Seville A Cultural History Cityscapes:

Seville, Córdoba, and Granada Elizabeth Nash, 2005-10-13 Spain's southern city of Seville basks in romantic myths and legends evoking the scent of jasmine and orange blossom. But there is an ascetic core to its sybaritic spirit. For all their fame as passionate performers, the poet Unamuno called Sevillanos finos y frios, refined and cool. Once Europe's most cosmopolitan metropolis, bridging cultures of East and West and hub of a sea-borne empire, Seville was defined by Spain's great seventeenth-century playwright Lope de Vega as port and gateway to the Indies. The city retains both the swagger of its seafaring heyday and the sensual flavor of Moorish al-Andalus. Seville produced Spain's lowest ruffians, grandest grandees, and a seductive gypsy culture that colors our wider perception of Spain. Elizabeth Nash explores the palaces, the mosques, the patios, fountains, and wrought-iron balconies of Seville. Córdoba and Granada, cities celebrated for centuries by Europe's finest painters, poets, satirists, and travel writers for their voluptuous beauty and vibrant cultural mix. **Seville, Cordoba, and**

'Grossly Material Things' Helen Smith, 2012-05-03 In *A Room of One's Own* Virginia Woolf described fictions as grossly material things rooted in their physical and economic contexts This book takes Woolf's brief hint as its starting point asking who made the books of the English Renaissance and what the material circumstances were in which they did so It charts a new history of making and use recovering the ways in which women shaped and altered the books of this crucial period as co authors editors translators patrons printers booksellers and readers Drawing on evidence from a wide range of sources including court records letters diaries medical texts and the books themselves *Grossly Material Things* moves between the realms of manuscript and print and tells the stories of literary political and religious texts from broadside ballads to plays monstrous birth pamphlets to editions of the Bible In uncovering the neglected history of women's textual labours and the places and spaces in which women went about the business of making Helen Smith offers a new perspective on the history of

To demonstrate these points each case study focusses on a single object or small group of related objects The case studies combine close analysis of the material and visual characteristics with a discussion of the wider context in which such objects were commissioned made used adapted and exchanged The book is intended as an introduction to the historical study of Islamic objects employing perspectives from the fields of art history archaeology numismatics ethnography and epigraphy Written with a minimum of technical language and supported by a critical introduction an extensive glossary a timeline and guide for further reading the book is aimed at students and general readers who are interested in the political economic social cultural religious and intellectual histories of the Islamic world *Handbook of Urban Studies* Ronan Paddison,2001 The Handbook of Urban Studies provides the first comprehensive up to date account of the urban condition relevant to a wide readership from academics to researchers and policymakers It provides a theoretically and empirically informed account embracing all the different disciplines contributing to urban studies Leading authors identify key issues and questions and future trends for further research and present their findings so that where appropriate they are relevant to the needs of policymakers Using the city as a unifying structure the Handbook provides an holistic appreciation of urban structure and change and of the theories by which we understand the structure development and changing character of cities

Admiration and Awe Antonio Urquizar-Herrera,2017-04-28 This book offers the first systematic analysis of the cultural and religious appropriation of Andalusian architecture by Spanish historians during the sixteenth and seventeenth centuries To date this process of Christian appropriation has generally been discussed as a phenomenon of architectural hybridisation However this was a period in which the construction of a Spanish national identity became a key focus of historical discourse As a result cultural hybridity encountered partial opposition from those seeking to establish cultural and religious homogeneity Spain s Islamic past became a major concern in this period and historical writing served as the site for a complex negotiation of identity Historians and antiquarians used a range of strategies to re appropriate the meaning of medieval Islamic heritage as befitted the new identity of Spain as a Catholic monarchy and empire On the one hand the monuments Islamic origin was subjected to historical revisions and re identified as Roman or Phoenician On the other hand religious forgeries were invented that staked claims for buildings and cities having been founded by Christians prior to the arrival of the Muslims in Spain Islamic stones were used as core evidence in debates that shaped the early development of archaeology and they also became the centre of a historical controversy about the origin of Spain as a nation as well as its ecclesiastical history **Circulations in the Global History of Art** Thomas DaCosta Kaufmann,Catherine Dossin,Béatrice Joyeux-Prunel,2016-03-03 The project of global art history calls for balanced treatment of artifacts and a unified approach This volume emphasizes questions of transcultural encounters and exchanges as circulations It presents a strategy that highlights the processes and connections among cultures and also responds to the dynamics at work in the current globalized art world The editors introduction provides an account of the historical background to this approach to global art history

stresses the inseparable bond of theory and practice and suggests a revaluation of materialist historicism as an underlying premise Individual contributions to the book provide an overview of current reflection and research on issues of circulation in relation to global art history and the globalization of art past and present They offer a variety of methods and approaches to the treatment of different periods regions and objects surveying both questions of historiography and methodology and presenting individual case studies An Afterword by James Elkins gives a critique of the present project The book thus deliberately leaves discussion open inviting future responses to the large questions it poses **War and Photography**

Wirth-Nesher,1996-01-26 City Codes is a study of the representation of the city in the modern novel that takes difference as its point of departure so that cities are read according to the cultural and social position of the urbanite These urban narratives are analysed in the context of a cultural repertoire of city codes from the architectural features of window and street to the social and historical signs of the landmark and the passer by with the emphasis on the subject's construction of his or her place as shaped by history politics nationality gender class and race The study moves from boundaries inscribed onto the cityscape to distances experienced by the city dwellers its real and textual cities are Warsaw Jerusalem New York Chicago Paris London and Dublin The novels discussed are by Isaac Bashevis Singer Amos Oz Theodore Dreiser Ralph Ellison Henry James Henry Roth James Joyce and Virginia Woolf **Hernando Colon's New World of Books** Jose Maria Perez
