Renuka,R. Velkennedy,2025-05-02 In a world experiencing unprecedented urbanization and drastic climate change there is immense demand for creative solutions to the environmental social and economic obstacles faced by burgeoning cities in the developing world This book delves into the potential of innovative urban initiatives to address the challenges of urbanization in countries with limited resources thereby contributing

to sustainable and inclusive urban development. It explores how cutting edge technologies can provide efficient functionality for urban residents through information and communications shared among stakeholders. The primary aim is to enhance the efficiency of urban operations, foster economic development, and improve the well-being of residents by leveraging intelligent technologies and analyzing data. Government and policy are recognized as fundamental drivers of urban development, and the book sheds light on initiatives supporting cities that are not only technologically advanced but also sustainable, inclusive, and equitable. Contributions provide insight into technological aspects of urbanism, including the Internet of Things (IoT), sensors, data analytics, and essential infrastructure for sustainable city development. They also emphasize the importance of community engagement and inclusivity, stressing that urban initiatives should be designed for the benefit of all citizens, leaving no one behind. EcoTech Urbanism makes a compelling case for the imperative of sustainability in the future of urban areas, underscoring the critical role of technology in achieving this goal. The book offers a holistic perspective on the integration of eco-friendly technologies, fostering a balance between urban development and environmental conservation, ultimately paving the way for a future where cities thrive sustainably and inclusively.
