**Reality Through the Looking-glass** C. J. S. Clarke, 1996      Reality Through the Looking-glass C. J. S. Clarke, 1996 The author argues that the picture of the world constructed by traditional science a collection of particles rushing through the void is no more than one particular model of the universe In our century a radically new way of looking at reality has been opened up by quantum theory with its image of humanity in dialogue with nature      **The Cambridge Companion to Postmodernism** Steven Connor, 2004-07-15 The Cambridge Companion to Postmodernism offers a comprehensive introduction to postmodernism The Companion examines the different aspects of postmodernist thought and culture that have had a significant impact on contemporary cultural production and thinking Topics discussed by experts in the field include postmodernism's relation to modernity and its significance and relevance to literature film law philosophy architecture religion and modern cultural studies The volume also includes a useful guide to further reading and a chronology This is an essential aid for students and teachers from a range of disciplines interested in postmodernism in all its incarnations Accessible and comprehensive this Companion addresses the many issues surrounding this elusive enigmatic and often controversial topic      *The Resurgence of the Real* Charlene Spretnak, 2012-09-10 In this insightful beautifully written work one of America's most important feminist ecological thinkers reflects on the roots of modernity in Renaissance humanism the Reformation the Scientific Revolution and the Enlightenment Spretnak argues that an ecological postmodern ethos is emerging in the 1990s the creative cosmos and the complex sense of place Both a sharp critique and a graceful performance of the art of the possible *The Resurgence of the Real* changes the way we think about living in the modern world

**Levinas and the Other in Psychotherapy and Counselling** Del Loewenthal, 2022-11-28 For Emmanuel Levinas the danger of Western thought is that if we start with ourselves we end with ourselves Psychotherapy and counselling would be for the sole purpose of strengthening self initiated and self directed fulfilment resulting in individual and societal forms of totalitarianism Levinas suggests that ethics should be about putting the Other first but not in some fundamentalist Christian sense of the self choosing to give one's life for others The origin of authentic ethical behaviour is not from the self but from the Other Levinas offers us a fundamental shift in our thinking about therapeutic practices His writings call on us to have an ethical responsibility in the very way we practice therapy This is with all the complexities of negotiating from nearness and distance involvement and boundaries and how we view ourselves in attempting to do this Levinas inspires us towards ontological epistemological and methodological shifts The attempt to put the Other first can significantly change our notion of being It can help us be taken away from the dangers of a therapy based on ego psychology which seems to permeate so much of our therapies whether classified as humanistic psychoanalytic behavioural or existential All except the Introduction and two of the chapters were originally published in the *European Journal of Psychotherapy and Counselling*      *Handbook of Action Research* Peter Reason, Hilary Bradbury, 2006-01-17 With the *Handbook of Action Research* hailed as a turning

point in how action research is framed and understood by scholars this student edition has been structured to provide an easy inroad into the field for researchers and students It includes concise chapter summaries and an informative introduction that draws together the different strands of action research and reveals their diverse applications as well as their interrelations Divided into four parts there are important themes of thinking and practice running throughout

**Investigating Phenomenal Consciousness** Max Velmans,2000-11-29 How can one investigate phenomenal consciousness As in other areas of science the investigation of consciousness aims for a more precise knowledge of its phenomena and the discovery of general truths about their nature This requires the development of appropriate first person second person and third person methods This book introduces some of the creative ways in which these methods can be applied to different purposes e g to understanding the relation of consciousness to brain to examining or changing consciousness as such and to understanding the way consciousness is influenced by social clinical and therapeutic contexts To clarify the strengths and weaknesses of different methods and to demonstrate the interplay of methodology and epistemology the book also suggests a number of maps of the consciousness studies terrain that place different approaches to the study of consciousness into a broader interdisciplinary context Series A

**From Monk to Modernity, Second Edition** Dominic Kirkham,2019-01-08 After spending many years in a religious order Dominic Kirkham describes how he was driven to meet the challenge of modern thinking an exercise that has proved both freeing and frightening He says this has been something of a personal odyssey which now spans a lifetime of over six decades and is still ongoing He adds that the presumption of the book is that this is of more than personal interest because the subject matter affects everyone my personal journey will no doubt reflect that of many others In a broad sweep from Neolithic times to the twenty first century he considers our human quest for meaning and a good life and how we can engage in it today

**Sacred Longings** Mary C. Grey, 2004 This book explores what is happening to the human spirit in a culture shaped and driven by globalization a culture where dreams imaginations and desires are all manipulated What do we really want Noted theologian Mary Grey believes we have gotten out of touch with our deepest desires and that the root problem is our acquiescence in global capitalism s most problematic characteristics Story and symbol she argues can put us back in touch with our sacred longings Focusing on such simple yet profound symbols as water light and sacred space she tries to reinstill a spiritual quest In the end she envisions spirituality a kind of ecomystical renewal as an element in the transformation of desire lived out in Christian community For desire to be reborn for sacred longings even to be named not to mention fulfilled there needs to be an embracing of the way of renunciation simplicity and sacrifice And that is counter cultural As Part One looks at how our culture has lost heart and Part Two analyzes restless hearts Part Three asks us to take heart and rekindle our thirst for righteousness

**Why Genes Are Not Selfish and People Are Nice** Colin Tudge, 2013-03-21 The modern world is dominated by ideas that are threatening to kill us that life is one long battle from conception to grave that all creatures including human beings are driven by their selfish DNA that the universe is just stuff for us to use at will These ideas are seen as emerging from science and hard nosed philosophy and become self fulfilling They have led us to create a world in perpetual strife that is unjust and in many ways precarious This remarkable book by an experienced author and thinker argues there s another way of looking at the world that is just as rooted in modern science and yet says precisely the opposite that life is in fact cooperative all creatures including human beings are basically nice that there s more to the stuff of the world than meets the eye This book is both a powerful call to rethink our assumptions and a message of hope for those who believe we re doomed to self destruction
