Dietary Fiber David Kritchevsky, Charles T. Bonfield, James W. Anderson, 2012-12-06 Twenty years ago the very idea of an international conference on the fiber contained in plant food would have been totally inconceivable At that time fiber was generally viewed as an inert component of food of no nutritional value and consequently considered as a contaminant the removal of which would enhance the purity of a product It was measured by a now obsolete and almost worthless test introduced in the last century for veterinary rather than human nutrition and what was measured was referred to as crude fiber containing part of the cellulose and lignin but none of the numerous components of fiber now known to play important roles in the maintenance of health There were a few lone voices prior to the last two decades who had extolled the laxative properties of the undigested portion of food assuming that these were related to its irritant action on the bowel mucosa In retrospect this was a total misconception and softage would have been a more appropriate term than roughage since its presence insured soft not irritating colon content

National Library of Medicine (U.S.), Brain Maturation and Cognitive Development Anne Petersen, 2017-09-29 This volume adopts a unique multidisciplinary approach to the study of the development of the human brain and early behavior It includes chapters by researchers from several disciplines whose work addresses specific aspects of brain behavioral interactions in development The chapters provide strong evidence that the development of both brain and behavior is a response to biological and environmental variations Language is also discussed and provides a useful example of biosocial development because linguistic and brain functions and development can be examined under controlled conditions of both genetic and environmental deprivation Research in this area has produced particularly exciting results pointing to the universality of language capacity among humans and illuminating the processes by which language competence develops Brain Maturation and Cognitive Development provides new views in the understanding of human nature and present new biosocially oriented research directions that are unique in their focus

Tryptophan Herschel Sidransky, 2001-11-21 Historically the amino acid tryptophan has been considered

to play a role in cancer development and the aging process In recent times this nutrient has been associated with eosinophila myalgia syndrome a new human disease that attacks the muscular system This detailed book examines the implications of the large measure of fresh information ga Essential Nutrients in Carcinogenesis Lionel A. Poirier,2012-12-06 For more than 50 years it has been recognized that diet influences cancer formation both in humans and in experimental animals In fact early investigators successfully retarded the onset of tumors in animals by dietary manipulation Such findings led to an early optimism that cancer would prove to be yet another disease resulting from dietary imbalances and might thus be amenable to prevention or cure by appropriate nutritional changes Subsequent studies showed that the influence of diet on cancer formation was not only very complex it also did not appear to play a direct causative role in carcinogenesis Thus during the mid 1950s scientific interest in diet and cancer greatly waned By the early 1970s however a resurging interest in diet and cancer became evident This field of activity has continued to grow Yet for over 20 years no comprehensive meeting has been held to summarize the major developments concerning dietary modification of carcinogenesis over a broad range of essential nutrients To fill this void a workshop was held on the role of essential nutrients in carcinogenesis from January 30 to February 1 1985 in Bethesda Maryland under the auspices of the National Cancer Institute This volume is a compilation of the presentations made at that meeting Connective Tissue Disease Jouni Uitto,2021-07-29 This book is a collection of works that canvass many of the recent developments in various areas of connective tissue research It focuses on the structure of the components molecular organization and pathology of the extracellular matrix **Toxic Substances in Crop Plants** J P Felix D'Mello,Carol M. Duffus,J H Duffus,1991-01-01 Continuing disquiet over the use of animal by products in livestock nutrition has provided renewed impetus for the greater exploitation of conventional and novel crop plants both as food and as industrial raw materials However a major factor restricting the utilisation of such crops in animal nutrition is the presence of a diverse array of toxic substances capable of inducing effects ranging from loss of hair and wool to severe neurological disorders and even death Significant advances have been made to establish the nature of these compounds and to assess their effects in animals and man As in other branches of biomedical research these developments have been achieved through the multidisciplinary efforts of chemists biochemists toxicologists nutritionists and molecular geneticists This volume reviews current knowledge of toxic substances in crop plants with particular reference to their anti nutritional effects in animals and man and the potential for detoxification The distribution and ecological significance of these compounds is also addressed Reviews current knowledge of toxic substances in crop plants Assesses distribution and ecological significance of compounds **Handbook of Early Childhood Intervention** Jack P. Shonkoff,Samuel J. Meisels,2000-05-22 Eighteen new chapters have been added to the 2000 edition of this valuable Handbook which serves as a core text for students and experienced professionals who are interested in the health and well being of young children It serves as a comprehensive reference for graduate students advanced trainees service providers and policy makers in such

diverse fields as child care early childhood education child health and early intervention programs for children with developmental disabilities and children in high risk environments This book will be of interest to a broad range of disciplines including psychology child development early childhood education social work pediatrics nursing child psychiatry physical and occupational therapy speech and language pathology and social policy A scholarly overview of the underlying knowledge base and practice of early childhood intervention it is unique in its balance between breadth and depth and its integration of the multiple dimensions of the field The First Three Years & Beyond Edward Zigler,Matia Finn-Stevenson,Nancy Wilson Hall,2004-01-01 Drawing on research from the social sciences and studies on the brain to answer questions and exploring what they mean for social policy and child and family development this book offers recommendations for child care and development based on current brain research and its implications Topics include the benefits of family leave child care home visitation programs child abuse and nutrition **L-tryptophan** Walter Kochen,Hans Steinhart,1994 **Children and Youth in Crisis** Mattias Lundberg,Alice Wuermli,2012-06-29 The successful development of children and young people requires that we protect and nurture a set of interrelated physiological cognitive and socio emotional systems What happens to these systems in early life can have long term consequences and can even carry over to the next generation The impact of economic crises on human development is similarly complex and heterogeneous Some families and some young people display astonishing resilience either by being comparatively unscathed by crises or by their ability to recover quickly and healthily Other families and individuals may be unable to prevent exposure unable to protect themselves or may not have the same capacity to adapt positively when exposed to a crisis with potentially serious long term consequences for healthy development Human development lies at the intersections of neurology and sociology genetics and psychology biology and economics and this volume approaches the study of shocks and human development from a variety of disciplinary perspectives economics sociology anthropology and social and developmental psychology This volume describes the impact of aggregate shocks on human development and the subtle and intricate settings and pathways through which individuals can be affected Depending on the timing duration transmission mechanisms and context the consequences for children s physical cognitive and socio emotional development may be costly and irreversible Fortunately although children suffer in adversity they can also benefit positively when exposed to enriching environments We need to develop and implement effective interventions to prevent the worst consequences of exposure to shocks and to assist families and young people to recover This volume explores what we know about protecting young people from lasting harm and promoting healthy development through a crisis This volume is intended for policymakers civil society and others engaged in promoting and protecting human development and in designing and implementing safety nets during crisis This is a novel approach as it incorporates the experiences from such diverse disciplines to provide a comprehensive understanding of the complex interactions that define human development From Neurons to Neighborhoods Division of Behavioral and Social Sciences

and Education, Institute of Medicine, Board on Children, Youth, and Families, Committee on Integrating the Science of Early Childhood Development, 2000-11-13 How we raise young children is one of today's most highly personalized and sharply politicized issues in part because each of us can claim some level of expertise The debate has intensified as discoveries about our development in the womb and in the first months and years have reached the popular media How can we use our burgeoning knowledge to assure the well being of all young children for their own sake as well as for the sake of our nation Drawing from new findings this book presents important conclusions about nature versus nurture the impact of being born into a working family the effect of politics on programs for children the costs and benefits of intervention and other issues The committee issues a series of challenges to decision makers regarding the quality of child care issues of racial and ethnic diversity the integration of children's cognitive and emotional development and more Authoritative yet accessible From Neurons to Neighborhoods presents the evidence about brain wiring and how kids learn to speak think and regulate their behavior It examines the effect of the climate family child care community within which the child grows Current Catalog National Library of Medicine (U.S.), 1985 First multi year cumulation covers six years 1965-70 Progress in Tryptophan and Serotonin Research 1986 David A. Bender, Michael H. Joseph, Walter Kochen, Hans Steinhart, 2019-07-22 No detailed description available for Progress in Tryptophan and Serotonin Research 1986 **Diet and Health** National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Diet and Health, 1989-01-01 Diet and Health examines the many complex issues concerning diet and its role in increasing or decreasing the risk of chronic disease It proposes dietary recommendations for reducing the risk of the major diseases and causes of death today atherosclerotic cardiovascular diseases including heart attack and stroke cancer high blood pressure obesity osteoporosis diabetes mellitus liver disease and dental caries **Nutritional Toxicology Volume 2** John N. Hathcock, 2013-06-11 Nutritional Toxicology Volume II discusses the various interactions between nutritional phenomena and toxicologic processes It addresses particular subjects that have become substantially more important through the development of new knowledge significant increases in knowledge or increased awareness of potential effects on human health and well being The implications of such knowledge have impact on basic research toxicity testing public health food and agriculture programs and food safety regulation The book begins with a review of the role and importance of macro and micronutrients on detoxification processes of foreign compounds after absorption This is followed by separate chapters on mixed function oxidation in the liver the metabolic and nutritional effects of ethanol the effects of malnutrition on drug metabolism interaction of nutrient intake with DNA and chromatin and how such interactions may affect the process of toxicogenesis in the nucleus Subsequent chapters cover mutagens in cooked foods food sensitivities anatomical cardiovascular and behavioral effects of dietary caffeine the toxicology of dietary tin aluminum and selenium and the toxicology of pesticides in foods
