Reason's Muse Geneviève Fraisse, 1994-05-28 The French Revolution proclaimed the equality of all human beings yet women remained less than equal in the new society The exclusion of women at the birth of modern democracy required considerable justification and by tracing the course of this reasoning through early nineteenth century texts Genevieve Fraisse maps a moment of crisis in the history of sexual difference Through an analysis of literary religious legal philosophical and medical texts Fraisse links a range of positions on women's proper role in society to specific historical and rhetorical circumstances She shows how the Revolution marked a sharp break in the way women were represented in language as traditional bantering about the war of the sexes gave way to serious discussions of the political and social meanings of sexual difference Following this discussion on three different planes the economical the political and the biological Fraisse looks at the exclusion of women against the backdrop of democracy's inevitable lie the affirmation of an

equality so abstract it was impossible to concretely apply This study of the place of sexual equality in the founding moment of democracy offers insight into a persistent question whether female emancipation is to be found through the achievement of equality with men or in the celebration of female difference

Strategic Rivalries in

World Politics Michael P. Colaresi,Karen Rasler,William R. Thompson,2008-01-10 International conflict is neither random nor inexplicable It is highly structured by antagonisms between a relatively small set of states that regard each other as rivals Examining the 173 strategic rivalries in operation throughout the nineteenth and twentieth centuries this book identifies the differences rivalries make in the probability of conflict escalation and analyzes how they interact with serial crises arms races alliances and capability advantages The authors distinguish between rivalries concerning territorial disagreement space and rivalries concerning status and influence position and show how each leads to markedly different patterns of conflict escalation They argue that rivals are more likely to engage in international conflict with their antagonists than non rival pairs of states and conclude with an assessment of whether we can expect democratic peace economic development and economic interdependence to constrain rivalry induced conflict

René Girard and the Western

Philosophical Tradition, volume 1 Andreas Wilmes,George A. Dunn,2024-07-01 This edited volume situates Ren Girard in relation to the Western philosophical tradition Each chapter engages the French anthropologist in dialogue with a key figure from the history of Western philosophy from Plato to Kierkegaard The pivotal question of Ren Girard and the Western Philosophical Tradition revolves around Girard s assertion Since the attempt to understand religion on the basis of philosophy has failed we ought to try the reverse method and read philosophy in the light of religion Major philosophers influenced Girard and contributed valuable insights into questions of desire religion violence and the sacred At the same time he felt that Western philosophy often if not always neglected the founding violence that lies at the origin of culture This is the first collective scholarly effort at situating Ren Girard in relation to the Western philosophical tradition Volume 1 features

Thompson, Kentaro Sakuwa, Prashant Hosur Suhas, 2021-11-20 Strategic rivalries are contests between states that view one another as threatening competitors and treat each other as enemies A disproportionate amount of interstate conflict is generated by a relatively small number of these pairs of states engaged in rivalries that can persist for years Thus to understand interstate peace and conflict it is useful to know how rivalries work in general and more specifically In the past two decades a strenuous effort has been mounted to introduce the concept of rivalry and demonstrate its utility in unraveling conflict situations Yet all rivalries are not exactly alike We need to move to a more rewarding differentiation of how they differ in general Principal rivalries are those antagonisms that are most significant to the decision makers in a state The main distinction on issues about which rivals dispute are positional and spatial concerns Positional rivalries contend over regional and global influence Spatial rivals contend over which state deserves to control disputed territory Interventionary rivalries predominate in sub Saharan Africa Their primary focus involves neighboring states attempting to influence who rules and how co ethnics are treated This book updates the inventory of strategic rivalries from 1816 to 2020 Principal rivalries are identified for the first time and cover the same period A theory stressing the two main types of rivalry positional and spatial is elaborated and tested Regional variations on the origins and terminations of spatial rivalry are explored and interpreted In addition attention is paid to fluctuations in the intensity of positional rivalries by examining the working of the contemporary major power triangle United States Soviet Union Russia and China and more generally the dynamics of regional power that are rising in terms of their relative capability and status in the system Variations in cooperation and termination dynamics both in general and according to rivalry type are also examined Overall the emphases of the book are split between demonstrating the utility of distinguishing among rivalry types and examining selected rivalry dynamics The Interpretation of The Meaning of The Holy Quran Volume 41 - Surah Al Hajj' Nasoha Bin Saabin, I have written many books and articles on various topics but since 2013 I have devoted myself fully in writing the interpretation of the Holy Quran in English and with the grace of Allah I have completed the whole Quran on 29th October 2020 with 84 books I believe there is a great need in the whole world for the correct interpretation of the Holy Quran to be written in English Currently there is a great misunderstanding about Islam among Muslims and non Muslims globally The misunderstanding of the meaning of the Holy Quran among Muslims will lead to the wrong practice of Islam which leads to the wrong actions of Muslims The wrong actions of Muslims will lead to misunderstandings about Islam among Muslims and non Muslims The wrong actions of the Muslims have led to many miseries and wars among Muslims The wrong actions of Muslims have also led to many wars and clashes between Muslims and non Muslims In order to avoid miseries wars and clashes from taking place between the whole
