priority of what the Christian tradition calls agape He argues that a proper understanding of agapic love rejects both moral relativism and the comfort of believing that good people cannot be harmed or that God causally necessitates every historical action and event When love is thus disconsolated it neither fears death nor despises life Word(s) Christopher O.

Meszaros, 2016-03-03 In an age of self affirmation and self assertion selfless love can appear as a threat to the lover s personal well being This perception jars with the Biblical promise that we gain our life through losing it and therefore calls for a theological response In conversation with the Protestant theologian Paul Tillich and the atheistic moral philosopher and novelist Iris Murdoch Selfless Love and Human Flourishing in Paul Tillich and Iris Murdoch enquires into the anthropological grounds on which selfless love can be said to build up rather than undermine the lover s self It proposes that while the implausibility of selfless love was furthered by the modern deconstruction of the self both Tillich and Murdoch utilize this very deconstruction towards explicating and restoring the link between selfless love and human flourishing Julia T Meszaros shows that they use the modern diagnosis of the human being s lack of a stable and independent self as manifest in Sartre s existentialism in support of an understanding of the self as relational and fallen This leads them to view a loving orientation away from self and a surrender to the other as critical to the full flourishing of human selfhood In arguing that Tillich and Murdoch defend the link between selfless love and human flourishing through reference to the human being s ontological selflessness Meszaros closely engages S ren Kierkegaard s earlier attempt to keep selfless love and human flourishing in a productive dialectical tension She also examines the breakdown of this tension in the later figures of Anders Nygren Simone Weil and Jean Paul Sartre and addresses the pitfalls of this breakdown Her examination concludes by arguing that the link between selfless love and human flourishing would be strengthened by a more resolute endorsement of a personal God and of the reciprocal nature of selfless love      **The Fire of God's Love** Bob Sorge, 1996-11 This book explores how God is igniting His Bride in this hour with His firey love awakening us to blazing passion for our Beloved Lord Jesus Emerging from the crucible of the firey dealings of God is a Bride who has been purified of all other affections but one her desire for her Beloved the Lord Jesus Look into this furnace of God s love at your own risk It is a fire that consumes all but love Take the time to

come to the passion that blazes on the cross let that love purge you of every defiling desire He intends to capture and possess every part of your being by revealing to you the fire of His love      *The Equation of Love* José Tiberius, 2020-09-01 Love poems and thoughts about relativity of time metaphysics and the Equation of Love Definition and concept of time Gravity and a new theory of everything In this book perspectives of modern science and metaphysics are combined besides the introduction about the relativity of love there are two titles dedicated to time and the Love Equation and gravity respectively In title II the different definitions of time are discussed emphasizing the subjective origin of the concept and the never ending attempts to obtain its common and objective idea There is a brief discussion about the new concept used by the physics science and more thoroughly the personal conception of metaphysical time and the time line as something real and subjective in contrast to the imaginary nature of time in Modern Physics Title III focuses on the Equation of Love Newton s gravity and its interrelations with Modern Physics and in particular with Einstein s equation of the mass energy equivalence In other words the new theory attempts to replace the correct duality of subjective and objective reality in the realm of philosophy separating them from other let s say imaginary realities It is not to say that imaginary realities are completely incorrect but they do not correspond to the standard common and simpler form of the operation of human logic and as a epistemological result of the scientific method
