Hanegraaff, 2018-09-24 Recent years have seen mutually enriching a spectacular rise of the New Age movement and an ever increasing interest in its beliefs and manifestations This fascinating work presents the first ever comprehensive analysis of New Age Religion and its historical backgrounds thus providing the reader with a means of orientation in the bewildering variety of the movement Making extensive use of primary sources the author thematically analyses New Age beliefs from the perspective of the study of religions While looking at the historical backgrounds of the movement he convincingly argues that its foundations were laid by so called western esoteric traditions during the Renaissance Hanegraaff finally shows how the modern New Age movement emerged from the increasing secularization of those esoteric traditions during the 19th century This ground breaking publication is compulsive reading for all those involved or interested in the New Age movement **Understanding Gregory Bateson** Noel G. that is yet to happen In Science and the Akashic Field philosopher and scientist Ervin Laszlo conveys the essential element of this information field in language that is accessible and clear From the world of science he confirms our deepest intuitions of the oneness of creation in the Integral Theory of Everything We discover that as philosopher William James stated We are like islands in the sea separate on the surface but connected in the deep Seaweeds and their Role in Globally **Changing Environments** Alvaro Israel, Rachel Einav, Joseph Seckbach, 2010-06-18 Global warming is accelerating faster than the ability for natural repair and environmental stresses are damaging ecosystems all affecting physical and biological systems on Earth A new Nasa led study shows that human activity has caused climate changes resulting in permafrost thawing acid rain and lower productivity in lakes as well as increased emissions of greenhouse gases including CO2 N20 CH4 CF3 and CFC Marine plants play a vital role in maintaining the balance of marine environments while serving as a source of food for humankind and important chemical compounds Microalgae and seaweed have enormous potential for reducing global warming and climate change During photosynthesis algae grow draw CO2 from the atmosphere release oxygen and produce solar biofuel Experts in the life of marine plant ecosystems in globally changing environments contributed chapters to this book The target readers are phycologists ecologists atmospheric scholars conservationists environmentalists and The Gaia Hypothesis Michael Ruse, 2022-12-22 The book is full of empathetic insightful and ecologically aware laymen often very funny portraits of Margulis Lovelock and a community of other figures associated with Gaia Carla Nappi New Books in Science Technology and Society In 1965 English scientist James Lovelock had a flash of insight the Earth is not just teeming with life the Earth in some sense is life He mulled this revolutionary idea over for several years first with his close friend the novelist William Golding and then in an extensive collaboration with the American scientist Lynn Margulis In the early 1970s he finally went public with the Gaia hypothesis the idea that everything happens for an end the good of planet Earth Lovelock and Margulis were scorned by professional scientists but the general public enthusiastically embraced Lovelock and his hypothesis In The Gaia Hypothesis philosopher Michael Ruse with his characteristic clarity and wit uses Gaia and its history its supporters and detractors to illuminate the nature of science itself Gaia emerged in the 1960s a decade when authority was questioned and status and dignity stood for nothing but its story is much older Ruse traces Gaia s connection to Plato and a long history of goal directed and holistic or organicist thinking and explains why Lovelock and Margulis s peers rejected it as pseudoscience But Ruse also shows why the project was a success He argues that Lovelock and Margulis should be commended for giving philosophy firm scientific basis and for provoking important scientific discussion about the world as a whole its homeostasis or in this age of global environmental uncertainty its lack thereof Ruse s treatment is thought provoking and original as you would expect from this perceptive irrepressible philosopher of biology **Embracing the Witch and the Goddess** Kathryn Roundtree, Kathryn Rountree, 2004 Embracing the New Scientist Witch and the Goddess is a detailed survey of present day feminist witches in New Zealand It examines the attraction of

Publishers description Fackenthal, 2019-04-29 This book examines how the philosophy of Alfred North Whitehead a speculative philosopher from the first half of the twentieth century converses and entangles itself with continental philosophers of the twentieth and twenty first centuries around the question of a sustainable civilization in the present Chapters are focused around economic and environmental sustainability questions of how technology and systems relate to this sustainability relationships between human and nonhuman entities relationships among humans and how larger philosophical questions lead one to think differently about what the terms sustainable and civilization mean The book aims to uncover and explore ways in which the combination of these philosophies might provide the dislocations within thought that lead to novel ways of being and acting in the world Laudato Si Anthony Kelly, 2016-09-20 Pope Francis Laudato Si is a game changing document for the life of

the Church and the ecological health of this planet A Catholic vision is deficient if it does not include the earth and its life forms Loving one's neighbour must include loving the planetary neighbourhood in which all live For its part the integral ecology on which the Pope insists must include the dimensions of mind and heart science and art faith and the whole spiritual life of culture Here the great theological themes animating the Catholic vision play their part as ever renewable resources the Creator and the gift of creation the incarnation of the Word amongst us the inexhaustible life of the Trinity itself the Eucharist as communion with Christ in the here and now of earthly life just as Sister Death must be given her place for the sake of ecological and eschatological realism Integral ecology and Catholic vision are two sides of the conversion of mind and heart necessary to promote the communion of life now and in the world to come **Dogs That Know When Their Owners Are Coming Home** Rupert Sheldrake, 2011-04-26 With a scientist s mind and an animal lover s compassion world renowned biologist Rupert Sheldrake presents a groundbreaking exploration of animal behavior that will profoundly change the way we think about animals and ourselves How do cats know when it s time to go to the vet even before the cat carrier comes out How do dogs know when their owners are returning home at unexpected times How can horses find their way back to the stable over completely unfamiliar terrain After five years of extensive research involving thousands of people who have pets and work with animals Dr Sheldrake proves conclusively what many pet owners already know there is a strong connection between humans and animals that defies present day scientific understanding Sheldrake compellingly demonstrates that we and our pets are social animals linked together by invisible bonds connecting animals to each other to their owners and to their homes in powerful ways His provocative ideas about these social or morphic fields explain the uncanny behavior often observed in pets and help provide an explanation for amazing animal behavior in the wild such as migration and homing Dogs That Know When Their Owners Are Coming Home not only provides fascinating insight into animal and human behavior but also teaches us to question the boundaries of conventional scientific thought and shows that the very animals who are closest to us have much to teach us about biology nature and consciousness Transpersonal Ecosophy, Vol. 1: Theory, Methods and Clinical Assessments Mark A.
