**Recharting the Caribbean** William M. Maurer, 1994 *Recharting the Caribbean* Bill (William) M. Maurer, 2025-10-01 If as many cultural critics have asserted the world is becoming more like the Caribbean then the task of charting what we mean by the Caribbean is an urgent one This careful study of the British Virgin Islands BVI calls attention to the ways in which ideas about nature and choice have come to justify a social order in which half the population is deemed not to belong and is denied legal rights The BVI one of Britain's few remaining colonial possessions has become an important destination point for Caribbean migrants and a center for international financial services Bill Maurer traces how the BVI came to be defined legally and popularly as a territorial entity and how BVI Islanders came to define themselves as a people sharing a culture He argues that law has been central to the construction of ethnic racial and cultural differences that create boundaries between peoples and places and that facilitate the exploitation of labor the exclusion of people from the political process and the globalization of capital *Recharting the Caribbean* will be important reading for anthropologist legal scholars and historians of colonial discourse Bill Maurer is Assistant Professor of Anthropology University of California at Irvine

Likosky,2006-10-30 From attacks on oil infrastructure in post war reconstruction Iraq to the laying of gas pipelines in the Amazon Rainforest through indigenous community villages infrastructure projects are sites of intense human rights struggles Many state and non state actors have proposed solutions for handling human rights problems in the context of specific infrastructure projects Solutions have been admired for being lofty in principle however they have been judged wanting in practice This book analyzes how human rights are handled in varied contexts and then assesses the feasibility of a common international institutional solution under the auspices of the United Nations to the alleged problem of the inability to translate human rights into practice *Salvaging Empire* James J. A. Blair,2023-08-15 Salvaging Empire probes the historical roots and current predicaments of a twenty first century settler

colony seeking to control an uncertain future through resource management and environmental science Four decades after a violent 1982 war between the United Kingdom and Argentina reestablished British authority over the Falkland Islands Las Malvinas in Spanish a commercial fishing boom and offshore oil discoveries have intensified the sovereignty dispute over the South Atlantic archipelago Scholarly literature on the South Atlantic focuses primarily on military history of the 1982 conflict However contested claims over natural resources have now made this disputed territory a critical site for examining the wider relationship between imperial sovereignty and environmental governance James J A Blair argues that by claiming self determination and consenting to British sovereignty the Falkland Islanders have crafted a settler colonial protectorate to extract resources and extend empire in the South Atlantic Responding to current debates in environmental anthropology critical geography Atlantic history political ecology and science and technology studies Blair describes how settlers have asserted indigeneity in dynamic relation with the environment Salvaging Empire uncovers the South Atlantic s outsized importance for understanding the broader implications of resource management and environmental science for the geopolitics of empire

**Sweetness in the Blood** James Doucet-Battle, 2021-03-16 A bold new indictment of the racialization of science Decades of data cannot be ignored African American adults are far more likely to develop Type 2 diabetes than white adults But has science gone so far in racializing diabetes as to undermine the search for solutions In a rousing indictment of the idea that notions of biological race should drive scientific inquiry *Sweetness in the Blood* provides an ethnographic picture of biotechnology's framings of Type 2 diabetes risk and race and importantly offers a critical examination of the assumptions behind the recruitment of African

American and African descent populations for Type 2 diabetes research James Doucet Battle begins with a historical overview of how diabetes has been researched and framed racially over the past century chronicling one company's efforts to recruit African Americans to test their new diabetes risk score algorithm with the aim of increasing the clinical and market value of the firm's technology He considers African American reticence about participation in biomedical research and examines race and health disparities in light of advances in genomic sequencing technology Doucet Battle concludes by emphasizing that genomic research into sub Saharan ancestry in fact underlines the importance of analyzing gender before attempting to understand the notion of race No disease reveals this more than Type 2 diabetes Sweetness in the Blood challenges the notion that the best approach to understanding managing and curing Type 2 diabetes is through the lens of race It also transforms how we think about sugar filling a neglected gap between the sugar and molasses sweetened past of the enslaved African laborer and the high fructose corn syrup and corporate fed body of the contemporary consumer laborer
