Bromley, 2013-04-17      *INIS Atomindex*, 1982      **Energy Research Abstracts**, 1984      **Ion Implantation: Equipment and Techniques** H. Ryssel, H. Glawischnig, 2012-12-06 The Fourth International Conference on Ion Implantation Equipment and Techniques was held at the Convention Center in Berchtesgaden Bavaria Germany from September 13 to 17 1982 It was attended by more than 200 participants from over 20 different countries Several series of conferences have dealt with the application of ion implantation to semiconductors and other materials Thousand Oaks 1970 Garmisch Partenkirchen 1971 Osaka 1974 Warwick 1975 Boulder 1975 Budapest 1978 and Albany 1980 Another series of conferences has been devoted to implantation equipment and techniques S ford 1977 Trento 1978 and Kingston 1980 This conference was the fourth in the latter series Twelve invited papers and 55 contributed papers covered the areas of ion implantation equipment measuring techniques and applications of implantation to metals and semiconductors A school on ion implantation was held in connection with the conference and the lectures presented at this school were published as Vol 10 of the Springer Series in Electrophysics under the title Ion Implantation Techniques edited by H Ryssel and H Glawischnig During the conference space was also provided for presentations and demonstrations by manufacturers of ion implantation equipment Once again this conference provided a forum for free discussion among implantation specialists in industry as well as research institutions Especially effective in stimulating a free exchange of information was the daily get together over free beer at the Bier Adam Many people contributed to the success of this conference      **Proceedings of the International Ion Engineering Congress**, 1983      **Materials Surface Processing by Directed Energy Techniques** Yves Pauleau, 2006-04-25 The current status of the science and technology related to coatings thin films and surface modifications produced by directed energy techniques is assessed in Materials Surface Processing by Directed Energy Techniques The subject matter is divided into 20 chapters each presented at a tutorial level rich with fundamental science and experimental results New trends and new results are also evoked to give an overview of future developments and applications Provides a broad overview on modern coating and thin film deposition techniques and their applications Presents and discusses various problems of physics and chemistry involved in the production characterization and applications of coatings and thin films Each chapter includes experimental results illustrating various models mechanisms or theories      *Physics Briefs*, 1987      *National Union Catalog*, 1980, 1981

**The Physics and Technology of Ion Sources** Ian G. Brown, 2006-03-06 The first edition of this title has become a well known reference book on ion sources The field is evolving constantly and rapidly calling for a new up to date version of the book In the second edition of this significant title editor Ian Brown himself an authority in the field compiles yet again articles written by renowned experts covering various aspects of ion source physics and technology The book contains full chapters

on the plasma physics of ion sources ion beam formation beam transport computer modeling and treats many different specific kinds of ion sources in sufficient detail to serve as a valuable reference text      **Handbook of Ion Sources**

Bernhard Wolf, 2017-07-12 The Handbook of Ion Sources delivers the data needed for daily work with ion sources It also gives information for the selection of a suitable ion source and ion production method for a specific application The Handbook concentrates on practical aspects and introduces the principle function of ion sources The basic plasma parameters are defined and discussed The working principles of various ion sources are explained and examples of each type of ion source are presented with their operational data Tables of ion current for various elements and charge states summarize the performance of different ion sources The problems related to the production of ions of non gaseous elements are detailed and data on useful materials for evaporation and ion source construction are summarized Additional chapters are dedicated to extraction and beam formation ion beam diagnosis ion source electronics and computer codes for extraction acceleration and beam transport Emittance and brilliance are described and space charge effects and neutralization discussed Various methods for the measurement of current profile emittance and time structure are presented and compared Intensity limits for these methods are provided for different ion energies Typical problems related to the operation of ion source plasmas are discussed and practical examples of circuits are given The influence of high voltage on ion source electronics and possibilities for circuit protection are covered The generation of microwaves and various microwave equipment are described and special problems related to microwave operation are summarized The Handbook of Ion Sources is a valuable reference on the subject of benefit to practitioners and graduate students interested in accelerators ion implantation and ion beam techniques      **Surface Modification and Alloying** J.M. Poate, G. Foti, D.C. Jacobson, 2013-11-21

This book is an outcome of the NATO institute on surface modification which was held in Treviso 1981 Surface modification and alloying by ion electron or laser beams is proving to be one of the most burgeoning areas of materials science The field covers such diverse areas as integrated circuit processing to fabricating wear and corrosion resistant surfaces on mechanical components The common scientific questions of interest are the microstructures by the different energy deposition techniques and associated physical properties produced The chapters constitute a critical review of the various subjects covered at Treviso Each chapter author took responsibility for the overall review and used contributions from the many papers presented at the meeting each participant gave a presentation The contributors are listed at the start of each chapter We took this approach to get some order in a large and diverse field We are indebted to all the contributors in particular the chapter authors for working the many papers into coherent packages to Jim Mayer for hosting a workshop of chapter authors at Cornell and to Ian Bubb who did a sterling job in working over some of the manuscripts Our special thanks are due to the text processing center at Bell Labs who took on the task of assembling the book In particular Karen Lieb and Beverly Heravi typed the whole manuscript and had the entire book phototypeset using the Bell Laboratories UNIX<sup>TM</sup> system      **Fusion**
