Rethinking Los Angeles:

Rethinking Los Angeles Michael Dear,H. Eric Schockman,Greg Hise,1996-08-20 The Los Angeles region is increasingly being held up as a prototype for the collective urban future of the United States Yet it is probably the least understood most under studied major city in the US Very few people beyond the boundaries of Southern California have an accurate appreciation of what the region is who lives there and what it does This groundbreaking collection of essays brings together well respected contributors to dispel the myths about Southern California and to begin the process of rethinking Los Angeles

Rethinking Parking David Mephram, 2023-12-22 For much of the past century we have viewed the issue of parking from the driver's seat. It follows that key narratives about parking reaffirm the immediate needs of the driver. A consequence of this approach is a failure to understand the significant damage that parking causes to the destination. That damage is amplified by cheap, easy parking at the expense of place and access outcomes. Viewing parking from an urban planning and design perspective highlights different issues and opportunities. Five perspectives are offered: Place. If we gave drivers all the parking they wanted, the destination would not be worth visiting. Politics. Parking is intensely territorial, emotional, and prone to populism, and this is a barrier to strategic and sustainable parking reform. Policy. Parking tends to be focused on the here and now needs of the driver at the expense of bigger picture and longer term policy objectives. Price. Subsidized parking exists behind opaque pricing mechanisms. In contrast, a transparent accounting of costs is a vehicle for strategic parking reform. Professional practice. Parking is a significant land use issue located at the juncture of transport and urban planning and design. Improving urban parking outcomes requires an integrated and collaborative planning process. An alternative view of parking is timely as new technologies and economies fundamentally change everything we understand about parking. A potential paradigm shift is in the making. Rethinking Parking provides a pathway to a better parking place, balance, and access to destinations worth visiting. It is valuable reading for students and professionals engaged in transport planning, urban access, and design. Rethinking Our Classrooms, Volume 2, 2001

Rethinking America's Past Robert Cohen, Sonia E. Murrow, 2021-11-01 No introductory work of American history has had more influence over the past forty years than Howard Zinn's *A People's History of the United States*, which since its publication in 1980 has sold more than three million copies. Zinn's iconoclastic critique of American militarism, racism, and capitalism has drawn bitter criticism from the Right, most recently from President Donald Trump, who at his White House Conference on American History in 2020 denounced Zinn as a Left propagandist and accused teachers aligned with Zinn of indoctrinating students to hate America and be ashamed of its history. *Rethinking America's Past* is the first work to use archival and classroom evidence to assess the impact that Zinn's classic work has had on historical teaching and learning and on American culture. This evidence refutes Trump's charges, showing that rather than indoctrinating students, Zinn's book has been used by teachers to have students debate and rethink conventional versions of American history. *Rethinking America's Past* also explores the ways Zinn's work fostered deeper, more critical renderings of the American past in movies and on stage and television and traces the origins and assesses the strengths and weaknesses of *A People's History* in light of more recent historical scholarship. Race and the War on Poverty Robert Bauman, 2022-08-16 President Lyndon B Johnson s War on Poverty did more than offer aid to needy Americans in some cities it also sparked both racial conflict and cooperation Race and the War on Poverty examines the African American and Mexican American community organizations in Los Angeles that emerged to implement War on Poverty programs It explores how organizers applied democratic vision and political savvy to community action and how the ongoing African American Chicano and feminist movements in turn shaped the contours of the War on Poverty s goals programs and cultural identity Robert Bauman describes how the Watts riots of 1965 accelerated the creation of a black community controlled agency the Watts Labor Community Action Committee The example of the WLCAC combined with a burgeoning Chicano movement inspired Mexican Americans to create The East Los Angeles Community Union TELACU and the Chicana Service Action Center Bauman explores the connections that wove together the War on Poverty the Watts revolt and local movements in ways that empowered the participants economically culturally and politically Although heated battles over race and other cultural issues sometimes derailed the programs these organizations produced lasting positive effects for the communities they touched Despite Nixon era budget cuts and the nation s turn toward conservatism the War on Poverty continues to be fought today as these agencies embrace the changing politics economics and demographics of Los Angeles Race and the War on

Poverty shows how the struggle to end poverty evolved in ways that would have surprised its planners supporters and detractors and that what began as a grand vision at the national level continues to thrive on the streets of the community

Rethinking Relation-Substance Dualism Aurélie Névoit, 2024-01-16 This book analyses anthropological debates on relationism referring to methodological and theoretical issues and sets out to reconsider these discussions with regards to the notion of substance generally associated with the body Reflecting on the philosophical origins and implications of these two concepts the author aims to bring them to the heart of contemporary anthropological discourse and addresses the erasure or blurring of substance in favour of relation The argument put forward is that the conceptual pairing of substance relation should be substituted for the nature culture dualism that has been dominant in structural anthropology The chapters engage with the work of scholars such as Philippe Descola Eduardo Viveiros de Castro and Wang Mingming as part of a decentring and questioning of the tradition in which anthropology is rooted The book also considers the role that the anthropology of China plays in the re evaluation of the relationship between relation and substance The concept of submutance is introduced with Chinese ethnographic material to explore the possibility of moving beyond the relation substance dualism of Western heritage This is valuable reading for scholars interested in the theory and history of anthropology

Governing American Cities Michael Jones-Correa, 2001-11-29 The new immigrants who have poured into the United States over the past thirty years are rapidly changing the political landscape of American cities Like their predecessors at the turn of the century recent immigrants have settled overwhelmingly in a few large urban areas where they receive their first sustained experience with government in this country including its role in policing housing health care education and the job market Governing American Cities brings together the best research from both established and rising scholars to examine the changing demographics of America s cities the experience of these new immigrants and their impact on urban politics Building on the experiences of such large ports of entry as Los Angeles New York Miami Houston Chicago and Washington D C Governing American Cities addresses important questions about the incorporation of the newest immigrants into American political life Are the new arrivals joining existing political coalitions or forming new ones Where competition exists among new and old ethnic and racial groups what are its characteristics and how can it be harnessed to meet the needs of each group How do the answers to these questions vary across cities and regions In

one chapter Peter Kwong uses New York's Chinatown to demonstrate how divisions within immigrant communities can cripple efforts to mobilize immigrants politically Sociologist Guillermo Grenier uses the relationship between blacks and Latinos in Cuban American dominated Miami to examine the nature of competition in a city largely controlled by a single ethnic group And Matthew McKeever takes the 1997 mayoral race in Houston as an example of the importance of inter ethnic relations in forging a successful political consensus Other contributors compare the response of cities with different institutional set ups some cities have turned to the private sector to help incorporate the new arrivals while others rely on traditional political channels *Governing American Cities* crosses geographic and disciplinary borders to provide an illuminating review of the complex political negotiations taking place between new immigrants and previous residents as cities adjust to the newest ethnic succession A solution oriented book the authors use concrete case studies to help formulate suggestions and strategies and to highlight the importance of reframing urban issues away from the zero sum battles of the past

The City: The city in global context Michael Pacione, 2002 *History of California*, **Contemporary Asian American Communities** Linda Trinh Võ, Rick Bonus, 2009 Once thought of in terms of geographically bounded spaces Asian America has undergone profound changes as a result of post 1965 immigration as well as the growth and reshaping of established communities This collection of original essays demonstrates that conventional notions of community of ethnic enclaves determined by exclusion and ghettoization now have limited use in explaining the dynamic processes of contemporary community formation Writing from a variety of perspectives these contributors expand the concept of community to include sites not necessarily bounded by space formations around gender class sexuality and generation reveal new processes as well as the demographic diversity of today's Asian American population The case studies gathered here speak to the fluidity of these communities and to the need for new analytic approaches to account for the similarities and differences between them Taken together these essays forcefully argue that it is time to replace the outworn concept of a monolithic Asian America

Gallagher, 2021-12-16 *Rethinking the Color Line* is a collection of theoretically informed and empirically grounded readings on race and race relations that illustrate how race and ethnicity influence aspects of social life in ways that are often made invisible by culture politics and economics

Post-Nationalist American Studies John Carlos Rowe, 2000-12-04 *Post Nationalist American Studies* seeks to revise the cultural nationalism and celebratory American exceptionalism that tended to dominate American Studies in the Cold War era The goal of the book's contributors is a less insular more trans national comparative approach to American Studies one that questions dominant American myths rather than canonizes them Articulating new ways to think about American Studies these essays demonstrate how diverse the field has become Contributors are concerned with cross cultural communication race and gender global and local identities and the complex tensions between symbolic and political economies Their essays explore among other topics the construction of foreign peoples and cultures the notion of borders territorial racial economic

and sexual the multilingual reality of the United States the place of the Mexican American War in U S history and the significance of Tiger Woods in today s global market of consumption Together the essays propose a renewed vision of the United States role in the world and how American Studies scholarship can address that vision Each contributor includes a sample syllabus showing how the issues discussed in individual essays can be brought into the classroom
