ABSTRACT

Background

A strong primary health care system is the keystone of health care and helps patients manage their health conditions in the community, whilst also providing disease prevention services. Primary care is a continuously evolving specialty, with recent exciting innovations, aiming to improve all aspects of care and to meet people's needs and expectations.

Method

A search for articles focusing on the specific aspects of recent advances in primary health care was done using internet search engines. Articles were selected from primary and secondary literature sources, which included original research articles, review articles and other epidemiological studies.

Results

Recent advances in information technology, services and access, dealing with multimorbidity, academic family medicine, equity and outcome measures have all made an impact on the primary health care system and on meeting the ever-increasing challenges of modern society.

Conclusion

Primary health care is of extreme importance in having an efficient and effective health care system. As primary health care improves with recent advances, a positive effect is seen on the population's health, cost savings and health care disparities.

INTRODUCTION

The WHO Declaration of Alma-Ata represents a major step in the worldwide attention for primary care. This declaration highlighted the importance of developing, implementing and maintaining primary health care throughout the world, particularly in developing countries (World Health Organization, 1978).

The world has been changing since the Alma-Ata Declaration of 1978. By contrast with the financial optimism of developing nations in the 1970s, the days of straightforward concerns and priorities have vanished. The pattern of disease, care and treatment options are changing (World Health Organization, 2007). Infectious diseases (such as, for example, tuberculosis or malaria) are no longer the only problems affecting only the poor (Frenk, 2009; Brandtland, 2005) during 1995-2000, the overall tuberculosis rate in Malta increased mainly due to the large influx of migrants from high-prevalence countries and to the increasing ratio of migrant to Maltese TB cases (Pace-Asciak, Mamo and Calleja, 2012).

At a time of financial and economic turmoil, health care needs and demand for public services will increase, colliding with austerity measures and privatisation policies (Kondilis et al., 2013). There are no easy solutions to create health care sustainability across and beyond Europe (Mamo, 2012). In view of these emerging public health challenges, decision makers are looking for solutions to achieve more cost-effective and better-coordinated care. One possible solution is implementing and maintaining high-quality primary care (QUALICOPE Consortium, 2012; Schäfer, 2013).

METHOD

A search for articles focusing on the specific aspects of recent advances in primary health care was done using the internet search engines PubMed, Medline Plus and Google Scholar. The keywords used while searching were 'recent advances', 'primary care', 'information technology', 'services and access', 'dealing with multimorbidity', 'academic family medicine', 'equity' and 'outcome measures'. Articles were selected from primary and secondary literature sources, which included original research articles, review articles and other epidemiological studies.

Precision medicine: recent advances, current challenges and future perspectives Oriana Awwad, Mamoun Ahram, Mariam Abdel Jalil, Francesca Coperchini, 2024-06-18 Personalized medicine precision medicine is an evolving field that comprises medical interventions tailored to individuals or groups of patients It is designed to facilitate enhanced screening and earlier disease detection more precise disease diagnosis and improved treatment Personalized medicine allows patients to receive specific therapies that work best for them aiming for more effective treatment better outcomes safer clinical managements and more efficient health systems

Recent Advances in Neurotraumatology Norio Nakamura, Takuo Hashimoto, Masaharu Yasue, 2012-12-06 The dawn of neurosurgery can be traced back to the first description preserved in the Edwin Smith papyrus 3000 BC which dealt with head and spinal injury In the course of 5000 years since the first record in Egypt advances in lifestyle and technology have brought about our modern civilized society However as a result of civilization currently the total number of severe head injuries worldwide is believed to exceed 10000000 and the number of severe spinal injuries is believed to be more than 75 000 each year This means that central nervous system injury is not only the oldest topic in neurosurgery but that it is also of critical importance in modern life Taking these problems into consideration the International Neurotraumatology Committee was organized in 1965 as an affiliated Committee of the World Federation of Neurosurgical Societies The first scientific meeting was convened by the Committee in Marseilles in 1970 Nine further meetings were subsequently held in Europe Africa and South America The meeting was first named International Conference on Recent Advances in Neurotraumatology ICRAN by Professor Phillip Harris when the scientific meeting was held in Edinburgh in 1982 The tenth meeting ICRAN 1992 the first one in Asia was held at Karuizawa Japan from September 23rd to 26th 1992

Recent Advances and Challenges in the Treatment of Major Depressive Disorder Yong-Ku Kim, 2024-09-12 This book reviews all aspects of major depressive disorder MDD casting light on its neurobiological underpinnings and describing the most recent advances in management The book is divided into four sections the first of which discusses MDD from a network science perspective highlighting the alterations in functional

and structural connectivity and presenting insights achieved through resting state functional MRI and the development of neuroimaging based biomarkers The second section examines important diagnostic and neurobiological issues while the third considers the currently available specific treatments for MDD including biofeedback neurofeedback cognitive behavioral therapy acceptance and commitment therapy neuromodulation therapy psychodynamic therapy and complementary and alternative medicine A concluding section is devoted to promising emerging treatments from novel psychopharmacological therapies through to virtual reality treatment immunotherapy biomarker guided tailored therapy and more Written by leading experts from across the world the book will be an excellent source of information for both researchers and practitioners

Recent Advances in Sciences, Engineering, Information Technology & Management Dinesh Goyal, Bhanu Pratap, Sandeep Gupta, Saurabh Raj, Rekha Rani Agrawal, Indra Kishor, 2025-02-14 This conference covered various interdisciplinary areas such as applied science physics material science and engineering The audience got a chance to encircle the various interdisciplinary areas and people working on recent technologies in science engineering information technology and management It was based on the theme of converging interdisciplinary topics into a single platform which helped the participants to think beyond their area and increase their canvas of research

Recent Advances in Attempts to Improve Medication Adherence - from basic research to clinical practice, volume II Przemyslaw Kardas, Tamas Agh, Ines Potočnjak, Cristina Mihaela Ghiciuc, Maria Teresa Herdeiro, 2024-12-04 This exciting Research Topic is the second volume of *Recent Advances in Attempts to Improve Medication Adherence from basic research to clinical practice* which you can explore here Adequate implementation of evidence based long term therapies is an issue of utmost importance It has a direct impact on both individual and public health as well as on the sustainability of healthcare systems Unfortunately despite more than half a century of extensive research and practical and awareness raising activities medication adherence remains far from perfect Many reasons are responsible for non adherence and the issue is complicated by the rapid aging of the global society the rising tide of non communicable chronic diseases multimorbidity and associated polypharmacy This might be further exacerbated by certain conditions such as the Covid 19 pandemic However one thing is perfectly clear medication non adherence is no longer merely perceived as a patient problem In fact medication adherence depends on many non patient related factors and thus is an important indicator of the quality of care Therefore instead of blaming patients need to be supported in their therapeutic journeys Thus all the stakeholders need to collectively create adherence enabling environments and support patients in the execution of their therapies

Recent Advances in Applied Sciences Ritesh Bhat, Nithesh Naik, Ketan Kotecha, Antony V. Samrot, Sachi Nandan Mohanty, Bhaskar Somani, 2025-06-07 This book commences with an editorial overview providing a comprehensive introduction to the current landscape and future prospects in engineering and technology Volume 1 of the International Conference on Innovative Discoveries and Emerging Advancements in Applied Sciences iDEAAS 2024 proceedings is a groundbreaking compilation that encapsulates the

forefront of engineering and technological innovations This meticulously curated book serves as a cornerstone for professionals academics and students who are navigating the ever evolving realms of engineering and technology This sets the tone for a deep dive into a series of specialized topics In the aerospace and marine technologies section the book presents pioneering research and studies It offers insights into the latest advancements in aerospace engineering delving into the complexities and innovations in aircraft and spacecraft design Simultaneously it explores the strides made in marine technologies highlighting the synergies and technological crossovers between these two critical fields The infrastructure and environment section addresses one of the most pressing concerns of the 21st century sustainable development This section is particularly insightful for its focus on the environmental impact of infrastructure development and the challenges of maintaining ecological balance Mechatronics and automation is another highlight of this volume where the fusion of mechanical engineering electronics and computing leads to fascinating innovations in automation and system design This section underscores the importance of interdisciplinary approaches in solving complex engineering problems and enhancing operational efficiency in various industries In the realm of computing and information technology the book explores the transformative impact of digital technologies on engineering The book culminates with a comprehensive summary that not only synthesizes the key themes discussed but also looks ahead at the future of engineering and technology It offers a visionary perspective on the emerging trends and potential advancements that are poised to redefine the engineering landscape
