engaging reading for anyone interested in old radio, early television, and the origins and development of American broadcasting.

Post-Jungian Psychology and the Short Stories of Ray Bradbury and Kurt Vonnegut Steve Gronert Ellerhoff, 2016-02-22 In this book Steve Gronert Ellerhoff explores short stories by Ray Bradbury and Kurt Vonnegut written between 1943 and 1968 with a post-Jungian approach. Drawing upon archetypal theories of myth from Joseph Campbell, James Hillman, and their forbearer C. G. Jung, Ellerhoff demonstrates how short fiction follows archetypal patterns that can illuminate our understanding of the authors, their times, and their culture. In practice, a post-Jungian methodology is shown to yield great insights for the literary criticism of short fiction. Chapters in this volume carefully contextualize and historicize each story, including Bradbury and Vonnegut's earliest and most imaginatively fantastic works. The archetypal constellations shaping Vonnegut's early works are shown to be war and fragmentation, while those in Bradbury's are family and the wholeness of the sun. Analysis is complemented by the explored significance of illustrations that featured alongside the stories in their first publications. By uncovering the ways these popular writers redressed old myths in new tropes and coined new narrative elements for hopes and fears born of their era, the book reveals a fresh method which can be applied to all imaginative short stories, increasing understanding and critical engagement. *Post-Jungian Psychology and the Short Stories of Ray Bradbury and Kurt Vonnegut* is an important text for a number of fields, from Jungian and Post-Jungian studies to short story theories and American studies to Bradbury and Vonnegut studies. Scholars and

students of literature will come away with a renewed appreciation for an archetypal approach to criticism while the book will also be of great interest to practising depth psychologists seeking to incorporate short stories into therapy

Encyclopedia of Radio 3-Volume Set Christopher H. Sterling, 2004-03 Produced in association with the Museum of Broadcast Communications in Chicago the Encyclopedia of Radio includes more than 600 entries covering major countries and regions of the world as well as specific programs and people networks and organizations regulation and policies audience research and radio's technology This encyclopedic work will be the first broadly conceived reference source on a medium that is now nearly eighty years old with essays that provide essential information on the subject as well as comment on the significance of the particular person organization or topic being examined

The Longest Trek Grace Lee Whitney, Jim Denney, 1998 She opened for jazz great Billie Holiday shared the set with Marilyn Monroe and flirted on screen with Jack Lemmon In her dream role Gene Roddenberry beamed her aboard the Starship Enterprise as Yeoman Janice Rand in the original Star Trek series But a terrifying sexual assault on the studio lot and her lifelong feelings of emptiness and isolation would soon combine to turn her starry dream into a nightmare

Late-Life Love: A Memoir Susan Gubar, 2018-11-13 Winning and intelligent An impressive often heartening addition to the literature of aging Heller McAlpin Wall Street Journal In this unique blend of memoir and literary commentary Bookpage acclaimed author and literary scholar Susan Gubar contemplates the beauty and strength of enduring love both for her husband and for the literature that has shaped her life Throughout the complications of devoted caregiving her own ongoing cancer treatments and a stressful move to a more manageable apartment Gubar proves that love and desire have no expiration date on the page or in life Late Life Love offers a resounding retort to ageist stereotypes appraises the obstacles unique to senior couples and celebrates second chances

A Different Universe Robert B Laughlin, 2008-07-31 A Nobel winning physicist argues that fundamental physical laws are found not in the world of atoms but in the macroscopic world around us In this age of superstring theories and Big Bang cosmology we're used to thinking of the unknown as impossibly distant from our everyday lives But in A Different Universe Nobel Laureate Robert Laughlin argues that the scientific frontier is right under our fingers Instead of looking for ultimate theories Laughlin considers the world of emergent properties meaning the properties such as the hardness and shape of a crystal that result from the organization of large numbers of atoms Laughlin shows us how the most fundamental laws of physics are in fact emergent A Different Universe is a truly mind bending book that shows us why everything we think about fundamental physical laws needs to change
