colonialism Eurocentrism shows how the powerful anti eurocentric tendencies of the marxian critique of civil society and the critical realist critique of philosophy have been misunderstood or ignored It develops the latent potential of these traditions to develop a systematically anti eurocentric approach to understanding and explaining modernity Tracking Discourses Annika Egan Sjölander,Jenny Gunnarsson Payne,2011-01-12 Written by researchers from a wide variety of disciplines this report explores the two most influential theoretical discourse traditions namely Discourse Theory and Critical Discourse Analysis Based on numerous Swedish and Scandinavian case studies this account reveals the usefulness of the study of discourse and exemplifies how the two discourse analytical perspectives can be combined to offer diverse and problem oriented strategies in the study of politics identity and social change Rethinking Marxism Jolyon Agar,2014-02-03 First published in 2006 Routledge is an imprint of Taylor Francis an informa company **Handbook of Local and Regional Development** Andy Pike,Andres Rodriguez-Pose,John Tomaney,2010-11-17 The Handbook of Local and Regional Development provides a comprehensive statement and reference point for local and regional development The scope of this Handbook s coverage and contributions engages with and reflects upon the politics and policy of how we think about and practise local and regional development encouraging dialogue across the disciplinary barriers between notions of local and regional development in the Global North and development studies in the Global South This Handbook is organized into seven inter related sections with an introductory chapter setting out the rationale aims and structure of the Handbook Section one situates local and regional development in its global context Section two establishes the key issues in understanding the principles and values that help us define what is meant by local and regional development Section three critically reviews the current diversity and variety of conceptual and theoretical approaches to local and regional development Section four address questions of government and governance Section five connects critically with the array of contemporary approaches to local and regional development policy Section six is an explicitly global review of perspectives on local and regional development from Africa Asia Pacific Europe Latin America and North America Section seven provides reflection and discussion of the futures for local and regional development in an international and multidisciplinary context With over forty contributions from leading international scholars in the field this Handbook provides critical reviews and appraisals of current state of the art conceptual and theoretical approaches and future developments in local and regional development *Heritage, Communities and Archaeology* Laurajane Smith,Emma Waterton,2013-11-20 This book traces the development of community archaeology identifying both its advantages and disadvantages by describing how and why tensions have arisen between archaeological and community understandings of the past The focus of this book is the conceptual disjunction between heritage and data and the problems this poses for both archaeologists and communities in communicating and engaging with each other In order to explain the extent of the miscommunication that can occur the authors examine the ways in which a range of community groups including communities of expertise define and negotiate

memory and identity. Importantly they explore the ways in which these expressions are used or are taken up in struggles over cultural recognition and ultimately the practical ethical political and theoretical implications this has for archaeologists engaging in community work. Finally they argue that there are very real advantages for archaeological research theory and practice to be gained from engaging with communities.

Method in Social Science Andrew Sayer, 2010-12-31 In its second edition *Method in Social Science* was widely praised for its penetrating analysis of central questions in social science discourse. This revised edition comes with a new preface and a full bibliography. The book is intended for students and researchers familiar with social science but having little or no previous experiences of philosophical and methodological discussion and for those who are interested in realism and method.

Contrastive Analysis of News Text Types in Russian, British and American Business Online and Print Media Anastasiya Kornetzki, 2012-03-01 This book is devoted to the analysis of cross media and cross cultural peculiarities of Russian British and American media discourse from the intertextual perspective. The study of a complex variety of intertextual links which exist between texts and genres is a contemporary aspect in the theory of intertextuality. There are numerous theoretical approaches in the study of intertextuality but there is a lack of an empirically profound framework for its analysis across many disciplines. An interdisciplinary approach to the study of intertextuality is a necessary step to investigate this phenomenon comprehensively. This book offers an alternative approach to the study of intertextuality singling out intra textual textual and inter genre levels on which this phenomenon comes to the fore.

State Power Bob Jessop, 2013-04-26 Bob Jessop presents an up to date account of his distinctive approach to the dialectics of structure and strategy in the exercise of state power. While his earlier work critically surveys other state theories this book focuses on the development of his own strategic relational approach. It introduces its main sources outlines its development applies this approach to four case studies and sketches a strategic relational research agenda. Thus the book presents a comprehensive theoretical statement of the approach and guidelines for its application. Key features of the book include an account of the authors theoretical development a review of recent developments in state theory and the cultural turn in political economy critical strategic relational readings of major state theorists Marx on political representation Gramsci on the spatiality of state power Poulantzas on the state as a social relation and the later Foucault on statecraft applications of the strategic relational approach to important issues concerning the contemporary state its gendered selectivity the future of the national state the states temporal sovereignty and the relevance of multi scalar meta governance in Europe for the more general future of the state. The book concludes with recommendations for future strategic relational research in political economy and state theory.

New Materialist Explorations into Language Education Johanna Ennser-Kananen, Taina Saarinen, 2022-10-10 This open access book analyzes language education through a socio material framework. The authors revisit their position as researchers by decentering themselves and humans in general from the main focus of research activities and giving way to the materialities that are agentive but often overlooked.

parts of our research contexts and processes Through this critical posthumanist realism they are able to engage in research that sees society as an ethical interrelationship between humans and the material world and explore the socio materialities of language education from the perspectives of material agency spatial and embodied materiality and human and non human assemblages Each chapter explores language educational contexts through a unique lens of socio materiality Based on how the authors conceptualize socio materiality the book is organized in three sections that seek answers to the following overarching questions In what ways do material agencies emerge in language educational contexts How are educational choices and experiences intertwined with materialities of spaces and bodies What assemblages of human and non human may occur in language education contexts Each chapter questions in its own way the notion of the human subject as rational enlightened being and sole possessor of agency and offers examples of allowing for other than human agency to enter the picture Together the contributors exemplify how researchers who have been committed to social constructionist thinking for most of their careers learn to make space for new theories thus inspiring and encouraging readers to remain open for new intellectual and embodied endeavors

Part One: Influential Traditions underpinning qualitative research: positivism, interpretivism, pragmatism, constructionism, critical poststructuralism, hermeneutics, postcolonialism, critical realism, mixed methods, grounded theory, feminist and indigenous approaches. Part Two: Research Designs: ethnography, field research, action research, case studies, process and practice methodologies. Part Three: The Researcher: positionality, reflexivity, ethics, gender and intersectionality, writing from the body and achieving critical distance. Part Four: Challenges: research design, access and departure, choosing participants, research across boundaries, writing for different audiences, ethics in international research, digital ethics and publishing qualitative research. Volume Two: Methods and Challenges. Part One: Contemporary methods: interviews, archival analysis, autoethnography, rhetoric, historical stories and narratives, discourse analysis, group methods, sociomateriality, fiction, metaphors, dramaturgy, diary, shadowing and thematic analysis. From philosophy and social sciences to artificial intelligence and computer science, ontology is gaining interdisciplinary influence as a popular tool for applied research. *Contributions to Social Ontology* focuses specifically on these developments within the social

sciences The contributions reveal that this revived interest in social ontology involves far more than an unquestioning acceptance or application of the concepts and methods of academic philosophers Instead as ontology permeates so many new areas social ontology itself is evolving in new and fascinating ways This book engages with these new developments pushing it forward with cutting edge new material from leading authors in this area from Roy Bhaskar to Margaret Archer It also explicitly analyzes the relationship between the new ontological projects and the more traditional approaches This book will be of great interest to students and researchers alike across the social sciences and particularly in philosophy economics and sociology

Interpretation and Social Knowledge Isaac Ariail Reed, 2024-05-31 For the past fifty years anxiety over naturalism has driven debates in social theory One side sees social science as another kind of natural science while the other rejects the possibility of objective and explanatory knowledge *Interpretation and Social Knowledge* suggests a different route offering a way forward for an antinaturalist sociology that overcomes the opposition between interpretation and explanation and uses theory to build concrete historically specific causal explanations of social phenomena
