Sex, Gender and International Human Rights Law Giovanna Gilleri, 2023-12-01 This book investigates the relationship between sex and gender under international human rights law and how this influences the formation of individual subjects Combining feminist queer and psychoanalytical

perspectives the author scrutinises the sexed gendered human rights discourse starting from the assumptions underpinning interpretations of sex gender and the related notions of gender identity sex characteristics and sexual orientation Human rights law has so far offered only a limited account of the diversity of sexed gendered subjectivities being based on a series of simplistic assumptions Namely that there are only two sexes and two genders sex is a natural fact and gender is a social construct gender is the metonymic signifier for women and gender power relations take the asymmetrical shape of male domination versus female oppression Against these assumptions dominative and subordinate postures interchangeably attach to femininities and masculinities depending on the subjects roles their positionalities and the situational meanings of their acts The limits of an approach to gender which is based on rigid binaries are evident in two case studies on the UN human rights treaty bodies vocabulary on medically unnecessary interventions upon intersex children and on the European Court of Human Rights narrative on sadomasochism This examination of the impact of human rights on gendered subjectivities will be of interest to scholars students and researchers in international law gender studies queer studies cultural studies critical race theory and psychoanalysis

Routledge Handbook of Material Religion Pooyan Tamimi Arab, Jennifer Scheper Hughes, S. Brent Rodríguez-Plate, 2023-09-01 The Routledge Handbook of Material Religion places objects and bodies at the center of scholarly studies of religious life and practice Propelling forward the study of material religion the Handbook first reveals the deep philosophical roots of its key categories and then advances new critical analytics such as queer materialities inescapable material entanglements and hyperobjects that explode the small scale personal view on religions The Handbook comprises thirty chapters written by an

international team of contributors who offer a global perspective of religious pasts and presents divided into four thematic parts: Genealogies of Material Religion; Materializing the Terms of the Study of Religion; Entanglements, Entrapment, Escaping Hyperobjects, or How Gigantic Things Affect Religions. In these four parts, the study of material religion is redirected towards systematic critical interrogations of the imbrication of religious structures of power with racial, economic, political, and gendered forms of domination. From Spinoza's political theology to African philosophies of ubuntu, from the queer materialities of Mesoamerican religion to the Satanic Temple of the United States, from Islamic love and sacrifice in human-animal entanglements to Shia militants' attachment to weaponry, from epidemic cataclysm in Latin America to vast infrastructures and the gathering of millions in India's Kumbh Mela, the study of material religion proves to be the study par excellence of the human condition. The Handbook is essential reading for students and researchers in religious studies, anthropology, history, and media studies, and will also be of interest to those in related fields such as archaeology, sociology, and philosophy.
