Arrian's History of Alexander's Expedition Arrian,1729 *Islamic Astronomical Tables* Benno van Dalen,2023-05-31

This volume comprises nine articles on Islamic astronomy published since 1989 by Benno van Dalen Van Dalen was the first historian of Islamic astronomy who made full use of the new possibilities of computers in the early 1990s He implemented various statistical and numerical methods that can be used to determine the mathematical properties of medieval astronomical tables and utilized these to obtain entirely new until then unattainable historical results concerning the interdependence of individual tables and hence of entire astronomical works His programmes for analysing tables making sexagesimal calculations and converting calendar dates continue to be widely used The five articles in the first part of this collection explain the principles of a range of statistical methods for determining unknown parameter values underlying astronomical tables and present extensive step by step examples for their use The four articles in the second part provide extensive studies of materials in unpublished primary sources on Islamic astronomy that heavily depend on these methods The volume is completed with a detailed index **The Other Plato** Dmitri Nikulin,2012-12-11 Offering a provocative alternative to the dominant approaches of Plato scholarship the T bingen School suggests that the dialogues do not tell the full story of Plato s philosophical teachings Texts and fragments by his students and their followers most famously Aristotle s Physics point to an unwritten doctrine articulated by Plato at the Academy These unwritten teachings had a more systematic character than those presented in the dialogues which according to this interpretation were meant to be introductory The T bingen School reconstructs a historical critical and systematic account of Plato that takes into account testimony about these teachings as well as the dialogues themselves The Other Plato collects seminal and more recent essays by leading proponents of this approach providing a comprehensive overview of the T bingen School for English readers *Aristotle's Metaphysics: Books A-E* Aristotle,1924 *Alexander's East India and Colonial Magazine* ,1836 *A Directory of Names, Pennant Numbers, and Addresses of All Members of the International Ship Masters' Association of the Great Lakes* Ship Masters' Association of the Great Lakes,1920 **Noncommutative Geometry and Number Theory** Caterina Consani,Matilde Marcolli,2007-12-18 In recent years number theory and arithmetic geometry have been enriched by new techniques from noncommutative geometry operator algebras dynamical systems and K Theory This volume collects and presents up to date research topics in arithmetic and noncommutative geometry and ideas from physics that point to possible new connections between the fields of number theory algebraic geometry and noncommutative geometry The articles collected in this volume present new noncommutative geometry perspectives on classical topics of number theory and arithmetic such as modular forms class field theory the theory of reductive p adic groups Shimura varieties the local L factors of arithmetic varieties They also show how arithmetic appears naturally in noncommutative geometry and in physics in the residues of Feynman

Alexander's Veterans and the Early Wars of the Successors Joseph Roisman, 2012-08-24 From antiquity until now most writers who have chronicled the events following the death of Alexander the Great have viewed this history through the careers ambitions and perspectives of Alexander's elite successors Few historians have probed the experiences and attitudes of the ordinary soldiers who followed Alexander on his campaigns and who were divided among his successors as they fought for control of his empire after his death Yet the veterans played an important role in helping to shape the character and contours of the Hellenistic world This pathfinding book offers the first in depth investigation of the Macedonian veterans experience during a crucial turning point in Greek history 323-316 BCE Joseph Roisman discusses the military social and political circumstances that shaped the history of Alexander's veterans giving special attention to issues such as the soldiers conduct on and off the battlefield the army assemblies the volatile relationship between the troops and their generals and other related themes all from the perspective of the rank and file Roisman also reexamines the biases of the ancient sources and how they affected ancient and modern depictions of Alexander's veterans as well as Alexander's conflicts with his army the veterans motives and goals and their political contributions to Hellenistic history He pays special attention to the Silver Shields a group of Macedonian veterans famous for their invincibility and martial prowess and assesses whether or not they deserved their formidable reputation
