Realidad Virtual:

Realidad virtual inmersiva y aprendizaje basado en problemas Loaiza Zuluaga, Yasaldez Eder, García Duque, Bibiana, López Gutiérrez, Carlos Mario, 2023-07-19 Actualmente los entornos de realidad virtual inmersiva se han hecho más accesibles como medios de entrenamiento para el público en general prueba de esto es el reciente auge en el desarrollo de periféricos de realidad virtual inmersiva como el Ocul Rift, las Gear VR de Samsung y Google Cardboard que ponen estas tecnologías de nuevo como punto central para el desarrollo de aplicaciones en diferentes áreas del conocimiento sin embargo es pertinente preguntarse ¿Cómo pueden aprovechar los docentes esta contingencia para mejorar los procesos de enseñanza y de aprendizaje? Lo anterior implica que se requieren afirmaciones acordes con los problemas y necesidades reales del contexto educativo y que integren de forma eficiente el trabajo interdisciplinario de diversas áreas pedagógica, didáctica, ingeniería de software y diseños por ejemplo de tal suerte que se aporte a las necesidades individuales de los estudiantes como los requerimientos de autoregulación tal asunto se puede apoyar en procesos académicos apoyados en la realidad virtual inmersiva en tanto la inmersión facilita una nueva perspectiva ontológica, teleológica y teológica de la identidad de los seres humanos en el tiempo presente
