Rebuilding Cities:

EcoCities Richard Register, 2006-04-01 Most of the world's population now lives in cities. So if we are to address the problems of environmental deterioration and peak oil adequately, the city has to be a major focus of attention. *EcoCities* is about rebuilding cities and towns based on ecological principles for the long-term sustainability, cultural vitality, and health of the Earth's biosphere. Unique in the literature is the book's insight that the form of the city really matters and that it is within our ability to change it and crucial that we do. Further, that the ecocity within its bioregion is comprehensible and doable and can produce a healthy and potentially happy future. *EcoCities* describes the place of the city in evolution, nature, and history. It pays special attention to the key question of accessibility and transportation and outlines design principles for the ecocity. The reader is encouraged to plunge in to its economics and politics, the kinds of businesses, planning, and leadership required. The book then outlines the tools by which a gradual transition to the ecocity could be accomplished. Throughout this new edition is generously illustrated with the author's own inspired visions of what such rebuilt cities might actually look like.

Rebuilding Cities from Medieval to Modern Times Percy Johnson-Marshall, 2017-07-12 Unique in the literature of planners, architects, and urban officials, *Rebuilding Cities* is a compendium and analysis of the achievements of city planning from the Ideal City of Palmanova in 1593 to the innovative achievements of planners and designers of the twentieth century. As such, it is vital reading for anyone concerned with the problem of rebuilding and revitalizing cities after disasters, either of a human or physical decimation. *Rebuilding Cities* covers and includes medieval nuclei to urban sprawl, physical, economic, and social factors in planning, and the changing nature of components of cities incorporating elements from different periods in a single visual scheme. Also included are analysis of planning schemes from Indian and Greek visionaries, legislative and administrative changes needed for successful planning, the massive redevelopment that happened in London after World War Two, renewal schemes, and urban design and work throughout the world. The remarkable clarity and thoroughness of the book and its abundant illustrations clearly demonstrate the successes and failures of planning schemes and lays a solid groundwork for intelligent assessment of the goals and practical possibilities of city planning. Teachers and students of planning and architecture professionals actively engaged in the field and all who visualize a truly civilized urban environment will find this book immensely helpful and satisfying.

Rebuilding Britain's Blitzed Cities Catherine Flinn, 2018-12-27 Many British cities were devastated by bombing during the Second World War and faced stark economic dilemmas concerning reconstruction, planning, and implementation after 1945. How did politicians, civil servants, and local authorities manage to produce the cities we live in today? *Rebuilding Britain's Blitzed Cities* examines the underlying processes and pressures, especially financial and bureaucratic, which shaped postwar urbanism in Britain. Catherine Flinn integrates architectural planning with in-depth economic and political analyses of Britain's blitzed cities for the first time. She examines early reconstruction arrangements, the postwar economic apparatus, and the challenges of postwar physical planning across the

country while providing insightful case studies from the cities of Hull Exeter and Liverpool By addressing the ideology versus the reality of reconstruction in postwar Britain *Rebuilding Britain's Blitzed Cities* highlights the importance of economic and political factors for understanding the British postwar built environment *A Modern History of European Cities* Rosemary Wakeman, 2020-01-23 Rosemary Wakeman's original survey text comprehensively explores modern European urban history from 1815 to the present day It provides a journey to cities and towns across the continent in search of the patterns of development that have shaped the urban landscape as indelibly European The focus is on the built environment the social and cultural transformations that mark the patterns of continuity and change and the transition to modern urban society Including over 60 images that serve to illuminate the analysis the book examines whether there is a European city and if so what are its characteristics Wakeman offers an interdisciplinary approach that incorporates concepts from cultural and postcolonial studies as well as urban geography and provides full coverage of urban society not only in western Europe but also in eastern and southern Europe using various cities and city types to inform the discussion The book provides detailed coverage of the often neglected urbanization post 1945 which allows us to more clearly understand the modernizing arc Europe has followed over the last two centuries

China's Eco-city Construction Jingyuan Li, Tongjin Yang, 2015-11-04 This book introduces the concept of Eco civilization highlights the construction and development of eco cities in China and assesses the achievements and shortcomings of China's eco city construction projects As both China and Western countries face an impending ecological crisis responding to that crisis is a common challenge for all human beings There is an overwhelming consensus among Chinese scholars that in order to successfully address the ecological crisis successfully we must establish an eco civilization and one important step toward accomplishing that goal is to plan and construct eco cities

The Sociology of Community Connections John G. Bruhn, 2011-07-18 Many of our current social problems have been attributed to the breakdown or loss of community as a place and to the fragmentation of connections due to an extreme value of individualism in the Western world particularly in the United States Not all scholars and researchers agree that individualism and technology are the primary culprits in the loss of community as it existed in the middle decade of the 20th century Nonetheless people exist in groups and connections are vital to their existence and in the daily performance of activities The second edition of the Sociology of Community Connections will identify and help students understand community connectedness in the present and future

Governance and Planning of Mega-City Regions

Jiang Xu,Anthony Yeh,2010-09-13 Provides a comparative treatment and examination of how new approaches in governance and planning are reshaping mega city regions around the world The contributors highlight how European mega city regions are evolving and strategic intervention redefined to enable the integration of urban qualities in a multi level governance environment how traditional federal countries in North America and Australia see the promise of major policies and development initiatives finally moving ahead to herald a more strategic intervention at national and regional scales and how transitional economies in China witness the rise of state strategies to control the articulation of scales and to reassert the functional importance of state in a growing diffused power context *Build Back Better* Toshihisa Toyoda,Jianping Wang,Yuka Kaneko,2021-11-16 International society led by the United Nations has been working to improve and standardize every country s post disaster recovery policy In particular the Sendai Framework for Disaster Risk Reduction adopted at the UN World Conference at Sendai Japan in 2015 declared the slogan Build Back Better BBB In this book the BBB is considered an essential common criterion for evaluating recovery status but BBB variations in each individual country s context are pursued In contrast to a governmental approach to recovery evaluation focusing mainly on physical structures and macro indicators this volume focuses more on the affected societies communities economies and especially victims livelihoods The authors are academics from diverse fields including governance law economics and engineering so that the book is truly interdisciplinary This collection results from an international collaboration by scholars from disaster affected universities in global scale mega disasters occurring in the Asian region in recent decades The universities include Kobe University in Japan Iwate University in Japan Syiah Kuala University in Aceh Indonesia Sichuan University in China and the University of the Philippines **Merchant of Illusion** Nicholas Dagen Bloom,2004 **The Practice of Modernism** John R. Gold,2007-06-13 Making extensive use of information gained from hours of in depth interviews with architects this new book examines the complex relationship between vision and subsequent practice in the saga of post war urban reconstruction
