Psychologists Richard W. Coan, 1979-01-01 **Current Issues in Theoretical Psychology** W.J. Baker, M.E. Hyland, H. van Rappard, A.W. Staats, 1986-12-01 *Current Issues in Theoretical Psychology* *The Analysis of Psychological Theory* Henderikus J. Stam, Timothy B. Rogers, Kenneth J. Gergen, 1987 *Psychology Library Editions: History of Psychology* Various, 2021-08-19 Originally published between 1928 and 1987 the volumes in this set provide an interesting look back at how psychology has developed as a discipline and some of the problems it has encountered along the way It includes volumes focusing on the history of specific fields such as developmental and experimental psychology as well as examining the roots of psychological theory as a whole and how it has informed many of the fields of psychology we know today **The Comprehensive History of Psychology** Arun Kumar Singh, 1991-01-01 This book is a simple introduction to the history and various systems of Psychology It provides a basic understanding of major systems and theories in psychology in a comprehensive way It covers in detail the historical backgrounds taking place before the emergence of each system As such it provides a better understanding about the historical emergence of status of psychology and in beginning its separation from philosophical traditions It covers a lucid discussion with emphasis on the antecedent forces of all the important systems of psychology Besides the traditional systems it also includes in separate chapters a discussion on the COGNITIVE PSYCHOLOGY the EXISTENTIAL PSYCHOLOGY the HUMANISTIC PSYCHOLOGY and the INTERNATIONAL PSYCHOLOGY An overview of psychology in India has also been one of the salient features of the book This will briefly introduce to teachers and students about what the Indian psychologists are doing The book is an ideal text for undergraduate and post graduate course of psychology **Recent Trends in Theoretical Psychology** W.J. Baker, Leendert P. Mos, Hans V. Rappard, Henderikus J. Stam, 2012-12-06 This volume constitutes the proceedings of the second biannual conference of the International Society for Theoretical Psychology see Epilogue held in Banff Alberta Canada April 20-25 1987 Thirty nine papers were presented during the four days of the conference including an invited address by Kenneth Gergen Unfortunately even after severely restricting the length of the written papers the required limitation on printed space permitted only 34 of these to be included in these proceedings While most of the papers required editorial adjustment the authors had final word on style and content The classification of conference papers tends to be somewhat arbitrary but we decided to structure the chapters under four headings philosophy metatheory methodology and theory By philosophy we refer primarily to issues in the philosophy of science as these pertain to the discipline of psychology Metatheory refers to theory drawing on the philosophy of science and having implications for methodology about psychological theories Methodology refers to both theory of inquiry and specific methods of investigation as these derive from philosophical and meta-theoretical considerations By theory we refer to both analyses of the foundations of extant theory including historical and sociological analyses and the advancement of substantive theory *Annals of Theoretical Psychology* K.B. Madsen, Leendert P. Mos, 2013-11-11 As a

follow up to Volume 7 contributors continue to explore the latest developments in developmental psychology Here researchers focus on the integration of theory and research and evaluates theoretical progress and advanced research Continuing with the successful format of previous volumes in *Annals of Theoretical Psychology* Volume 10 presents four major contributions each accompanied by commentaries and replies to commentaries

A History of Psychology in Metascientific Perspective K.B. Madsen,1988-06-01 Two fields of interest are combined in this volume the history of science and the theory or philosophy of science metascience The result is a history of psychology with emphasis placed upon a metascientific analysis of the work of fourteen psychologists from various periods Each analysis is set in historical context a period or school is discussed in each chapter together with a metascientific analysis of some major works from the respective period or school The author employs a metascientific descriptive system or systematology developed during more than 30 years of work on comparative metascientific studies of about 50 psychological theories The results of those studies have been published in previous works These analyses are also used here for verifying T S Kuhn s much debated theory about the revolutionary development of sciences The author revises Kuhn s theory and shows that it can be applied to the history of psychology Thus in a Kuhnian sense psychology may be said to have had two normal periods and two periods of crisis leading to school formation

Annals of Theoretical Psychology Arthur W. Staats,Leendert P. Mos,2012-12-06 I have been involved in constructing a unified theory for many years in considering the state of psychology s unity disunity and in generally attempt ing to persuade our profession to work on its unification In this work I have had the opportunity to become acquainted with the works of a number of other psychologists whose statements indicated that they had something to say on these topics I saw also that it would be very productive for psychology to have these individuals address themselves to psychology s disunity unity consid ered as a problem that should be confronted and addressed In 1983 I began to indicate that it was my intention to devote a book to the topic as seen through the eyes of a group of prominent psychologists concerned with related issues It was very fortunate from my standpoint that Joseph Royce and later Leendert Mos who were editing this series were interested in this book I accepted the former s invitation to do within the present series the book I had planned Although I must assume responsibility for selection of the contributors for the book s organization and for the first editing of their papers for substance Pro fessor Mos offered to help in an editorial capacity and I am most grateful for his contributions to the formal editing The volume is much improved as a result of his careful efforts which in one case involved rewriting material

The Life Cycle of Psychological Ideas

Thomas C. Dalton,Rand B. Evans,2006-01-03 This book focuses on what other volumes have only touched on that is the factors that contribute to the rise of certain persons and ideas in the field of psychology Bringing together noted experts in the field it describes the process of intellectual reconstructions that determines how we view historical events and why some ideas die only to be reborn again as well as why new ideas can quickly topple traditional views

Human Consciousness and Its Evolution Richard W. Coan,2013-04-23 How has human consciousness evolved from its primitive origins and what course will it take in the future How should it develop in an individual from infancy and through childhood and the adult years Such questions have been the focus of many writers and many religious and philosophical traditions both Eastern and Western

Most writers and traditions conceive of psychic evolution in terms of one universal pattern and the evolutionary goal considered by a given writer or tradition may be one of rationality love or transcendence of ones individual separateness The author contends that we may conceptualize the goal of psychic evolution in terms of any of five different modes of fulfillment We can recognize higher and lower levels of attainment in each of these modes Whatever mode an individual emphasizes it is easy to recognize a value in having access to other modes In the authors view we need to recognize alternative pathways of psychic evolution The pathways will differ with respect to the modes that are emphasized and the nature of the interplay of different modes
