Tweed, 2025-05-13 A sweeping retelling of American religious history showing how religion has enhanced and hindered human flourishing from the Ice Age to the Information Age Until now the standard narrative of American religious history has begun with English settlers in Jamestown or Plymouth and remained predominantly Protestant and Atlantic Driven by his strong sense of the historical and moral shortcomings of the usual story Thomas A Tweed offers a very different narrative in this ambitious new history He begins the story much earlier 11 000 years ago at a rock shelter in present day Texas and follows Indigenous Peoples African Americans transnational migrants and people of many faiths as they transform the landscape and confront the big lifeway transitions from foraging to farming and from factories to fiber optics Setting aside the familiar narrative themes he highlights sustainability showing how religion both promoted and inhibited individual communal and environmental flourishing during three sustainability crises the medieval Cornfield Crisis which destabilized Indigenous ceremonial centers the Colonial Crisis which began with the displacement of Indigenous Peoples and the enslavement of Africans and the Industrial Crisis which brought social inequity and environmental degradation The unresolved Colonial and Industrial Crises continue to haunt the nation Tweed suggests but he recovers historical sources of hope as he retells the rich story of America s religious past **A History of Architecture and Urbanism in the Americas** Clare

Gender and Sexuality in Indigenous North America, 1400-1850
Sandra Slater, Fay A. Yarbrough, 2022-11-10 Groundbreaking historical scholarship on the complex attitudes toward gender and sexual roles in Native American culture with a new preface and supplemental bibliography Prior to the arrival of Europeans in the New World Native Americans across the continent had developed richly complex attitudes and forms of expression concerning gender and sexual roles The role of the berdache a man living as a woman or a woman living as a man in native societies has received recent scholarly attention but represents just one of many such occurrences of alternative gender identification in these cultures Editors Sandra Slater and Fay A Yarbrough have brought together scholars who explore the historical implications of these variations in the meanings of gender sexuality and

marriage among indigenous communities in North America Essays that span from the colonial period through the nineteenth century illustrate how these aspects of Native American life were altered through interactions with Europeans Organized chronologically Gender and Sexuality in Indigenous North America 1400 1850 probes gender identification labor roles and political authority within Native American societies The essays are linked by overarching examinations of how Europeans manipulated native ideas about gender for their own ends and how indigenous people responded to European attempts to impose gendered cultural practices at odds with established traditions Many of the essays also address how indigenous people made meaning of gender and how these meanings developed over time within their own communities Several contributors also consider sexual practice as a mode of cultural articulation as well as a vehicle for the expression of gender roles Representing groundbreaking scholarship in the field of Native American studies these insightful discussions of gender sexuality and identity advance our understanding of cultural traditions and clashes that continue to resonate in native communities today as well as in the larger societies those communities exist within

Prehistoric America Betty Jane Meggers, During the past 30 years the relationship between humans and the environment has changed more drastically than during any previous period in human history Local sustainable exploitation of natural resources has been overridden by global interests indifferent to the detrimental impact of their activities on local environments and their inhabitants Increasingly efficient technology has reduced the need for human labor but improved medical treatment favors reproduction and survival creating a growing imbalance between population density and food supply Rapid transportation is introducing alien species to distant terrestrial and aquatic environments where they displace critical elements in the local food chain This succinct and profusely illustrated volume applies evolutionary and cultural theory to the interpretation of prehistoric cultural development in the western hemisphere After reviewing cultural development in Mesoamerica and the central Andes Meggers examines adaptation in North and South American regions with similar environments to evaluate the influence of adaptive constraints on cultural
