The Rise of the New Second Generation Min Zhou, Carl L. Bankston, III, 2016-04-29 In this age of migration more and more children are growing up in immigrant or transnational families The new second generation refers to foreign born and native born children of immigrants who have come of age at the turn of the twenty first century This book is about this new generation in the worlds largest host country of international migration the United States Recognizing that immigration is an intergenerational phenomenon and one that

is always evolving the authors begin by asking Do members of the new second generation follow the same pathways taken by the old second generation They consider the relevance of assimilation approaches to understanding the lived experiences of the new second generation and show that the demographic characteristics of today s immigrant groups and changing social economic and cultural contexts require new thinking and paradigms Ultimately the book offers a view of how American society is shaping the life chances of members of this new second generation and how today s second generation in turn is shaping a new America Designed as a rich overview for general readers and students and as a concise summary for scholars this book will be an essential work for all interested in contemporary issues of race ethnicity and migration

Occupations of the first and second generation of immigrants in the United States. Fecundity of immigrant women United States. Immigration Commission (1907-1910),1911 Second-Generation Fiscal Rules Luc Eyraud,Mr.Xavier Debrun,Andrew Hodge,Victor Duarte Lledo,Ms.Catherine A Pattillo,2018-04-13

Fiscal rule frameworks have evolved significantly in response to the global financial crisis Many countries have reformed their fiscal rules or introduced new ones with a view to enhancing the credibility of fiscal policy and providing a medium term anchor Enforcement and monitoring mechanisms have also been upgraded However these innovations have made the systems of rules more complicated to operate while compliance has not improved The SDN takes stock of past experiences reviews recent reforms and presents new research on the effectiveness of rules It also proposes guiding principles for future reforms to strike a better balance between simplicity flexibility and enforceability Read the blog *Second-Generation Memory and Contemporary Children's Literature* Anastasia Ulanowicz,2013-09-02 Winner of the Children s Literature Association Book Award This book visits a range of textual forms including diary novel and picturebook to explore the relationship between second generation memory and contemporary children s literature Ulanowicz argues that second generation memory informed by intimate family relationships textual mediation and technology is characterized by vicarious rather than direct experience of the past As such children s literature is particularly well suited to the representation of second generation memory insofar as children s fiction is particularly invested in the transmission and reproduction of cultural memory and its form promotes the formation of various complex intergenerational relationships Further children s books that depict second generation memory have the potential to challenge conventional Western notions of selfhood and ethics This study shows how novels such as Lois Lowry s *The Giver* 1993 and Judy Blume s *Starring Sally J Freedman as Herself* 1977 both of which feature protagonists who adapt their elders memories into their own mnemonic repertoires implicitly reject Cartesian notions of the unified subject in favor of a view of identity as always already social relational and dynamic in character This book not only questions how and why second generation memory is represented in books for young people but whether such representations of memory might be considered radical or conservative Together these analyses address a topic that has not been explored fully within the fields of children s literature trauma and memory studies and Holocaust studies *The Position of the Turkish and Moroccan*

Kim, 2007 This in depth study on preaching to second generation Korean Americans the first of its kind is based on empirical and ethnographic fieldwork Matthew D Kim conducted surveys and semi structured qualitative interviews with Korean American pastors and second generation young adult respondents in three geographic regions of the United States the Midwest the West Coast and the East Coast His primary conceptual framework employs social psychologists Hazel Markus and Paula Nurius theory of possible selves to facilitate the process of congregational exegesis in the second generation Korean American church context This book offers a new contextual homiletic model that enables Korean American preachers to engage in deeper levels of ethnic and cultural analysis in their sermonic preparation Simultaneously the author reconstructs conventional preaching roles of Korean American preachers and second generation listeners so that they may co creatively imagine new possible selves that radically advance Christian mission and practice in the world This book will serve as a primary or secondary source for upper level undergraduate graduate and postgraduate courses on preaching communication studies ethnic and racial studies cross cultural ministry or social psychology
