2015-2016 Assessment of the Army Research Laboratory National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Laboratory Assessments Board, Army Research Laboratory Technical Assessment Board, 2017-03-31 The National Academies of Sciences Engineering and Medicine's Army Research Laboratory Technical Assessment Board ARLTAB provides biennial assessments of the scientific and technical quality of the research development and analysis programs at the Army Research Laboratory ARL focusing on ballistics sciences human sciences

information sciences materials sciences and mechanical sciences This biennial report summarizes the findings of the ARLTAB from the reviews conducted by the panels in 2015 and 2016 and subsumes the 2015 2016 interim report Cognitive Psychology Alan D. Baddeley, Niels Ole Bernsen, 1989 The papers in this series of five volumes provide a snapshot of current trends in European Cognitive Science Each of the volumes deals with problems in cognitive science from a different perspective covering the interacting disciplines of cognitive psychology logic and linguistics human computer interaction neuroscience and artificial intelligence respectively Based on the analysis and exposition of the state of the art in their various fields of expertise the contributors take a prospective look at the basic research problems confronting cognitive science over the next five to ten years Whilst the authors and editors do consider a wide range of research in their area they have been encouraged to give their personal view of important directions rather than a bland comprehensive list Although inevitably controversial this approach allows a stimulating review of the field and one which should inspire debate The highly interdisciplinary nature of cognitive science research means that many issues such as natural language or vision are explored from diverse perspectives in papers representing different disciplines Each contribution has been written in a way which makes it comprehensible to colleagues from neighbouring disciplines as well as students of cognitive science It will be particularly useful to graduate students contemplating research projects The work has been supported and coordinated by the research unit FAST Forecast and Assessment in Science and Technology of the EEC Commission in Brussels
