Reality Therapy In Action:

Reality Therapy in Action William Glasser, 1999-12-08 Dr Glasser's therapy is based on inescapable truths. Meaningful relationships are central to the good life; the choices we make will determine their quality and we can only create them if we take responsibility for ourselves without controlling the other person. His vivid stories and dialogues illustrate how to go about creating a good life. From the foreword by Peter Breggin M.D. In this long-awaited continuation of his most successful book *Reality Therapy*, Dr William Glasser takes readers into his consulting room and illustrates through a series of conversations with his patients exactly how he puts his popular therapeutic theories into practice. Dr Glasser introduces us to, among others, Jerry who is trying to overcome his obsessive compulsive disorder, Bea and Jim a couple who want to rebuild their relationship after Jim's affair, and Roger an alcoholic in desperate need of a meaningful relationship. These vivid, almost novelistic case histories bring Dr Glasser's new version of this therapy to life and show readers how to get rid of the controlling, punishing, 'I know what's right for you' psychology that crops up in most situations when people face conflict with one another. Practical and readable, *Reality Therapy in Action* is Dr Glasser's most accessible book in years. **Control**

Theory in the Practice of Reality Therapy Naomi Glasser, William Glasser, 1989 Dr William Glasser's bestselling theories of Reality Therapy and Control Theory are put into action in a series of fascinating case studies. Each case shows successful resolutions to help therapists learn how these treatments complement each other. **Reality Therapy: Theory & Practice** Leon Lojk, Bosiljka Boba Lojk, Besides Scientific Argument of Reality Therapy written by Leon Lojk, reality therapy has never actually been presented in a broader theoretical context. In addition to deepening understanding of total behaviour or understanding of the organism as an operationally closed self-regulating system, understanding of personality, the relationship between the individual and their environment, understanding the concept of relationships in light of choice theory, the beliefs about human behaviour that underlie our actions, and understanding mental health. *Theory and the Practice of Reality Therapy* by Leon and Boba Lojk presents reality therapy in relation to other psychotherapeutic approaches through some similarities and differences between them. Group reality therapy was presented in a similar way. With regard to the reality therapy theory of practice, so far only structured/procedural reality therapy has been available in the literature. Glasser called it the old reality therapy and advocated therapy using choice theory which he called the new reality therapy. This is the authentic approach of the therapist who himself lives in accordance with choice theory beliefs which requires profound changes in the understanding of human behaviour. Until now it has not been possible to find a description in the literature of how the process of new reality therapy flows, except for the author's practical presentation of working with clients. These pages present for the first time the new reality therapy theory of practice through formulation, the relationship between therapist and client, and the theory of change in reality therapy. How reality therapy looks in practice is evident from practical examples of working with clients. The offered reading is certainly welcome to participants in reality therapy training and to

reality therapists practitioners and those who want to learn more about this approach

Values Clarification in Counseling and Psychotherapy Howard Kirschenbaum, 2013-03-06. This work meets a long-standing need in the helping professions by being the first and only comprehensive book on how counselors and psychotherapists can work with clients around values, goal setting, decision making, and action planning. Helping clients determine their priorities, set goals, make decisions, and take action to improve their lives are common tasks for virtually all helping professionals when engaging with clients. This is the process known as values clarification or Values Clarification. While counselors and psychotherapists widely practice values clarification, some knowingly, others unaware, they typically do so with a limited understanding of its theory, methods, and various applications. This book demonstrates with great precision, case studies, and hundreds of clinical examples how counselors and psychotherapists in many fields can ask good clarifying questions, conduct clarifying interviews, and employ dozens of values clarification strategies with individuals, couples, families, and groups. To illustrate how values clarification can be used to explore a myriad of counseling topics, the examples throughout the text are often grouped around more specific applications for marriage and family counseling, career counseling, substance abuse and recovery counseling, geriatric counseling, grief counseling, pastoral counseling, financial counseling, school counseling, rehabilitation counseling, counselor clinical education and supervision, health counseling, and personal growth. There are clear descriptions of what values clarification is and is not, theory and research, multicultural and diversity issues, and how counselors and therapists can handle value and moral conflicts with clients. Values clarification is compared and contrasted to other approaches to counseling and psychotherapy, including person-centered, cognitive-behavioral, reality therapy, choice theory, existential, individual psychology, solution-focused, narrative, motivational interviewing, acceptance and commitment therapy, appreciative inquiry, life coaching, and positive psychology. *Special Action Office Monograph*, United States. Special Action Office for Drug Abuse Prevention, 1975.
