Luck, Or Cunning? Samuel Butler,1924 **Luck, Or Cunning, as the Main Means of Organic Modification?** Samuel Butler,1922 **Luck, or Cunning, as the Main Means of Organic Modification** Samuel Butler,2023-01-26
Reproduction of the original **Luck Or Cunning?** Samuel Butler,2004-06 In brief there is nothing in life of which there are not germs and so to speak harmonics in death and nothing in death of which germs and harmonics may not be found in life Each emphasizes what the other passes over most lightly each carries to its extreme conceivable development that which in the other is only sketched in by a faint suggestion but neither has any feature rigorously special to itself Granted that death is a greater new departure in an organism s life than any since that congeries of births and deaths to which the name embryonic stages is commonly given still it is a new departure of the same essential character as any other that is to say though there be much new there is much not to say more old along with it We shrink from it as from any other change to the unknown and also perhaps from an instinctive sense that the fear of death is a sine qua non for physical and moral progress but the fear is like all else in life a substantial thing which if its foundations be dug about is found to rest on a superstitious basis **Luck, Or Cunning** Samuel Butler,1887 *Luck, Or Cunning, as the Main Means of Organic Modification?* Samuel Butler,1920 **Luck or Cunning? (EasyRead Super Large 20pt Edition)** Samuel Butler,2004 **Luck, Or Cunning as the Means of Organic Modification?** Samuel Butler (B.A., St John's Coll., Camb.),1922 **Luck, Or Cunning, as the Main Means of Organic Modification?** ,1922 *Luck or Cunning? Volume 1 of 2 (EasyRead Super Large 24pt Edition)* , **Luck, Or Cunning, as the Main Means of Organic Modification?.** ,1908 **Luck, Or Cunning, as the Main Means of Organic Modification?** Samuel Butler,2016-06-14 Excerpt from Luck or Cunning as the Main Means of Organic Modification An Attempt to Throw Additional Light Upon Darwin s Theory of Natural Selection I showed that if the view for which I was contending was taken many facts which though familiar were still without explanation or connection with our other ideas would remain no longer isolated but be seen at once as joined with the mainland of our most assured convictions Among the things thus brought more comfortably home to us was the principle underlying longevity It became apparent why some living beings should live longer than others and how any race must be treated whose longevity it is desired to increase Hitherto we had known that an elephant was a long lived animal and a y short lived but we could give no reason why the one should live longer than the other that is to say it did not follow in immed iate coherence with or as intimately associated with any familiar principle that an animal which is late in the full development of its reproductive system will tend to live longer than one which reproduces early If the theory of Life and Habit be admitted the fact of a slow growing animal being in general longer lived than a quick developer is seen to be connected with and to follow as a matter of course from the fact of our being able to remember any thing at all and all the well known traits of memory as Observed Where we can best take note of them are perceived to be reproduced with singular fidelity in the development of an animal from its embryonic stages

Luck, or Cunning, as the Main Means of Organic Modification Samuel Butler, 2019-12-19 In *Luck or Cunning as the Main Means of Organic Modification* Samuel Butler examines the intricate interplay between chance and design in the evolution of species Written in Butler's characteristic satirical style the book critiques the deterministic views of Darwinian evolution positing that both luck and cunning play pivotal roles in the modification of organic life The text carefully navigates the philosophical underpinnings of natural selection and blends literary wit with scientific inquiry creating a thought provoking narrative that challenges established notions within the Victorian scientific context Samuel Butler a 19th century novelist cultural critic and philosopher was deeply influenced by his own experiences and observations of the natural world His critique of established institutions including religion and science emerged from his belief in the importance of individuality and creativity Butler's exposure to both the literary circles of his time and the burgeoning debates in evolutionary biology shaped this work reflecting his conviction that evolution is an amalgamation of unpredictable chance and deliberate adaptation rather than mere survival of the fittest This book is highly recommended for anyone interested in the intersections of literature philosophy and science Butler's compelling arguments and engaging prose invite readers to reconsider the complexities of evolution while providing a fresh perspective that remains relevant in contemporary discussions of natural history and adaptation
