City of Capital and Labour Tom Saunders, 2025-08-15 This compelling book explores the evolution of industrial Manchester offering a fresh perspective on its built environment through the lens of architecture archaeology and social history Richly illustrated and designed for both academic and general audiences it sheds new light on Manchester's transformation during the Industrial Revolution highlighting how the city's physical form shaped and was shaped by its socio economic and cultural dynamics By analysing architectural styles building types land use and spatial relationships the study identifies distinct phases of development from the early eighteenth to early twentieth century It delves into how Manchester's material landscape mediated industrialisation and social tensions reflecting the emergence of both bourgeois and proletarian communities The book argues that the city's evolving physical structure was deeply intertwined with the capitalist logic of class relations where architecture and urban spaces became arenas for competing social identities Through mapping the enduring physical traces of these changes and using a Marxist lens to examine shifting power structures in cities the book underscores Manchester's role as a microcosm of industrial and urban transformation It invites readers to rediscover the city's industrial heritage emphasising the importance of its historic buildings in understanding the socio economic forces that shaped modern urban life before they are irrevocably altered by contemporary redevelopment

Durrer, Abigail Gilmore, Leila Jancovich, David Stevenson, 2023-08-26 This Open Access edited collection calls for a greater understanding of the local within the ways the arts culture and creative practices are governed promoted regulated resourced and valued Cultural policy studies tends to privilege the national and international as the primary site at which cultural policy is enacted and focuses on the local as a case study of practice rather than a site of policy in its own right While this may make global policy transfer manageable for national policy agencies it ignores the contingent relationships diverse geographies and distinct identities of localities This volume addresses this gap and is structured around three themes disciplining the local which examines key concepts from different academic fields of study managing the local which identifies policy approaches that engage with the idea of the local in different ways and practising the local which offers case studies of how local cultural policies are being enacted in places of differing scale and geography **The Painters**
