Ward, Shelton Hisley, 2015-06-03 It offers the perfect balance of maternal and child nursing care with the right depth and breadth of coverage for students in today's maternity/pediatric courses. A unique emphasis on optimizing outcomes/evidence-based practice and research supports the goal of caring for women, families, and children not only in traditional hospital settings but also wherever they live, work, study, or play. Clear, concise, and easy to follow, the content is organized around four major themes: holistic care, critical thinking, validating practice, and tools for care that help students to learn and apply the material.

Forensic Nursing Rita M. Hammer, Barbara Moynihan, Elaine M. Pagliaro, 2013 Interdisciplinary and holistic in approach, *Forensic Nursing: A Handbook for Practice*, Second Edition, emphasizes collaborative practice and skill in caring for victims of violence and disaster. Focusing on how specific topics relate to forensic nursing, it examines human trafficking, sexual predators targeting children through the Internet, and elder abuse. Additionally, it explores workplace violence, cyberbullying, and new developments in the field of biological evidence and DNA analysis.

Domestic Violence Offenders Alan Rosenbaum, 2014-01-02 Women's shelters and safe houses were a good first step, but they only address part of the problem. Learn what else must be done to address the problem of domestic violence. *Domestic Violence Offenders* presents recent research, current interventions, and legal standards for people arrested for domestic violence. It also addresses the controversies that have arisen in the wake of the mandatory standards for batterer interventions that have been established by various jurisdictions, examining the type of treatment modality and content permitted by various jurisdictions, the duration of treatment, and the relationship of the various standards to actual research. This essential book also provides suggestions for a more inclusive, less rigid process for creating standards and policies for use with this population. Handy tables and charts make the information easily accessible.

From the editors: The initial societal response to intimate partner violence was the development of the shelter movement for battered women. Women's shelters and/or safe houses developed in almost all major population areas throughout the United States and abroad. The goals were to provide a safe environment for abused women and their children, to offer advocacy, counseling, and medical services, and to empower women to leave their abusers. While shelters continue to serve these and other critical needs and are an essential part of the service delivery system for battered women, they address only part of the problem. Left untreated, batterers often will continue to abuse their partners who leave shelters and return to the relationship. If their partners leave the relationship, the batterers may find new victims to abuse. The response to this harsh reality was the development of batterer intervention programs. *Domestic Violence Offenders* provides you with informed discussions of the implications of research and policies for those providing interventions, why it is premature for states to establish certain rigid standards for batterer programs, and how some of the current standards may produce more harm than good. The history of batterer intervention programs, completion and recidivism among court- and self-referred batterers, the Alternatives to Violence program, and the experiences and perceptions of its founder, common aspects of various intervention programs, confidentiality, group structure and length, partner contacts, leadership configuration, and

program goals topics addressed by most programs power and control anger management substance abuse stress reduction parenting communication and more the controversial and often misunderstood issue of female partner aggression and violence the Stages of Change approach to domestic violence treatment lethality assessment and safety planning for partners of batterers the advantages of conjoint therapy for certain types of cases the Illinois Protocol for batterer programs outcome research on programs for batterers and a great deal more *BATTLE CRIES ON THE HOME FRONT* Peter J. Mercier, Judith D. Mercier, 2000-01-01 This collection of social science research on domestic violence in the military is unique as it is the first compilation of research on domestic violence as it affects the military population The studies contained herein use contemporary qualitative and quantitative research and focus on the occurrence prevalence or risk factors for domestic violence found in four military branches Air Force Army Marine Corps and Navy It is divided into three sections with Section One dealing with issues related to wife battering in the military Section Two includes readings pertaining to child abuse in the military Section Three addresses prevention and treatment issues regarding domestic violence in the military The studies presented will enhance both professionals and students understanding of the issues and dynamics particular to domestic violence in military families and offer them the most current literature for future research in this area It will be of interest to researchers students and professionals in the fields of social work health family counseling criminal justice sociology human services and psychology
