Recent Terrains Terraforming The American West:

Recent Terrains Martha Clare Ronk, 2000 In 60 black and white panoramas Brown documents the changing landscape along the western edge of Southern California These stark compelling images reveal a world scraped and reshaped by construction equipment with boulders pushed aside stretches of earth flattened and high tech communities springing to life 60 duotones

How Cities Won the West Carl Abbott, 2011-03-03 Cities rather than individual pioneers have been the driving force in the settlement and economic development of the western half of North America Throughout the seventeenth eighteenth and nineteenth centuries western urban centers served as starting points for conquest and settlement As these frontier cities matured into metropolitan centers they grew from imitators of eastern culture and outposts of eastern capital into independent sources of economic cultural and intellectual change From the Gulf of Alaska to the Mississippi River and from the binational metropolis of San Diego Tijuana to the Prairie Province capitals of Canada Carl Abbott explores the complex urban history of western Canada and the United States The evolution of western cities from stations for exploration and military occupation to contemporary entry points for migration and components of a global economy reminds us that it is cities that won the West And today as cultural change increasingly moves from west to east Abbott argues that the urban West represents a new center from which emerging patterns of behavior and changing customs will help to shape North America in the twenty first century

The Adirondacks Gary Randorf, 2002-07-29 One hundred full color photographs illustrate this history and current health of upstate New York s Adirondack Park the first private public partnership dedicated to the protection of a U S wilderness area Here is the first lesson about the Adirondacks captured in Gary Randorf s magnificent photos It is not only alpine granite in fact of the park s six million acres only about eighty five scattered on top of the tallest mountains are that gorgeous pseudo Arctic Aside from the touristed High Peaks the Adirondacks comprise millions upon millions of acres of Low Peaks of beavery draws and bearish woods of hills and hills and hills countless drainages and muddy ponds The second point about the Adirondacks a glory carefully revealed in the words and pictures of this book is that it represents a second chance wilderness and as such a hope that the damage caused by human beings is not irreversible It is metaphor as much as place from the foreword by Bill McKibben In *The Adirondacks* Wild Island of Hope Gary A Randorf offers 100 photographs to illustrate this unique comprehensive history and natural history of the Adirondack Park the first private public partnership in the United States dedicated to the protection of a wilderness area Situated in northeast New York this regional park of six million acres represents a unique blend of public wildlands intermixed with commercial forests farms mines private parks prisons scattered homes dozens of villages and a year round population of 130 000 The ongoing attempts over the last century to make the Adirondacks a park have made this region a striving ground for living with the land rather than outside or above it Much of the strife is over finding a right relationship to the land treating it not as a commodity to be exploited but as a community to which all living things belong and upon which all depend Today the

Adirondacks regional park with its six million acres represents a second chance wilderness as Bill McKibben writes in his foreword to this book The concerns of this park are the same concerns that apply to all of America's parks recreational areas and wildernesses with the addition of how to maintain the fragile peace between human and natural communities How that second chance can be realized is the focus of Gary Randorf's text and stunning color photographs *North American Women Poets in the 21st Century* Lisa Sewell, Kazim Ali, 2020-02-25 *North American Women Poets in the 21st Century* Beyond Lyric and Language is an important new addition to the American Poets in the 21st Century series Like the earlier anthologies this volume includes generous selections of poetry by some of the best poets of our time as well as illuminating poetics statements and incisive essays on their work Among the insightful pieces included in this volume are essays by Catherine Cucinella on Marilyn Chin Meg Tyler on Fanny Howe Elline Lipkin on Alice Notley Kamran Javadizadeh on Claudia Rankine and many more A companion web site will present audio of each poet's work Calling Natasha Trethewey Mexico 1969 Why not make a fiction of the mind's fictions I want to say it begins like this the trip a pilgrimage my mother kneeling at the altar of the Black Virgin enthralled light streaming in a window the sun at her back holy water in a bowl she must have touched What's left is palimpsest one memory bleeding into another overwriting it How else to explain what remains The sound of water in a basin I know is white the sun behind her light streaming in her face as if she were already dead blurred as it will become I want to imagine her before the altar rising to meet us my father lifting me toward her outstretched arms What else to make of the mind's slick confabulations What comes back is the sun's dazzle on a pool's surface light filtered through water closing over my head my mother her body between me and the high sun a corona of light around her face Why not call it a vision What I know is this I was drowning and saw a dark Madonna someone pulled me through the water's bright ceiling and I rose initiate from one life into another Frontiers Past and Future Carl Abbott, 2006 Abbott offers a fruitful new way to read science fiction one that also greatly enriches our understanding of western history and its impact on our collective imagination Detailing the overlap of science fiction and western fiction especially relating to their mutual interest in and concerns about frontier expansionism he reveals an unsuspected common ground that informs the writings of both camps Reviewing the work of many Hugo and Nebula Award winners as well as drawing upon popular film and television series like the Buck Rogers serials Abbott's study journeys across the far reaches of science fiction's universe
