Anthropology and Lacanian Psychoanalysis Lenart Kodre, 2025-03-15 Was Edward Sapir's perspective on culture and personality groundbreaking or should we regard it as just one more theory that reached a scientific dead end Exploring the Interplay of Edward Sapir's Anthropology and Lacanian Psychoanalysis Culture and Subjectivity introduces a fresh

perspective to traditional anthropological discourse by exploring Edward Sapir's insights into culture and personality relationship alongside Jacques Lacan's theories on the individual and collective. This book reassesses the dynamics between subjective and social realms paving the way for potentially a new anthropological model of subjectivity and the definition of culture. Exploring the historical context of anthropology psychoanalysis relationships this book synthesizes diverse conceptions of culture and personality through an interdisciplinary lens. By leveraging Lacan's theoretical framework to interpret Sapir's bold ideas on the culture personality dyad it assesses integrating Lacanian subjectivity into the culture individual relationship bridging commonalities between the two fields and introducing insights into their interdisciplinary interplay. This book summarizes key findings from Lacanian subjectivity theory and examines a new perspective on the process of cultural transmission and socialization by highlighting Sapir's pioneering view on the relationship between the individual and society. It also addresses ontological epistemological and methodological questions in anthropology through Lacanian dynamics of desire.

Colonial Madness Richard C. Keller, 2008-09-15 Nineteenth century French writers and travelers imagined Muslim colonies in North Africa to be realms of savage violence lurid sexuality and primitive madness. Colonial Madness traces the genealogy and development of this idea from the beginnings of colonial expansion to the present revealing the ways in which psychiatry has been at once a weapon in the arsenal of colonial racism an innovative branch of medical science and a mechanism for negotiating the meaning of difference for republican citizenship. Drawing from extensive archival research and fieldwork in France and North Africa Richard Keller offers much more than a history of colonial psychology. Colonial Madness explores the notion of what French thinkers saw as an inherent mental intellectual and behavioral rift marked by the Mediterranean as well as the idea of the colonies as an experimental space freed from the limitations of metropolitan society and reason. These ideas have modern relevance Keller argues reflected in French thought about race and debates over immigration and France's postcolonial legacy.
