Seventy-Five Years of Inflight Refueling

Richard K. Smith, 2014-07-14 This is an excellent overview of aerial refueling Unfortunately this reprint is missing the first nine illustrations between pages 1 and 22 I have read the original version which was printed on glossy paper It was exceptional It is unfortunate that the U Mich reprint was not checked for completeness before it went to the printer Very likely every copy that Amazon stocks probably suffers from the same defect I tried two copies and was forced to ask for a refund

Seventy-Five Years of Inflight Refueling Highlights, 1923-1998 Office of Air Force History, United States Air Force, 2015-02-28 The U S Air Force's development of aerial refueling cannot be attributed to any one person but among all of those involved General Curtis E LeMay remains an outstanding figure During his nine years as SAC commander LeMay built the U S aerial refueling capability into what was practically an air force unto itself an invisible foundation for the nation's original nuclear deterrent With only a bit of exaggeration it can be said that the KC 135 was his airplane When LeMay retired as Air Force Chief of Staff on February 1 1965 Boeing already had delivered its 732d and last KC 135 tanker At the time SAC had forty nine tanker squadrons with 641 KC 135s with almost 200 other KC 135 variants performing a bewildering number of specialized military missions During the quarter century after General LeMay retired land and sea based ballistic missile forces gradually upstaged manned bombers LeMay had left all those tankers in the wake of his career and some people had wondered openly what the Air Force would do with them First the tactical air forces and B 52 bombers answered that question in Southeast Asia After the experience of the airlift to Israel the Military Airlift Command had its own answer In no way could tankers be considered surplus to anything much less a declining asset On October 1 1990 as hundreds of SAC tankers were cruising over the Atlantic Ocean and the Mediterranean Sea refueling fighters and transports on their way to Operation DESERT SHIELD and other tankers were offloading fuel to support intensive combat training exercises over Saudi Arabia in anticipation of DESERT STORM Curtis Emerson LeMay died at March AFB California just six weeks short of his eighty fourth birthday Within two years at midnight on May 31 1992 the mighty Strategic Air Command passed silently into history Three new organizations divided its assets the Strategic Command acquired the intercontinental missiles and some bombers the Air Combat Command formerly TAC got what remained of the big bombers and some of the aerial tankers and the Air Mobility Command the old MAC gained most of the tankers The Old Order changeth it was the end of an era

Norton, 2021-12-02 This

volume focuses on the influence of America's Second World War aviation development and experience subsequent aviation technological advances and world events in shaping American choices in military aircraft and associated weapons development during the few years following the war It shows how air warfare weapons from the last conflict were carried forward and altered how new systems evolved from these and how the choices fared in the next war Korea The period was

one of remarkable progress in a short span of time via a great many aircraft and weapons programs and associated technological progress. These systems were of immense importance influencing and growing the engineering production and operational capabilities to be exploited for the next generation of weapons that soon followed. Emphasized is the innovative features or new technology and how these contributed to advancing American military aviation influencing the evolution of follow on models or types. Included are military prototype experimental and research aircraft that are equally important in understanding the history of American aircraft development. Combat employment progress and equipment adaptation during the Korean Conflict is then highlighted. Tabulated characteristics are provided of those aircraft that entered production or represented significant technological advances influencing others that follow.

Command and Control Eric Schlosser, 2014-08-26

The Oscar shortlisted documentary *Command and Control* directed by Robert Kenner finds its origins in Eric Schlosser's book and continues to explore the little known history of the management and safety concerns of America's nuclear arsenal. A devastatingly lucid and detailed new history of nuclear weapons in the U.S. Fascinating. Lev Grossman, TIME Magazine. Perilous and gripping. Schlosser skillfully weaves together an engrossing account of both the science and the politics of nuclear weapons safety. San Francisco Chronicle. A myth shattering exposé of America's nuclear weapons. Famed investigative journalist Eric Schlosser digs deep to uncover secrets about the management of America's nuclear arsenal. A groundbreaking account of accidents, near misses, extraordinary heroism and technological breakthroughs. *Command and Control* explores the dilemma that has existed since the dawn of the nuclear age: How do you deploy weapons of mass destruction without being destroyed by them? That question has never been resolved and Schlosser reveals how the combination of human fallibility and technological complexity still poses a grave risk to mankind. While the harms of global warming increasingly dominate the news, the equally dangerous yet more immediate threat of nuclear weapons has been largely forgotten. Written with the vibrancy of a first rate thriller, *Command and Control* interweaves the minute by minute story of an accident at a nuclear missile silo in rural Arkansas with a historical narrative that spans more than fifty years. It depicts the urgent effort by American scientists, policy makers and military officers to ensure that nuclear weapons can't be stolen, sabotaged, used without permission or detonated inadvertently. Schlosser also looks at the Cold War from a new perspective, offering history from the ground up, telling the stories of bomber pilots, missile commanders, maintenance crews and other ordinary servicemen who risked their lives to avert a nuclear holocaust. At the heart of the book lies the struggle amid the rolling hills and small farms of Damascus, Arkansas, to prevent the explosion of a ballistic missile carrying the most powerful nuclear warhead ever built by the United States. Drawing on recently declassified documents and interviews with people who designed and routinely handled nuclear weapons, *Command and Control* takes readers into a terrifying but fascinating world that until now has been largely hidden from view. Through the details of a single accident, Schlosser illustrates how an unlikely event can become unavoidable, how small risks can have terrible consequences and how the most

brilliant minds in the nation can only provide us with an illusion of control Audacious gripping and unforgettable Command and Control is a tour de force of investigative journalism an eye opening look at the dangers of America s nuclear age

that very organization was in serious trouble The force had been drastically reduced and despite the Korean War growing
sentiment supported by no less than the chairman of the Joint Chiefs argued that the new Air Force could do anything naval
aviation might be required to do Meanwhile the naval aviation mishap rate soared The very survival of naval aviation was at
stake It took fifty years to turn this around Today in spite of hot wars cold wars contingencies and peacetime operations in
support of friends and allies the Navy and Marine Corps accident rate is at least as good as that of the Air Force and it
approaches that of commercial aviation Gear Up Mishaps Down explains that this accomplishment was achieved through
