A New Direction for China's Defense Industry Evan S. Medeiros, Roger Cliff, Keith Crane, James C. Mulvenon, 2005-12-19 Since the early 1980s a prominent and consistent conclusion drawn from research on China s defense industrial complex has been that China s defense production capabilities are rife with weaknesses and limitations This study argues for an alternative approach From the vantage point of 2005 it is time to shift the focus of current research to the gradual improvements in and the future potential of China s defense industrial complex The study found that China s defense sectors are designing and producing a wide range of increasingly advanced weapons that in the short term are relevant to a possible conflict over Taiwan but also to China s long term military presence in Asia Part of a larger RAND Project AIR FORCE study on Chinese military modernization this study examines the current and future capabilities of China s defense industry The goals of this study are to 1

Wortzel, 2003 *Chinese Space Policy* Roger Handberg, Zhen Li, 2006-11-29 This volume explains the beginnings and expansion of China's space program analyzing how China is now able to hold such ambitions and how the interaction between technology politics and economics has influenced the Chinese space program It opens by tracing out the earlier development of the space program and identifying the successes and problems that plagued this initial effort later focusing upon its development over the past decade and into the future As China is now able to reach into outer space with its machines and since 2003 with its humans the authors examine how this move from a non participant status to a state operating at the highest level of space activities has confirmed its potential place as the new economic and military superpower of the twenty first century They also demonstrate how recent successes mean that China is now confronted by an issue previously encountered by other space powers such as the United States and the former Soviet Union what is the value of the space program given its high costs and likelihood of dramatic failure Chinese Space Policy will be of great interest to students of space studies Chinese politics security studies and international relations in general **A Toolbox for the Application of the Rules of Targeting** Tetyana (Tanya) Krupiy, 2016-02-29 How military commanders interpret the rules of targeting impacts not only on whether civilians and civilian objects are harmed in the course of a military operation but also on the scale of harm that ensues Commentators have queried whether military commanders observed the law even when parties to a conflict acted in accordance with mandates to protect civilians as was the case when a coalition of states bombed targets in Libya in 2011 However limited guidance is publicly available on how military commanders apply these rules on the battlefield In order to allow military commanders to exercise judgment in determining what steps they are required to take to spare civilians in a specific set of circumstances the rules of targeting are formulated in an open ended fashion which complicates one's ability to evaluate whether a particular military operation complies with the law By examining case studies ranging from Operation Desert Storm in 1991 to Operation Protective Edge in 2014 this book addresses lacunae in current scholarship It puts forward principles which capture how military commanders deliberate while interpreting what the rules of targeting require in particular scenarios International humanitarian law this book contends places a duty on attackers to assume risk in order to mitigate danger to civilians Drawing on the field of psychology this study provides an explanation of how military commanders assess when circumstances do not permit them to inform civilians about a forthcoming attack *Modernizing China's Military* David Shambaugh, 2003-03-25 David Shambaugh a leading international authority on Chinese strategic and military affairs offers the most comprehensive and insightful assessment to date of the Chinese military The result of a decade's research *Modernizing China's Military* comes at a crucial moment in history one when international attention is increasingly focused on the rise of Chinese military power Basing his

analysis on an unprecedented use of Chinese military publications and interviews with People's Liberation Army PLA officers Shambaugh addresses important questions about Chinese strategic intentions and military capabilities questions that are of key concern for government policymakers as well as strategic analysts and a concerned public

The Evolution of Cyber War Brian M. Mazanec, 2015 Former secretary of defense Leon Panetta once described cyber warfare as the most serious threat in the twenty first century capable of destroying our entire infrastructure and crippling the nation Already major cyber attacks have affected countries around the world Estonia in 2007 Georgia in 2008 Iran in 2010 and most recently the United States As with other methods of war cyber technology can be used not only against military forces and facilities but also against civilian targets Information technology has enabled a new method of warfare that is proving extremely difficult to combat let alone defeat And yet cyber warfare is still in its infancy with innumerable possibilities and contingencies for how such conflicts may play out in the coming decades Brian M Mazanec examines the worldwide development of constraining norms for cyber war and predicts how those norms will unfold in the future Employing case studies of other emerging technology weapons chemical and biological strategic bombing and nuclear weaponry Mazanec expands previous understandings of norm evolution theory offering recommendations for U S policymakers and citizens alike as they grapple with the reality of cyber terrorism in our own backyard

US-China Cold War Collaboration S. Mahmud Ali, 2007-04-11 After more than four decades the Cold War ended with the sudden collapse of the Soviet Union Almost simultaneously China emerged as the new potential disruptor of international stability with Beijing replacing Moscow as the key source of Western insecurity Drawing upon extensive primary resources Ali questions the logic behind this perception reflected both in popular and academic literature Disclosing hitherto unknown aspects of the Soviet Union's disintegration the text reveals a secret strategic alliance between the USA and China during the Cold War's final decades Presenting an in depth analysis of the relationship between the two countries the book identifies the bases on which the alliance emerged the growing mutual concern of a Soviet threat Using documentation from the three capitals Ali presents a compelling tale of intrigue and conspiracy at the highest level of the international security system The text brings a new dimension to the current literature and deepens our understanding of a key aspect of the Cold War its end

Intelligent and Autonomous: Transforming Values in the Face of Technology, 2023-08-28 This book uses case analyses and industry insights and blends them with forays into philosophy and ethics to conceptualise the mismatch between human values and the values inherent in an increasingly technologized world Bringing together contributors from the disciplines of law politics philosophy and communication studies this volume develops an interdisciplinary vocabulary for thinking about the questions and

antinomies of human technology interaction while also resisting any deceptively straightforward synthesis The topics discussed include the competition over and regulation of technology the harm induced by autonomous technologies and the place and role of humans in a world that is undergoing rapid and radical change

China's India War, 1962: Looking Back to See the Future Air Commodore Jasjit Singh, 2013-03-15 A potential competition exists between India and China and there is also no doubt that China started the war Highlighting the mistakes made by India rather than empirically analysing the available data can be regarded as the primary causes for the confusion that exists today Though complete details and evidence of the developments are available and documented few of us have attempted to draw up a pragmatic and realist analysis The consequences of that war have yet to die down entirely and are frequently raked up with issues on recent developments which are not widely dissimilar to those of 1962 China is a complex country To understand this rapidly progressing nation is even more difficult There are many perceptions on this country and many of them are formed on account of some international events and China's growing assertiveness It may be far fetched to expect for a paradigm change in stance and motive which could give China an uncertain negotiating position This edited volume provides the reader an excellent blend of the historical run up to the aberration the military developments and consequences It is also provides useful material to understand the geographical boundary issues between India and China and developing Chinese strategies both on the political and military front

Civil-military Relations in Today's China: Swimming in a New Sea David M. Finkelstein, Kristen Gunness, 2015-03-26 This work provides an in depth and up to date examination of civil military relations in China It reflects the significant changes taking place in Chinese society and their impact on the civil military dynamic with particular attention to how the military will fit in with the new class of entrepreneurs Rather than focusing exclusively on elite Party Army relations the book examines civil military relations from various vantage points at the center and in the provinces between civilian leaders and military leaders from a strictly military perspective and from a civilian perspective and from the angle of specific issue areas Chapters explore issues such as the impact of AIDS the defense budget the emerging dynamic between the military and China's new leadership resettling demobilized troops back into civilian life and the role of the militia reserve units and other civilian groups The contributors are highly respected specialists in China studies including political scientists historians PLA specialists and sociologists They present a vibrant portrait of the new civil military dynamic in the PRC within the complex social changes that China is exploring today

Fortifying China Tai Ming Cheung, 2013-04-15 Fortifying China explores the titanic struggle to turn China into an aspiring world class military technological power The defense economy is leveraging the country's vibrant civilian economy and gaining access to foreign sources of technology and know how Drawing on extensive Chinese language sources Tai Ming Cheung explains that this transformation has two key dimensions The defense economy is being reengineered to break down bureaucratic barriers

and reduce the role of the state fostering a more competitive and entrepreneurial culture to facilitate the rapid diffusion and absorption of technology and knowledge At the same time the civilian and defense economies are being integrated to form a dual use technological and industrial base In Cheung s view the Chinese authorities believe this strategy will play a key role in supporting long term defense modernization For China s neighbors and the United States understanding China s technological industrial and military capabilities is critical to the formulation of economic and security policies Fortifying China provides crucial insight into the impact of China s dual use technology strategy Cheung s systems of innovation framework considers the structure dynamics and performance of the defense economy from a systems level perspective

China's Military Power Roger Cliff,2015-09-15 Once termed the world s largest military museum the Chinese military has made enormous progress over the past twenty years With skyrocketing military budgets and new technology China s tanks aircraft destroyers and missile capabilities are becoming comparable to those of the United States If these trends continue how powerful will the Chinese military be in the future Will its capabilities soon rival or surpass those of the United States The most comprehensive study of its kind this book provides a detailed assessment of China s military capabilities in 2000 and 2010 with projections for 2020 It is the first of its kind in outlining a rigorous theoretically and empirically grounded framework for assessing military capability based on not just weaponry but also doctrine training equipment and organizational structure This framework provides not only the most accurate assessment of China s military to date but an important new tool in the study of military history Chinese National Security Decisionmaking Under Stress Andrew Scobell,2005 If there is one constant in expert analyses of the history of modern China it is the characterization of a country perpetually in the throes of crises While China at the mid point of the Twenty first Century s first decade is arguably the most secure and stable it has been in more than a century crises continue to emerge with apparent frequency Consequently the study of china s behavior in conditions of tension and stress is of considerable importance to policy makers and analysts around the world
