Henry, 2023-04-03 *News from the Unconscious Realm* is an extensive collection of vivid news dispatches from the dream world If the experiences we have in our sleep are just as valid as waking life these reports are of vital interest Far from being imaginary the unconscious is full of ideas and actions and it is literally the source of our conscious world the pool that material reality emerges from The opposite of breaking news these stories presented in hard nosed journalism format have helped to bring our world into existence *Climate Development and History of the North Atlantic Realm* Gerold

Wefer, Wolfgang H. Berger, Karl-Ernst Behre, Eystein Jansen, 2013-03-09 The global environment is changing rapidly under the impact of human activities and an important element of this change is related to global climate modification Can the study of climate and history help in devising strategies for coping with this change What might be the type of information most useful in this context What are the pitfalls awaiting the unwary These are the kinds of questions that led us to bring together experts from the natural and social sciences with a strong interest in history to promote discussion between workers in different disciplines by focussing on a common topic of great interest to society The meeting was arranged in the framework of a Hanse Conference within the interdisciplinary program of the Hanse Wissenschaftskolleg a foundation set up to promote interdisciplinary studies in collaboration between the universities of Bremen and Oldenburg The aim of the Hanse Conferences in general is to provide opportunities for experts from different fields of the sciences and humanities to come together and explore the larger framework of topics of common interest What unites the participants is their desire to look over the fence

to neighboring disciplines Young colleagues who wish to build an interdisciplinary career are particularly welcome In the Hanse Conference on Climate and History we have endeavoured to build bridges between the climate sciences and the sociological sciences concerned with environmental impacts on human activities The geological sciences we felt are especially well suited to the purpose because they already comprise historical aspects

Your 100 Day Prayer John I. Snyder, 2011-09-13 Readers are guided through 100 days of intentional prayer and biblical truth that transform their spiritual lives and reveal God's provision for their needs Anything worth having in this life is worth waiting for and worth striving for Unlike the world though Christians are called to a much different kind of pursuit when they survey their dreams desires and needs Instead of an indulgent wish list Christians are called to live a transformed life where they become more like Christ through the journey of striving after God's will In a time when both the world and even some Christians preach instant gratification *Your 100 Day Prayer* offers another path one of transformation while asking seeking and knocking for deep desires and desperate needs There is nothing guaranteed about 100 days but as author John Snyder says This sustained stubborn never give up spirit of prayer is not so much to persuade God to give us what we want but rather to transform us in the process *Your 100 Day Prayer* helps readers combine their need with God's will in a measured structured and instructional experience that results in greater spiritual maturity clarity about God's provision and real answers to their very real needs Because our Father in heaven gives good gifts to those who ask him Matthew 7:11

Plant Intelligence and the Imaginal Realm Stephen Harrod Buhner, 2014-05-14 A manual for opening the doors of perception and directly engaging the intelligence of the Natural World Provides exercises to directly perceive and interact with the complex living self organizing being that is Gaia Reveals that every life form on Earth is highly intelligent and communicative Examines the ecological function of invasive plants bacterial resistance to antibiotics psychotropic plants and fungi and the human species In *Plant Intelligence and the Imaginal Realm* Stephen Harrod Buhner reveals that all life forms on Earth possess intelligence language a sense of I and not I and the capacity to dream He shows that by consciously opening the doors of perception we can reconnect with the living intelligences in Nature as kindred beings become again wild scientists nondomesticated explorers of a Gaian world just as Goethe Barbara McClintock James Lovelock and others have done For as Einstein commented We cannot solve the problems facing us by using the same kind of thinking that created them Buhner explains how to use analogical thinking and imaginal perception to directly experience the inherent meanings that flow through the world that are expressed from each living form that surrounds us and to directly initiate communication in return He delves deeply into the ecological function of invasive plants bacterial resistance to antibiotics psychotropic plants and fungi and most importantly the human species itself He shows that human beings are not a plague on the planet they have a specific ecological function as important to Gaia as that of plants and bacteria Buhner shows that the capacity for depth connection and meaning filled communication with the living world is inherent in every human being It is as natural as breathing as the

beating of our own hearts as our own desire for intimacy and love We can change how we think and in so doing begin to address the difficulties of our times
