When the Asteroid Hits Allen A. Debus, 2024-10-04 The incomprehensible notion of a very large chunk of ice or rock from outer space smashing into the Earth has only become mainstream within the past two centuries Though early writers imagined the utterly fantastic consequences of comet collisions and speculated on the devastation they might wreak it was not until the 1980s when scientists finally resolved that dinosaurs were extinguished by an asteroid 66 million years

ago This startling announcement captivated the media and tilted the science fiction world but in reality history may have been punctuated repeatedly by such events This book collects and analyzes ideas of asteroid comet and planetary impacts with Earth spanning two centuries from the first realization of extinctions in fossil records to the new millennium reflected in scores of sci fi stories films and televised science documentaries The author examines social and geopolitical fears tied to the prospect of a cosmic borne catastrophe Science fiction and speculation are artfully melded **Beyond 2012: Catastrophe or Awakening?** Geoff Stray,2009-05-21 An illustrated encyclopedic overview of the prophecies calendars and theories that indicate the year 2012 is a threshold of great change for humanity Looks at the scientific and anthropological evidence for the rare galactic alignment due to occur in December 2012 Sifts through the catastrophic theories to show what we might really expect in 2012 In December of 2012 the Mayan Calendar s Great Cycle will come to an end Opinion remains divided as to whether apocalyptic scenarios of worldwide destruction or utopian visions of a spiritually renewed humanity will prevail after this key date has passed What is certain however is that a rare galactic alignment will occur one so unique that it is found at the core of many wisdom traditions from around the globe Geoff Stray has been collecting the vast amounts of data relating to the 2012 phenomena since 1982 Far from confining his research to the Maya who provide the most prominent predictions indicating this date will herald significant changes for humanity he has studied the prophetic traditions of other cultures including the Tibetan Chinese Jewish Ethiopian and tribal cultures from around the globe to show the kind of convergence of cosmic purposes happening along a number of parallel tracks This book offers an extensive study of many modern theories including Terence McKenna s timewave zero and Maurice Cotterell s sunspot research as well as anomalous phenomena such as near death experiences and crop circles Sifting through all the scientific research and speculation that the year 2012 has inspired Geoff Stray provides an encyclopedic look at what we might really expect on this pivotal date
