Annual Report of the American Historical Association American Historical Association, 1921 **The Encyclopedia Britannica**, 1922 Paleoindian Geoarchaeology of the Southern High Plains Vance T. Holliday, 2010-11-01 The Southern High Plains of northwestern Texas and eastern New Mexico are rich in Paleoindian archaeological sites including such well known ones as Clovis Lubbock Lake Plainview and Midland These sites have been extensively researched over decades not only by archaeologists but also by geoscientists whose studies of soils and stratigraphy have yielded important information about cultural chronology and paleoenvironments across the region In this book Vance T Holliday synthesizes the data from these earlier studies with his own recent research to offer the most current and comprehensive overview of the geoarchaeology of the Southern High Plains during the earliest human occupation He delves into twenty sites in depth integrating new and old data on site geomorphology stratigraphy soils geochronology and paleoenvironments He also compares the Southern High Plains sites with other sites across the Great Plains for a broader chronological and paleoenvironmental perspective With over ninety photographs maps cross sections diagrams and artifact drawings this book will be essential reading for geoarchaeologists archaeologists and Quaternary geoscientists as well as avocational archaeologists who take part in Paleoindian site study throughout the American West **An Ice Age Mystery** Roddy L. that followed other archaeological discoveries and the rise of radiocarbon dating established that humans did arrive in North America earlier than previously thought. The skull however was never recovered and many people began to wonder. What exactly had Sellards found at Vero? And what else might be buried there? One hundred years after the first Vero discovery, construction plans threatened to cover up the legendary dig site and a band of citizens and archaeologists protested. Excavations were reopened. Archaeologists uncovered 14 000 year old burnt mammal bones and charcoal signs of a human presence and found further evidence to indicate a continuous human occupation of the site for several thousand years. Prior to the latest excavations, an etching on a bone possibly 13 000 years old was discovered that could be the oldest piece of art in America. Sellards had been right all along. Many questions still remain. Who were these people? Where did they come from? And how did they get here? This book draws readers into the past, present and future of one of the most historic discoveries in American archaeology.

Iconography and Wetsite Archaeology of Florida's Watery Realms Ryan Wheeler, Joanna Ostapkowicz, 2019-04-04 Frank Hamilton Cushing's 1896 excavations at Key Marco revealed astonishing carved and painted objects of wood rarely seen by archaeologists. The chapters in this book explore new discoveries and revisit existing museum collections, asking new questions or employing innovative analytical techniques. While we might reach a different conclusion today, it's clear that ancient Florida is difficult to comfortably place within the Southeast or Caribbean and that much of that difficulty arises from the iconography born of Florida's watery landscapes.

Setting the Agenda for American Archaeology Michael J. O'Brien, R. Lee Lyman, 2001-08-09 This collection elucidates the key role played by the National Research Council seminars, reports and pamphlets in setting an agenda that has guided American archaeology in the 20th century.

Byron Cummings Todd W. Bostwick, 2006-01-01 Byron Cummings, known to students and colleagues as The Dean, had a profound influence on the archaeology of Arizona and Utah during its early development. An explorer, archaeologist, anthropologist, teacher, museum director, university administrator and state parks commissioner, Cummings was involved in many important discoveries in the American Southwest over the first half of the twentieth century and was a pioneer in the education of generations of archaeologists and anthropologists. This book presents the first comprehensive examination of Cummings' life, offering readers a greater understanding of his trailblazing work. Todd Bostwick elucidates Cummings' many intellectual and cultural contributions, investigates the controversies in which he was embroiled and describes his battles to wrest control of Arizona archaeology from eastern institutions that had long dominated Southwest archaeology. Cummings saw the Southwest as an American wilderness where the story of cultural development revealed by the archaeologist and anthropologist was as important as it was in Europe. Bostwick's meticulous account of his life reflects his great reverence for the region and pays tribute to a man whose dedication, mentoring and friendship have forever sealed his place as The Dean.
