Buergelt, Yabome Gilpin-Jackson, Marguerite Welch, Mitsunori Misawa, 2022-01-24 This handbook offers an expanded discourse on transformative learning by making the turn into new passageways to explore the phenomenon of transformation It curates diverse discourses knowledges and practices of transformation in ways that both includes and departs from the adult learning mainstay of transformative learning and adult education The purpose of this handbook is not to resolve or unify a theory of transformation and all the disciplinary contributions that clearly promote a living concept of transformation Instead the intent is to catalyze a more complex and deeper inquiry into the Why of transformation Each discipline culture ethics and practice has its own specialized care and reasons for paying attention to transformation How can scholars practitioners and active members of discourses on transformative learning make a difference How can they foster and create conditions that allow us to move on to other unaddressed or understudied questions To answer these questions the editors and their authors employ the metaphor of the many turns into passageways to convey the potential of transformation that may emerge from the many connecting passageways between for instance people and society theory and practice knowledge created by diverse disciplines and fields professions individual and collective transformations and individual and social action *Exploring Rituals in Nursing* Zane Robinson Wolf, 2013-07-15 Awarded first place in the 2013 AJN Book of the Year Awards in the History and Public Policy

Nursing Power and Social Judgement Martin Johnson, 2018-08-20 First published in 1997 this work makes a substantial reexamination of the social processes behind the labelling of patients in hospital care Taking an interpretive perspective the author analyzes the social construction of patient labels identifying strategies for and the consequences of giving and receipt of good and bad labels He shows how the rich data of truly participant observation in the tradition of reflexive ethnography can powerfully illuminate the experiences and actions of both patients and their nurses It is a critical analysis of key work in this field Professor Johnson demonstrates the redundancy of trait theories of social judgment offering a more complex and negotiated reality in which patient labels form a part of a rich web of unequal power relations between nurses and their clients
