## **Reasonable Risk Alcohol In Perspective:**

Reasonable Risk Marjana Martinic, Barbara C. Leigh, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company      **Reasonable Risk** Barbara Leigh, Marjana Martinic, 2004-01-01 Reasonable Risk examines the concept of risk as it applies to everyday life in general and to alcohol consumption specifically The book addresses how we assess risks and benefits and the strategies we use to manage them It examines the elements that shape our perceptions of risk cultural influences social factors and how we are presented with information about risk The final chapter of the book focuses on the role of risk in policy formulation examining in particular how alcohol policies are developed within the context of individual and societal responsibility      Corporate Social Responsibility and Alcohol Marcus Grant, Joyce O'Connor, 2013-05-13 Increased scrutiny on the part of the general public media and government has warranted a reexamination of corporate responsibilities standards of accountability the company's role in its local and extended community and its ethical position in our society and culture Corporate Social Responsibility and Alcohol considers the basic values ethics policies and practices of a company's business Particular attention will be paid to the alcohol beverage industry and the many unique issues that are specific to this business such as responsible marketing promotional and advertising campaigns and strategies the particular risks inherent in any alcoholic product issues of abuse prevention research and legal and ethical aspects of alcohol This will be the seventh volume in the ICAP Series on Alcohol in Society      **Drinking in Context** Gerry Stimson, Marcus Grant, Marie Choquet, Preston Garrison, 2013-05-13 Drinking beverage alcohol is a widespread source of individual and social pleasure in most countries around the world Yet some drinking patterns can lead to serious physical mental and social harms Drinking in Context is intended to complement existing volumes dealing with international alcohol policy by focusing on three main themes drinking patterns targeted interventions and partnership development An understanding that patterns of drinking are important predictors of outcomes has led to a growing realization that alcohol policies and prevention strategies need to focus on excessive or irresponsible drinking As a result there has been a shift towards interventions that address the targeted reduction of harm These approaches recognize socio cultural differences and avoid trying to impose a one size fits all solution In this context multi stakeholder partnerships offer an excellent opportunity to promote the complex mix of measures required by each society Shared responsibilities lead to shared solutions      **Expressions of Drunkenness (Four Hundred Rabbits)** Anne Fox, Mike MacAvoy, 2011-01-07 The goal of this book is to contribute to the ongoing scholarly discussion on the very serious topic of drunkenness The phrase four hundred rabbits is one of many illustrations of the deep cultural religious and social influences on how individuals and communities view alcohol intoxication The Aztecs believed alcohol to have a divine origin with a god and goddess giving birth to 400 meaning innumerable in ancient Aztec divine children or rabbit gods each representing a varying degree and expression of alcohol intoxication and drunkenness Hence the book's subtitle which at first glance might seem light hearted

but in fact represents an in depth look at a weighty topic With such rooted sociocultural factors in mind the International Center for Alcohol Policies ICAP and DrinkWise Australia collaborated to prepare a publication that advances current understanding of the individual and collective meanings purposes and functions of drunkenness As the authors explain interpretations by different disciplines of the terms intoxication and drunkenness are often inconsistent The chapters of this book discuss intoxication and drunkenness from three perspectives biological cultural and social By placing intoxication and drunkenness into these contexts the book is able to offer language and conceptual tools to help advance the ongoing discussion on how best to reduce alcohol related harm and encourage responsible enjoyment of beverage alcohol Readers in need of an in depth understanding of the varied dimensions of extreme drunkenness will add this excellent resource to their personal library

Swimming with Crocodiles Marjana Martinic, Fiona Measham, 2008-06-19 There is evidence that a distinct pattern of alcohol consumption is emerging across the world and is a cause for concern because of its relationship with a range of health and social problems Its visibility particularly its high involvement of young people makes this not only an issue for public safety and order in many countries but also a highly contentious and politicized subject This book examines the rapid and heavy drinking behavior by

young people described in a number of countries positioning it within its appropriate social historical and cultural contexts The book argues in favor of a new term extreme drinking to fully encapsulate the many facets of this behavior taking into account the underlying motivations for the heavy excessive and unrestrained drinking patterns of many young people It also acknowledges the drinking process itself and accommodates greater focus on outcomes that are likely to follow In many ways extreme drinking is not so far removed from other extreme behaviors such as extreme sports all offer a challenge their pursuit is motivated by an expectation of pleasure and they are by design not without risk to those who engage in them others around them and society as a whole Edited by Marjana Martinic and Fiona Measham *Swimming with Crocodiles* is the ninth volume in the ICAP Book Series on Alcohol in Society The authors discuss the factors that motivate extreme drinking address the developmental cultural and historical contexts that have surrounded it and offer a new approach to addressing this behavior through prevention and policy The centerpiece of the book is a series of focus groups conducted with young people in Brazil China Italy Nigeria Russia South Africa and the United Kingdom which examine their views on extreme drinking motivations behind it and the cultural similarities and differences that exist conferring at once risk and protective factors

**Radiation Risks in Perspective** Kenneth L. Mossman, 2006-10-20 Public misperception of radiological risk consistently directs limited resources toward managing minimal or even phantom risks at great cost to government and industry with no measurable benefit to overall public health The public's inability to comprehend small theoretical risks arrived at through inherently uncertain formulae coupled with an ir

**Unmet Need in Psychiatry** Gavin Andrews,Scott Henderson,2000-01-06 This book considers ways to resolve the imbalance between the demand and supply of mental health services Treatment services in most countries reach only a minority of people identified as suffering from a mental disorder Few countries can provide adequate health services for all the mentally ill yet none has developed a rational system to decide who should be treated The questions are clear Could we develop a staged treatment process to reach all in need If not how do we decide who to treat What should the criteria be for deployment of scarce treatment resources How do we determine such criteria What are the ethical implications of applying such criteria In this pioneering work an international team of eminent psychiatrists epidemiologists health administrators economists and health planners examine these questions The result will inform and encourage all concerned with the equitable provision of mental health care

Developmental Science and the Holistic Approach Lars R. Bergman,Robert B. Cairns,Lars-Goran Nilsson,Lars Nystedt,2000-01-01 This book is the outcome of a symposium where leading researchers mainly in developmental psychology came together to discuss the implications of the emerging developmental science and the holistic approach In doing this the authors wanted to honor a distinguished colleague David Magnusson and his career long contributions to this field The purpose of the book is to discuss the profound implications for developmental science of the holistic paradigm especially with regard to the individual development within psychology Against the background of their own empirical theoretical or methodological research the authors have tried to identify what is needed for the developmental

theory and methods within this paradigm and discuss possibilities and limitations in relation to conventional approaches

**Neurobehavioral Toxicology: Neurological and Neuropsychological Perspectives, Volume III** Stanley Berent, James W. Albers, 2010-10-18 This is the final volume in a three volume work that has addressed the scientific methodologies relevant to clinical neurobehavioral toxicology Volume I focused on basic concepts and methodologies in Neurobehavioral Toxicology with Volume II focusing on the peripheral nervous system Volume III attends to what is known about industrial and environmental chemicals medicines and substances of abuse and how these agents affect the central nervous system All substances have the capacity to be toxic depending on factors that include the physical properties of the chemical or compound organism related variables or interaction between the two These substances on the other hand and as a result of these same factors might be used therapeutically or even recreationally The difference between medicine recreational drug or poison depends often on a careful balance between adverse and intended effects How to determine that a specified substance has caused harm is emphasized in the present volume by way of case examples and discussion Illnesses and behavioral variations that compete with toxicant induced explanations for findings in a given case as well as the various controversies that can arise around issues of diagnosis and causal determination are treated comprehensively in this volume

*Assessment of Risk from Low-Level Exposure to Radiation and Chemicals* A. D. Woodhead, 2013-11-21 The present workshop had its origins in discussions among Alexander Hollaender Oddvar Nygaard Donald Borg Richard Setlow and Victor Bond on the need for a symposium that would deal with a broad spectrum of pressing subjects related to the physics chemistry and biological actions of ionizing radiations and the theoretical and practical problems of risk assessment It soon became apparent that the spectrum of subjects considered was too broad for the desired depth of coverage in fact it seemed unlikely that the conference participants would have the background knowledge to span the gamut Therefore two separate meetings were decided upon the first of which Comparison of Mechanisms of Carcinogenesis by Radiation and Chemical Agents was held at the National Bureau of Standards Gaithersburg on December 6 7 1983 The meeting was sponsored by the NCI The second meeting has emerged as the present workshop at Brookhaven National Laboratory An interface between the two conferences has been provided by Michael Fry and Donald Borg who have summarized the salient points emanating from the NCI Symposium We intended that the first conference should focus on the basic mechanisms of radiation and chemical carcinogenesis while the second the present meeting would emphasize exposure response relationships particularly the theoretical and practical similarities and differences between exposure to chemical carcinogens compared to exposure to ionizing radiation
