**Art for an Undivided Earth** Jessica L. Horton, 2017-05-18 In *Art for an Undivided Earth* Jessica L Horton reveals how the spatial philosophies underlying the American Indian Movement AIM were refigured by a generation of artists searching for new places to stand Upending the assumption that Jimmie Durham James Luna Kay WalkingStick Robert Houle and others were primarily concerned with identity politics she joins them in remapping the coordinates of a widely shared yet deeply contested modernity that is defined in great part by the colonization of the Americas She follows their installations performances and paintings across the ocean and back in time as they retrace the paths of Native diplomats scholars performers and objects in Europe after 1492 Along the way Horton intervenes in a range of theories about global modernisms Native American sovereignty racial difference archival logic artistic itinerancy and new materialisms Writing in creative dialogue with contemporary artists she builds a picture of a spatially temporally and materially interconnected world

an undivided earth      **Borders, Culture, and Globalization** Victor Konrad, Melissa Kelly, 2021-05-18 Border culture emerges through the intersection and engagement of imagination affinity and identity It is evident wherever boundaries separate or sort people and their goods ideas or other belongings It is the vessel of engagement between countries and peoples assuming many forms exuding a variety of expressions changing shapes but border culture does not disappear once it is developed and it may be visualized as a thread that runs throughout the process of globalization Border culture is conveyed in imaginaries and productions that are linked to borderland identities constructed in the borderlands These identities underlie the enforcement of control and resistance to power that also comprise border cultures Canada's borders in globalization offer an opportunity to explore the interplay of borders and culture identify the fundamental currents of border culture in motion and establish an approach to understanding how border culture is placed and replaced in globalization Published in English      *Collision* David Cecchetto, Nancy Cuthbert, Julie Lassonde, 2008-12-18 With very few exceptions interdisciplinary art and interarts practices examined as such including the perspective of artist researchers and not subsumed under a singular category of performance or visual art have until now been largely ignored While it would be simplistic to think that this collection somehow rectifies the piecemeal status of this discourse our wager is that this collection works towards presenting an understanding of this status as in a certain sense constitutive of the field Beginning with an introduction to the very multiplicities that compose and complicate interdisciplinary practices then moving into questions of body technology location movement space practice performativity aesthetics this collection covers an enormous amount while still retaining an overarching sense of unity in the context of the subject as a whole Each of these sections negotiates a series of interrelated collisions in order to address a range of theoretical positions as well as a variety of international and cultural perspectives In addition to addressing the notion of interdisciplinarity and the challenges of specific interarts practices this publication seeks to question how we might understand interarts practice in a way that does not exclude perspectives such as spirituality law political activism and community development to name only a few The inclusion of these disparate practices within this publication itself a site of collision of the poetic the conversational and the theoretical is thus not presented as an attempt to unify or normalize them but rather as a productive charting of their radical explosion a collision that is always a colliding      **Stereophonica** Gascia Ouzounian, 2021-02-16 Episodes in the transformation of our understanding of sound and space from binaural listening in the nineteenth century to contemporary sound art The relationship between sound and space has become central to both creative practices in music and sound art and contemporary scholarship on sound Entire subfields have emerged in connection to the spatial aspects of sound from spatial audio and sound installation to acoustic ecology and soundscape studies But how did our understanding of sound become spatial In *Stereophonica* Gascia Ouzounian examines a series of historical episodes that transformed ideas of sound and space from the advent of stereo technologies in the nineteenth century to visual representations of sonic environments

today Developing a uniquely interdisciplinary perspective Ouzounian draws on both the history of science and technology and the history of music and sound art She investigates the binaural apparatus that allowed nineteenth century listeners to observe sound in three dimensions examines the development of military technologies for sound location during World War I revisits experiments in stereo sound at Bell Telephone Laboratories in the 1930s and considers the creation of optimized acoustical environments for theaters and factories She explores the development of multichannel spatial music in the 1950s and sound installation art in the 1960s analyzes the mapping of soundscapes and investigates contemporary approaches to sonic urbanism sonic practices that reimagine urban environments through sound Rich in detail but accessible and engaging and generously illustrated with photographs drawings maps and diagrams of devices and artworks **Stereophonica** brings an acute imaginative and much needed historical sensibility to the growing literature around sound and space
