Bristol Britannia Charles Woodley,2002 This title charts the evolution and history of one of Britain s finest airliners and one of its greatest disappointments Conceived soon after World War II the Britannia was to be the largest fastest quietest and longest range airliner of its day Technical problems delayed the Britannia and by the time it entered service it had been rendered obsolete by the new generation of jets But although it had a very short front line service career the Britannia became a stalwart of charter and cargo operators **Aviation News** ,2006-07 International Warbirds John C. Fredriksen,2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for specialists accessible to enthusiasts International Warbirds An Illustrated Guide to World Military Aircraft 1914 2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict including numerous models from Great Britain France Russia and Japan as well as notable machines from Israel Canada China India Brazil and other nations Entries span the history and scope of military aircraft from bombers and fighters to transports trainers reconnaissance craft sea planes and helicopters with each capsule history combining nuts and bolts technical data with the story of that model s evolution and use Together these portraits offer an exciting well researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe and tell a vivid tale of how air power became such a decisive factor in modern warfare **Hawker Typhoon, Tempest and Sea Fury** Kev Darling,2003 This well researched and readable book tells the full story of these important aircraft **The British National Bibliography** Arthur James Wells,2009 **The Pointblank Directive** L. Douglas Keeney,2012-12-20 The Pointblank Directive is the result of extensive new research that creates a richly textured portrait of perhaps the last untold story of D Day Where was the Luftwaffe on D Day Following decades of debate 2010 saw a formerly classified history restored and in it was a new set of answers This title analyzes three uniquely talented men and why the German Air Force was unable to mount an effective combat against the invasion forces Following a year of unremarkable bombing against German aircraft industries General Henry H Hap Arnold commander of the U S Army Air Forces placed his lifelong friend General Carl A Tooe Spaatz in command of the strategic bombing forces in Europe and his protégé General James Jimmy Doolittle command of the Eighth Air Force in England For these fellow

aviation strategists he had one set of orders sweep the skies clean of the Luftwaffe by June 1944 Spaatz and Doolittle couldn't do that but they could clear the skies sufficiently to gain air superiority over the D Day beaches The plan was called Pointblank *A History of the Mediterranean Air War, 1940-1945* Christopher Shores, Russell Guest, 2025-09-30 In 1943 Allied bombers from Italy launched strategic attacks on Axis oil fields factories and Danube supply routes Following the inter Allied Casablanca Conference in January 1943 the outline for the Combined Bomber Offensive was agreed and resulted in early February with the Casablanca Directive This required the progressive destruction and dislocation of the German military industrial and economic systems and the undermining of the morale of the German people to a point where their capacity for armed resistance is fatally weakened This directive was clarified in June when the Combined Chiefs of Staff issued the Pointblank Directive that stated that the highest priority targets were the fighter aircraft factories to ensure that in the coming invasion of France the enemy would not have air superiority When these directives were issued it was envisaged that as well as attacks by RAF Bomber Command and the US 8th Air Force based in England the strategic bomber forces in Italy would begin operations once suitable bases were available After the Allied landings in Italy and resulting collapse of the Italian fascist regime a network of bomber bases was hastily developed Thus on 1 November 1943 the US 15th Air Force was formed to conduct the daylight bombing offensive against strategic targets in southern Germany and across southeastern Europe Key among these were the Rumanian oilfields and traffic along the River Danube This new formation was joined by the smaller but highly effective 205 Group RAF that was trained and equipped for night bombing so mirroring their equivalent British based formations The damaging attacks on the Reich's oil supplies and the highly effective Danube mining campaign conducted at night by 205 Group delivered huge strategic effect The latter reduced vital oil and goods traffic into the Reich to a trickle but also dislocated the supply and logistics train into the southern part of the Eastern Front so giving manifest support to the Soviets In this volume the early months of this hugely significant air campaign are described in minute and original detail and are accompanied by hundreds of hitherto unpublished photographs In combating these attacks Germany's Axis allies such as Hungary Rumania Bulgaria and Slovakia were encountered for the first time by the Western Allies **Flypast**, 2007 Bookseller, 1998 **Why Air Forces Fail** Robin Higham, Stephen J. Harris, 2006-02-17 Includes two new chapters One of the more interesting and better books on military aviation to appear in the last few years Journal of Military History Since the publication of the first edition of *Why Air Forces Fail* the debate over airpower's role in military operations has only intensified Here eminent historians Robin Higham and Stephen J Harris assemble a team of experts to add essential new details to their cautionary tale for current practitioners of aerial warfare Together the contributors examine the complex often deep seated reasons for the catastrophic failures of the Russian Polish French British Italian German Argentine and American air services Complemented by reading lists and suggestions for further research this seminal study with two new chapters provides an essential and detailed analysis of defeat Contains

many interesting insights and interpretations an excellent introduction to the study of military failure in general and air forces in particular Journal of America s Military Past I recommend this book to those who are interested in air forces and air power whether amateur or professional past present and future Richard Cobbold Bryanston The Yearbook Provides an excellent analysis of the root causes of failure this engaging study goes far beyond the aerial battlefield to examine the circumstances leading to defeat Dennis Drew Colonel USAF Ret **Modelling the De Havilland Mosquito** Roy Sutherland,2012-07-20 First entering service in 1941 the legendary all wooden Mosquito was one of the best twin engined aircraft of its size to see action in World War II The addition of radar turned the Mosquito into the RAF s premier night fighter and it achieved great success in the defence of Britain with some 600 raiders and 600 V1 rockets falling to its guns between 1942 and 1945 The design s superb performance and ability to escape interception by enemy fighters also made the Mosquito the ideal choice for the RAF s photographic reconnaissance force This wide range of roles across multiple theatres and air forces are all reflected in the variety of kits built and colour schemes shown throughout this book
